2012

Extracellular matrix tethering regulates stem cell fate.
B. Trappmann; J.E. Gautrot; J. Connelly; D.G.T. Strange; Y. Li; M. Oyen; M.A. Cohen Stuart; H. Boehm; B. Li; V. Vogel; J.P. Spatz; F.M. Watt; W.T.S. Huck. *Nat. Mater. 2012, 11, 642-649.*

Mimicking normal tissue architecture and perturbation in cancer with engineered micro-epidermis.
J.E. Gautrot; C. Wang; X. Liu; S. Goldie; B. Trappmann; W.T.S. Huck; F.M. Watt. *Biomaterials 2012, 33, 5221-5229.*

2011

Formation of Pickering emulsions using ion-specific responsive colloids.
K.Y. Tan, J.E. Gautrot, W.T.S. Huck. *Langmuir 2011, 27, 1251-1259.*

Island brushes to control adhesion of water in oil droplets on planar surfaces.
K.Y. Tan, J.E. Gautrot, W.T.S. Huck. *Soft Matter 2011, 7, 7013-7020.*

Polymer brushes showing non-fouling in blood plasma challenge the currently accepted design of protein resistant surfaces.
C. Rodriguez-Emmenegger, E. Brynda, T. Riedel, M. Houska, V. Subr, A.B. Alles, E. Hasan, J.E. Gautrot, W.T.S. Huck. *Macromol. Rapid Commun. 2011, 32, 952-957.*

Recent advances in entropy-driven ring-opening polymerizations.
S. Strandman, J.E. Gautrot, X.X. Zhu. *Polymer Chemistry 2011, 2, 791-799.*

Shape-induced terminal differentiation of human epidermal stem cells requires p38 and is regulated by histone acetylation.
J. Connelly; A. Mishra; J.E. Gautrot; F.M. Watt. *PLoS One, 2011, 6, e27259.*

2010

Actin and SRF transduce physical cues from the microenvironment to regulate epidermal stem cell fate decisions.
J. Connelly, J.E. Gautrot, B. Trappmann, D.W.M. Tan, G. Donati, W.T.S. Huck, F.M. Watt. *Nat. Cell Biol. 2010, 12, 711-U177.*

Exploiting the superior protein resistance of polymer brushes to control single cell adhesion and polarisation at the micron scale.
J.E. Gautrot, B. Trappmann, F. Oceguera-Yanez, J. Connelly, X. He, F.M. Watt, W.T.S. Huck. *Biomaterials 2010, 31, 5030-5041.*

Protein-resistant NTA-functionalized polymer brushes for selective and stable immobilization of histidine-tagged proteins.
J.E. Gautrot, W.T.S. Huck, M. Welch, M. Ramstedt. *Appl. Mater. Interfaces 2010, 2, 193-202.*

Shape memory properties of main chain bile acids polymers.
H. Therien-Aubin, J.E. Gautrot, X.X. Zhu. *Polymer 2010, 51, 22-25.*

2009

Bio-functionalized protein resistant oligo(ethylene glycol)-derived polymer brushes as selective immobilization and sensing platforms.
J. Trmcic-Cvitas, E. Hasan, M. Ramstedt, X. Li, M. Cooper, C. Abel, W.T.S. Huck, J.E. Gautrot. *Biomacromolecules 2009, 10, 2885-2894.*

Macrocyclic bile acids: from molecular recognition to degradable bio-material building blocks.
J.E. Gautrot, X.X. Zhu. *J. Mat. Chem. 2009, 19, 5705-5716.*

Polymers Containing In-chain Quinone Moieties : Synthesis and Properties.
P. Hodge, J.E. Gautrot. *Polymer International 2009, 58, 261-266.*

Shape memory materials based on naturally occurring bile-acids.
J.E. Gautrot, X.X. Zhu. *Macromolecules 2009, 42, 7324-7331.*

Synthesis of electron-accepting polymers containing phenanthra-9,10-quinone units.
J.E. Gautrot, P. Hodge, M. Helliwell, J. Raftery, D. Cupertino. *J. Mat. Chem. 2009, 19, 4148-4156.*

2008

High molecular weight bile acid and ricinoleic acid-based copolyesters via entropy-driven ring-opening metathesis polymerisation.
J.E. Gautrot, X.X. Zhu. *Chem. Commun. 2008, 14, 1674-1676.*

2007

2,6-diaryl-9,10-anthraquinones as models for electron-accepting polymers.
J.E. Gautrot, P. Hodge, D. Cupertino, M. Helliwell. *New J. Chem. 2007, 31 (9), 1585-1593.*

Chondroitin-4-sulphate: a bioactive macromolecule to foster vascular healing around stent-grafts after endovascular aneurysm repair.
C. Charbonneau, J.E. Gautrot, M.-J. Hébert, X.X. Zhu, S. Lerouge. *Macromol. Biosci. 2007, 7 (5), 746-752.*

Molar mass of main-chain bile acid-based oligo-esters measured by SEC, MALDI-TOF and NMR spectroscopy: a comparative study.
J.E. Gautrot, X.X. Zhu. *Anal. Chim. Acta 2007, 581 (2), 281-286.*

Nitrocellulose-stabilized silver nanoparticles as low conversion temperature precursors useful for inkjet printed electronics.
B.T. Nguyen, J.E. Gautrot, M.T. Nguyen, X.X. Zhu. *J. Mater. Chem. 2007, 17 (17), 1725-1730.*

Poly(dibenzo[a,c]phenazine-2,7-diyl)s - synthesis and characterisation of a new family of electron-accepting conjugated polymers.
J.E. Gautrot, P. Hodge. *Polymer 2007, 48, 7065-7077.*

Preparation and thermo-responsive light diffraction behaviors of soft polymerized crystalline colloidal arrays.
Y. Chen, J.E. Gautrot, Z. Li, X.X. Zhu. *Soft Matter 2007, 3 (5), 571-579.*

Synthesis and Characterization of Core-Shell Microspheres with Double Thermosensitivity.
Y. Chen, J.E. Gautrot, X.X. Zhu. *Langmuir 2007, 23 (3), 1047-1051.*

2006

Biodegradable polymers based on bile acids and potential application in biomedical engineering.
J.E. Gautrot, X.X. Zhu. *J. Biomater. Sci. Polym. E 2006, 17 (10), 1123-1139.*

Enhancing the photoluminescence intensity of conjugated polycationic polymers by using quantum dots as antiaggregation reagents.
B.T. Nguyen, J.E. Gautrot, C.Y. Ji, P.L. Bunner, M.T. Nguyen, X.X. Zhu. *Langmuir 2006, 22 (10), 4799-803.*

Experimental evidence for carbonyl-Pi electron cloud interactions.
J.E. Gautrot, P. Hodge, D. Cupertino, M. Helliwell. *New J. Chem 2006, 30 (12), 1801-1808.*

Main-chain bile acid-based degradable elastomers synthesised via entropy-driven ring-opening metathesis polymerisation.
J.E. Gautrot, X.X. Zhu. *Angew. Chem. Int. Ed. 2006, 45 (41), 6872-6874.*

2005

Electrode specific electropolymerization of ethylenedioxythiophene: Injection enhancement in organic transistors.
R. Schroeder, L.A. Majewski, M. Grell, J. Maunoury, J.E. Gautrot, P. Hodge, M. Turner. *App. Phys. Lett. 2005, 87 (11), 113501-3.*
