Why Queen Mary?

Welcome to Queen Mary University of London, a world-leading Russell Group University that stands out from the crowd. Through excellence in research and education, we support our diverse communities of staff and students to achieve the previously unthinkable.

Life-changing research and collaboration

World-class research and innovation bring our postgraduate programmes to life. Queen Mary is one of the UK's top research intensive universities, a place where you'll be taught by academics who are leading in their fields, here in the UK and across the globe.

Queen Mary was ranked joint seventh in the UK for quality of research, with 92 per cent of our research assessed as world-leading or internationally excellent in the last UK Government assessment of research (Research Excellence Framework 2021)..

Russell Group

Queen Mary is a member of the Russell Group, which represents

the 24 leading universities in the UK. Membership in this elite group demonstrates our excellence across research, teaching and learning. As the only campus-based Russell Group university in London, you'll be part of a truly unique setting in one of the most exciting cities in the world.

Our past and present

We have a proud history that dates back to 1785, with each of our four historic founding institutions (St Bartholomew's Hospital Medical College, London Hospital Medical College, Westfield College and Queen Mary College) established to provide "hope and opportunity" to underrepresented members of society.

The aim was, and still is, to be a place where anyone can succeed. We nurture a diversity of talent through an outstanding education, while putting our community's wellbeing first.

What we offer

At Queen Mary, there is a wide range of full-time and part-time programmes in the humanities and social sciences, science and engineering, and medicine and dentistry.

We are proud to provide a fantastic education and a full extra-curricular programme, all within a friendly and nurturing setting. The very best learning and social experience, alongside students from around the world, starts from your first day here.

About Queen Mary

Living in London

Welcome to London, a city like no other. Bringing together the very best of the world's culture, innovation and diversity, London is the beating heart of the UK. Here you will enjoy a first-class education with all the benefits of studying in a truly global city.

London is repeatedly ranked best city in the world to study in.

QS Best Student Cities 2023

Culture

Culture and London go hand-in-hand. On a single street you can find UNESCO World Heritage Sites, internationally renowned museums, and world cuisine. There is always something to do, with hundreds of shops, galleries, parks and a bustling nightlife to explore.

Innovation

East London is home to some of the world's leading innovators. Our campuses are a short walk, cycle or bus journey away from Tech City and Canary Wharf, as well as the creative hubs of Shoreditch and Hackney.

Diversity

London is a place where over 300 languages are spoken across more than 200 nationalities. Here you will meet people from around the corner and the other side of the world.

Travel

Our campuses have excellent links to the rest of London, the UK and the world. Explore the entire city by foot, bicycle or public transport. Our East London campuses are just 20 minutes away from Central London and all it has to offer.

Helping you find your feet

We know how important it is to feel secure and supported when moving to a new city. You'll find important money and cost of living information on our Student funding and finance pages (p.28), details about safety measures on the Our campuses page (p.8), and how to make the most of being part of the Queen Mary community on our Student support (p.24) and Facilities pages (p.16).

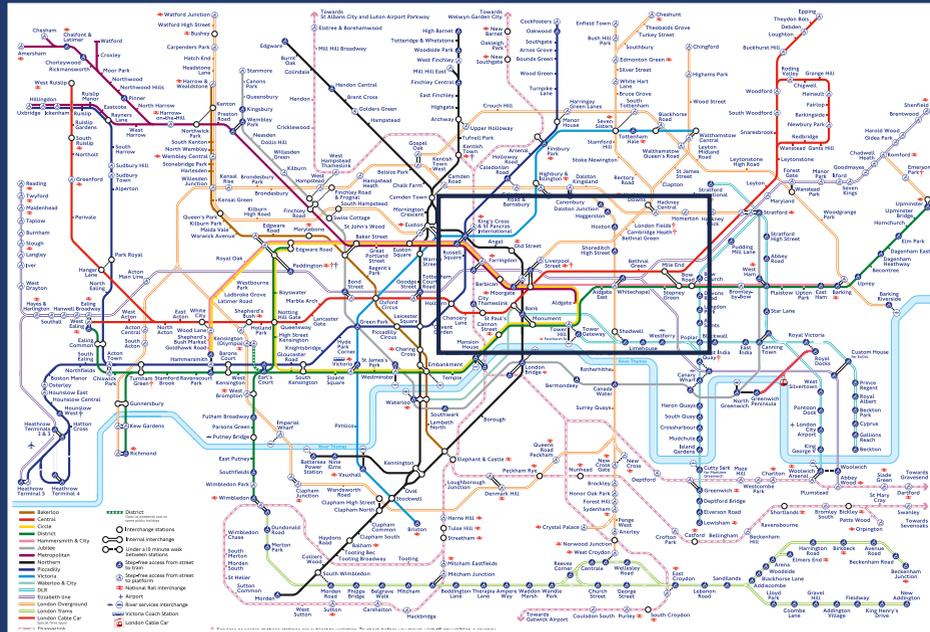

Learn more

About living in London

Our campuses

Enjoy the safety and community of campus living within the heart of London. Make the most of our five well-connected and secure campuses across the city, each with academic facilities and social spaces designed for you to get the most out of your Queen Mary experience.

- 1 Mile End campus
- 2 Whitechapel campus
- 3 Charterhouse Square campus
- 4 West Smithfield campus
- 5 Lincoln's Inn Fields campus

Mile End

Set alongside the historic Regent's Canal, Mile End is home to our Humanities and Social Sciences, and Science and Engineering Faculties. Most postgraduate students studying these subjects are based on this campus, which is home to a 24-hour library, gym, amenities such as cafés and shops, and plenty of green space to enjoy.

Whitechapel

Next to The Royal London Hospital and just a 20-minute walk from Mile End is our Whitechapel campus, home to the Blizard Institute, with its state-of-the-art labs and a medical library. Many of our postgraduate medicine and dentistry students are based here, amongst Whitechapel's famous street markets, culture and world food.

Charterhouse Square

Our historic Charterhouse Square campus is for postgraduate taught and postgraduate research medical students. Situated near the Barbican Centre, it's home to our research Institutes: Barts Cancer Institute (top five cancer centres in the UK), William Harvey Research Institute (cardiovascular, inflammatory and endocrine diseases) and Wolfson Institute of Population Health (primary care, public health and policy, and mental health).

West Smithfield

Our West Smithfield campus in Farringdon is where some of our postgraduate taught medical students are based. As well as St Bartholomew's Hospital and the West Smithfield Medical Library, this campus houses some of Queen Mary's cardiovascular, cancer, epidemiology and public health research facilities.

Lincoln's Inn Fields

Moments from world-famous Covent Garden, our Lincoln's Inn Fields campus in Holborn is part of London's historic legal centre. Most of our postgraduate law students are based here, right in the heart of Central London.

About how to find us

Transport for London journey planner

Accommodation

At Queen Mary, we offer a range of housing options in close proximity to our campuses. Our postgraduate-only residences are a popular, secure and competitively priced choice to suit all budgets and circumstances.

Our accommodation offering includes rooms in shared flats or studios, all of which are self-catering, and located a short walk or bike ride away from our campuses. Both family accommodation and rooms designed for people with disabilities are available. We also provide our incoming students support in seeking alternative accommodation or rooms in privately owned halls of residence.

Residential fees include all energy and water costs, the cleaning of communal areas within the residences (including kitchens and shared bathrooms), Wi-Fi, and personal possessions insurance.

We know how important it is to find the right place to live, and our accommodation team are ready to help support and guide you.

Living near campus

Our dedicated postgraduate accommodation is located at

Aspire Point in Stratford. Just one tube stop, a short bicycle ride or a 15-minute bus journey away from Queen Mary's Mile End campus, Aspire Point provides affordable living and study space with glorious views over London and the Queen Elizabeth Olympic Park. With studios, en suite rooms and rooms with shared bathrooms, there are rooms suited to every need and budget.

Postgraduate accommodation is also available in Blithehale Court and Sherren House, located in Bethnal Green and Stepney Green. These residences offer a mix of over 500 single en suite rooms and studios, and are just a short walk or bus journey away from our Mile End campus and the excitement of Shoreditch and Brick Lane.

Eleanor Rosa House is an intercollegiate hall of residence located in Stratford, home of the Queen Elizabeth Olympic Park, meaning students here are also just one tube stop away from Queen Mary's Mile End campus.

Eleanor Rosa House has en suite rooms available to Queen Mary students and offers the opportunity to meet other University of London students.

We also offer accommodation for our Medicine and Dentistry students at our Whitechapel and Charterhouse Square campuses. This means you can live with people on a similar course, close to our clinical facilities.

Once you have received an offer for your programme you will be able to apply for accommodation via your applicant portal.

Our guarantee

To ensure as smooth a transition as possible into postgraduate life, Queen Mary guarantees a place in halls for all applicants who apply before the deadline. Please check our website to find out more.

Careers

Professional career support and guidance is available from your first day at Queen Mary and continues after you graduate. Our Careers and Enterprise team will work with you to develop the skills and experience you need to stand out in a competitive job market – or start your own business.

Our Careers and Enterprise team can help you wherever you are in your career journey. You will have access to a range of career-advancing opportunities, including networking events, careers fairs, advice appointments and our extensive online vacancy board.

This support, partnered with Queen Mary's location and excellent industry links, will allow you to take full advantage of all the opportunities London has to offer.

Career support

We have a wide range of support to help you achieve your career goals:

- Employer fairs and events are a great way to meet recruiters from a variety of sectors.
- One-to-one appointments offer expert advice on finding, applying and preparing for opportunities.
- Programmes like our eMentoring programme allow you to network with and seek advice from our alumni.
- Online tools and resources provide a wealth of information on taking your next step, as well as access to thousands of vacancies.

- Specialist careers consultants work with PhD students through appointments, events and workshops to ensure that you feel supported through your research degree.

Enterprise support

Each year, Queen Mary offers a number of generous funding opportunities to support students in bringing business, start-up and social enterprise ideas to life.

In 2022/23, we awarded £33,500 in seed funding to help students start new businesses or grow existing ones.

We actively help student entrepreneurs through a range of activities designed to support both new and growing businesses in scaling up their ventures:

- Funding awards (of £500, £3,000 or £10,000)
- One-to-one advice and workshops
- QIncubator: an eight-week entrepreneur training programme
- QHack: a three-day entrepreneur bootcamp

Support for international students

We have specialist resources for international students so that you can tailor our year-round services to meet your needs.

Connect with prospective employers and make valuable contacts at careers events, use our tools and resources to develop your skills and enhance your CV, and access our international jobs database to find out about accessing a career in your chosen market.

After you graduate

Our support goes beyond graduation. Whether you're planning your next career move or looking into further study, you can access our Careers and Enterprise support for three years after leaving Queen Mary.

- One-to-one appointments in person or via video call.
- Employer events and workshops.
- Online resources to search for vacancies or practice interviews and psychometric tests.

To help you with that transition between graduation and taking your next professional step, you'll have access to support from people who've been exactly where you are.

The Queen Mary Network

The Queen Mary Network is our online, global community hub for alumni, students, staff and prospective students. Joining the platform enables students to network and receive eMentoring from a community of over 6,300 alumni across the globe, spanning a wide range of industries and sectors.

Learn more

About the Queen Mary Network

About our alumni community

Queen Mary built on **Mary's** love of History and sparked her passion for giving back.

It was Queen Mary's diverse academic offering that initially appealed to Mary as an undergraduate. "I wanted to continue learning about a range of different histories," she explains. After attending a taster course and open day, her mind was made up.

Choosing where to do her masters was simple. "I was motivated by my passion for history, I had the opportunity to attend a variety of lectures, and I enjoyed the research process and being part of the Queen Mary community. Applying was fairly straightforward too."

Mary's postgraduate research focused on Pan-Africanism and Communism during the cold war (1945–1960). "My experience was positive, I focused on my research, attended academic conferences, and continued as a course rep for MA History."

After graduating, Mary spent a brief spell in the NHS before moving into Higher Education. From there, she made the transition to a project management programme at the Parliamentary Digital Service.

"As an Apprentice Project Manager, I am training towards an Associate Project Management qualification, while gaining experience and delivering projects across the parliamentary estate."

"My degrees provided me with transferable skills such as scheduling, data analysis, database management, writing and presentation skills. I also developed many crucial skills from my extra-curricular activities; leadership, stakeholder management and engagement, budgeting, risk management, networking, communication skills and planning."

University has left a lasting impression on Mary, and she's grateful to be able to give back.

"I particularly enjoyed all the work I supported with the Widening Participation Team. I come from a low-income household, so I am grateful for every opportunity I had to support their strategy. My time at Queen Mary showed me that I am at my best when serving others."

Mary Ojo,
MA History, 2019
BA History, 2017

Facilities

We offer exceptional academic, teaching and learning facilities across our campuses. These include labs, libraries, lecture theatres, IT rooms and multimedia learning resources. Further academic, pastoral and wellbeing support is provided by the Queen Mary Students' Union (QMSU), who work hard to ensure you get the most out of your university experience.

Investing in your success

We've invested more than £250m in new facilities in the past 15 years. Our Blizard Building holds some of the largest open-plan laboratories in Europe, and our new £78m facility within The Royal London Hospital, the UK's first new dental facility of its kind in 40 years, is equipped with cutting-edge technology to cement its place as a leading dentistry education hub.

Our School of Mathematical Sciences has also been transformed, by an £18m project to ensure it provides an inspiring and collaborative space for staff and students.

Recent investment in the School of Biological and Behavioural Sciences has seen new research laboratories built and state-of-the-art equipment installed to help drive our world-class teaching and research.

Libraries

Following a £1.5m refurbishment, our Mile End library offers even more study and computer space and remains open 24 hours a day.

Medical and dental students can make use of the specialist medical libraries at Whitechapel and West Smithfield (site of Barts Health NHS Trust).

Queen Mary students also have access to all of the University of London libraries, such as Senate House in Bloomsbury, and the libraries at UCL and King's College London.

Outside your School or Institute, Library Services run academic skills workshops for students at all levels, as well as offering one-to-one support and bespoke skills guides.

Students' Union

QMSU is a student-led organisation, and you automatically become a member when you join Queen Mary.

QMSU is here to support you during your time at university and to ensure that your voice is heard and your views are represented through elected student representatives.

What we provide

With over 200 diverse Societies and Sports Clubs, a volunteering service and multiple sports programmes, the Students' Union offers something to suit every interest and goal. They also offer a packed calendar of events and campaigns to get involved with throughout the year – on campus, across London and online.

Our dedicated postgraduate representatives are elected by students and are here to represent and support you during your time at Queen Mary.

You can also get involved in their bespoke programme of events and activities for the postgraduate student community. Here you can make friends, spark new interests, gain additional skills and really get the most out of your Queen Mary experience.

Leisure facilities

QMSU also runs a variety of on-campus spaces including social spaces, cafés, shops and bars where you can meet up with friends, take a break or grab a bite to eat after a lecture.

QMSU is a registered charity, so every penny of profit goes straight back to you through their activities, campaigns and services.

Sport

Our Sport and Fitness Centre, Qmotion, is located on our Mile End campus and offers a fully equipped gym, sports hall, studio spaces and squash court across three floors.

All members receive a personalised training programme every six weeks, and there are also over 25 group exercise classes a week to enjoy.

QMSU also runs over 60 sports clubs. Training and matches take place at a range of venues across campus, at Queen Mary's sports grounds in Chislehurst and other venues like at the nearby Olympic Park.

Social Leagues are available for those keen to take part in sport with friends or course mates.

What's on offer?

- Over 150 societies
- Over 60 sports clubs
- Students' Union Hub social spaces
- Multi-faith centre for prayer and contemplation
- On-campus Sport and Fitness Centre, shops, bars and cafés
- Media suite
- Regular events and activities
- Get Active turn-up-and-play sports
- Social leagues
- Elite Athlete programme
- Volunteering Service offering one-off and long-term opportunities
- Sustainability programme

Students' Union Support

QMSU is also here to provide you with comprehensive support during your time at university including:

- Confidential advice on academic issues from the Academic Advice Service
- Faith spaces
- Ongoing wellbeing support and campaigns
- Transferrable skills training
- Careers and employability events

They also run liberation months throughout the year, including Black History Month, LGBTQA+ History Month and Asian Heritage Month, and assist students in running their own campaigns.

About Queen Mary
Students' Union

International students

Queen Mary University of London is truly a global University. We welcome students from over 170 countries into our community each year. Our home is in London, but with an academic presence in China and Malta, our students and staff collaborate, study, and live internationally.

Wherever you are in the world, we'll support you every step of the way. We can help with the application process, accommodation, funding, visa guidance and more.

Before you apply

You will have access to in-country meetings and frequent webinars, as well as online chat sessions with current students and the chance to connect with staff members.

Before you arrive

As well as our pre-departure briefings, we can help with any questions around accommodation, scholarships, funding, summer schools, visas and English language requirements.

During your studies

You will have access to our academic and wellbeing support

services. They can support you with your accommodation, studying, funding, career planning and more.

All students can also sign up to the Queen Mary Buddy Scheme, where you're matched with a mentor who can help you navigate university life.

Pre-masters graduate diplomas

Our pre-masters programmes offer bespoke preparation for masters-level study. They are for international and EU students who don't meet the academic or language requirements, or those who want to switch disciplines.

These diplomas are the perfect way to boost your subject-specific knowledge, as well as your skills in research, academic writing and speaking. We offer pre-masters programmes

in Economics and Finance, and Humanities and Social Sciences. We also offer two year integrated pre-masters in areas such as Banking & Finance and Management.

Pre-sessional language programmes

Our pre-sessional programmes are for international and EU students who want to improve their English language and academic study skills before enrolling onto their chosen postgraduate degree.

Running over the summer, these programmes are a great way to prepare for your next steps, with 71 per cent of pre-sessional students going on to achieve a Distinction or Merit on their main degree programme in 2021.

About how to find us in your country

Student support

Community is at the heart of everything we do at Queen Mary, and the welfare of our students is our highest priority. You can feel confident that your health, safety and wellbeing will always come first, with our dedicated support services being on hand to meet your academic and wellbeing needs.

Supporting your studies

We want you to get the most out of your time at Queen Mary. To ensure you enjoy a learning experience that positively impacts your future, every School and Institute at Queen Mary has a dedicated Student Support contact who will support you in your studies.

Find out more about how our Academic Advice Service and libraries can support your study and development on the Facilities pages (p.16).

We also have dedicated support if you're an asylum seeker or refugee, have been in local authority care, are estranged from your family, or you are a carer.

You can get in touch with us before you apply to Queen Mary if you want support with planning your finances, the logistics of studying abroad and the practical aspects of student life.

Supporting wellbeing

In recent years, the University has invested significantly in student wellbeing services, and we have an array of resources, activities and support available to our students.

As well as adapting to the demands of postgraduate study, you will also be managing the challenges of day-to-day life. Finances, new and existing responsibilities and settling into a new environment will all be juggled alongside your studies.

To ensure you maintain a strong sense of wellbeing, there are support services open to you throughout the year.

Disability and Dyslexia support

Queen Mary's Disability and Dyslexia Service offers support for all students with disabilities, learning differences and mental health diagnoses from application through to

graduation. The service offers students advice and guidance around securing access to funding streams like the Disabled Students' Allowance, as well as ensuring that our students have access to the reasonable adjustments to which they are entitled.

Advice and counselling support

The Advice and Counselling Service offers a range of free and confidential services to help all Queen Mary students. They can support with financial, welfare and legal queries, including advice on visas and immigration. They can also assist with mental health, emotional and psychological issues.

We provide this support through one-to-one appointments with our Advisors. Our team includes Mental Health Advisors, Sexual Assault and Harassment Advisors, and our specialist Welfare and International Student Advisors,

who can help you identify funding you may be eligible for.

They can also provide information on the Student Finance application process, tuition fees and living costs, bursaries and scholarships, and what to do if you are having financial difficulties.

Legal support

Our award-winning Queen Mary Legal Advice Centre is open to students, staff and members of the local community. It provides free, confidential legal advice by appointment.

Health and safety

Ensuring you have an excellent, safe environment to live and study in is vitally important to us. We have invested in our campuses to ensure all appropriate safety measures are in place.

Learn more

About Postgraduate funding

About our Disability and Dyslexia Service

About our Advice and Counselling Service

About our Legal Advice Centre

Student health

There is a free, easily-accessible Student Health Service available on our Mile End campus that provides a complete range of medical services. This includes GP appointments, immunisations, sexual health advice and screenings, and specialist clinics.

We encourage you to register with our on-site GP service if you're based within the borough of Tower Hamlets (E1, E2, E3 and E14), and are eligible to do so. You can do this online or at the Student Health Service.

Occupational health

The Occupational Health Department focuses on the prevention of ill health related to study. They work particularly closely with students from the Faculty of Medicine and Dentistry as the nature of their work often brings them into contact with patients.

Immigration advice

Welfare and International Student Advisors within the Advice and Counselling Service are trained to provide immigration advice to applicants, current students, recent graduates and their dependents.

We have detailed information and guidance on our website, including guidance around student immigration permission, leaving and re-entering the UK, lost, stolen or expired passports or biometric residence permits, and money. You can contact them for personalised advice.

Lincoln's Inn Fields

Student funding and finance

Whatever your financial situation, we want you to fulfil your potential. Queen Mary offers a number of options to help you financially – including helping you to access external funding, in addition to a range of scholarships for academically excellent students.

Tuition fees

Tuition fees for UK, EU and international students are listed on each course's webpage.

Managing your money

We can help you manage your budget. If you're calculating your costs, we offer detailed guidance on budgeting and money management.

Applying for financial assistance

Queen Mary offers a number of funding packages, including external funding, across a range of subjects.

You can get in touch with us before you've applied to Queen Mary if you want support with planning your finances, the logistics of studying abroad and the practical aspects of student life.

The Advice and Counselling Service has specific advice and guidance if you are a refugee or asylum seeker, have been in local authority care, are estranged from your family, if you are a carer or if you are a parent.

International students

Our partnerships with external funding organisations such as Chevening, the Commonwealth

Scholarship Commission and numerous governments around the world mean that we can offer support to many of our international students through scholarships and funding.

Postgraduate Masters Loan

The Government's Postgraduate Masters Loan offers up to £12,167 if your course starts on or after 1 August 2023. International students are not eligible for this loan.

The loan is available for any full- or part-time taught masters programme as well as Masters of Research (MRes), though you won't normally be eligible if you already hold a masters degree or higher-level qualification.

You can find out more information including eligibility criteria and how to apply in our Postgraduate Funding guidance, which also explains other possible funding options depending on your circumstances.

Postgraduate Doctoral Loan

Eligible students enrolling in 2023/24 can borrow up to £28,673, with the Government's Doctoral Loan. It is available for full or part-time Doctoral degree courses including by

distance learning. If you already hold a doctoral degree, you won't normally be eligible for this loan and other eligibility criteria will also apply.

You can find more details in our Postgraduate Funding guidance, as well as information about other possible sources of funding.

In addition to these loans, we offer a wide range of additional targeted awards, including:

- Full PhD studentships covering tuition and living expenses across all subject areas.
- Schools of Business and Management and Economics and Finance scholarships of £5,000 for postgraduate students.
- Global Excellence Scholarship worth £2,000 for high-achieving postgraduate science and engineering students.
- International Women in Business Scholarships of £4,000.
- Alumni Loyalty Awards worth at least £1,000.

Application and deadlines

Please apply as early as possible to allow enough time for your application to be considered. That's especially true if you're seeking financial support from Research Councils or other award-giving bodies.

We update the relevant course pages on our website as soon as a programme becomes full. Once this happens, we will no longer be able to consider applications.

Please note some courses may have earlier deadlines. If this is the case the earlier deadline will be published on the individual course pages on our website.

Help with overseas applications

Our Global Engagement Office have staff in the UK, China, India, Pakistan, Malaysia and the USA who between them travel to over 50 countries each year to meet and support our international applicants. We also have a network of over 100 authorised representatives who can provide advice and guidance on your application to Queen Mary. You can find details of our Global Engagement Office staff and network of representatives on our country pages.

Entry requirements

Please use our programme finder to check the entry requirements for the course you're interested in.

Conversion and fast-track programmes

The Senior Status LLB (two years) is a qualifying law degree suitable for non-law graduates. It's an accelerated version of the traditional three-year route and is popular with students considering a career in law or with an academic interest in the subject.

Our Graduate Entry Medicine MBBS (four years) is designed to be a fast-track route for graduates who obtained good degrees in science or health-related subjects. The first year of study is based on the first two years of the five-year MBBS programme. For more information, contact smdadmissions@qmul.ac.uk.

Biological and Behavioural Sciences

The School of Biological and Behavioural Sciences combines the academic rigour of a leading department with a vibrant research culture, alongside a friendly and lively study environment.

Find our degree programmes on **page 72**

 **G.E. Fogg Building**
Mile End campus

Teaching is influenced by world-class research and our staff regularly produce work in high impact journals like Nature, Science, Lancet Psychiatry and others leading in their specialisms.

Career progression

Graduates progress to careers in industry, conservation, environmental organisations and academia worldwide. Examples include:

- Botanical Horticulturalist at Royal Botanic Gardens, Kew
- Lead Marine Advisor at Natural England
- Curator at the Natural History Museum
- Bioinformatician at European Bioinformatics Institute
- Assistant Technologist (Mental Health) at Barts Health NHS Trust
- Biomedical Scientist at Max Planck Institute

- Lead Generation Specialist at Illumina
- Communications Officer at European Geosciences Union

Many of our graduates also do PhDs, where our programmes make students internationally competitive.

Global fieldwork opportunities

Our inspiring fieldwork course portfolio offers students the chance to visit locations such as Borneo, Madagascar and Cape Verde. Our MSc student Oliver Gaskin said: "Our field trip to Danum Valley Conservation Area in Borneo was an amazing experience. During our visit we witnessed an incredible variety of wildlife, from waking to the sound of gibbons, to hearing the shouting of cicadas every evening. In addition, the ecological sampling techniques

we learned will undoubtedly be an asset for the future."

Our facilities

A new £39m Graduate Centre provides quality teaching and learning spaces, and our G.E. Fogg Building has state-of-the-art laboratories and equipment. You'll have access to analytical facilities for ecological or biomedical studies. These include our field station, the River Laboratory in Dorset, imaging facilities including confocal and electron microscopes, genomics labs, electroencephalography and behavioural labs and bioinformatics infrastructure, including a 1,800-core computing cluster.

Our research

In the recent Research Excellence Framework 2021, 91 per cent of our School's biology research

impact was rated either world-leading or internationally excellent. Examples of such research include the work of Professor Christophe Eizaguirre, who used genetic analysis of loggerhead turtles to develop an effective conservation strategy, and Dr Iwan Jones, who informed a targeted land management scheme to reduce pollution in Wales.

We have particularly strong links with Royal Botanic Gardens, Kew, with access to the most diverse collections of plants and fungi anywhere in the

world. We also collaborate with the Institute of Zoology, the Natural History Museum, environmental organisations such as the Environment Agency, conservation charities, DEFRA, and industry leaders, such as GlaxoSmithKline, Proctor & Gamble, AstraZeneca and Syngenta.

We offer a large range of research projects which will prepare you for careers in such places and provide transferable skills essential for any professional career.

About our programmes

Our Alumni

"We had a really tight-knit community on my course and I'm still close with many of them a year on. You rely on each other a lot in the MSc and there were lots of opportunities to make friends through group projects. There are a huge range of taught modules at the beginning of the course, so you learn a bit of everything. This breadth of knowledge is very useful to find a career. When you start your six-month research project, you learn to hone your skills and interests and that is where you find the drive for what you want to do as a career."

Sahr Mian,
Research Assistant at Royal Botanic Gardens, Kew,
MSc Plant and Fungal Taxonomy, Diversity and Conservation, 2019

A business school with a difference

Business and Management at Queen Mary takes an approach to teaching and research that is underpinned by the values of social justice, sustainability, good governance, and the UN Principles for Responsible Management Education.

We aim to create responsible future leaders with the know-how to analyse problems and present innovative solutions.

Career progression

Our postgraduate students are sought after by a range of employers. Recent postgraduates have progressed into careers such as:

- Asset management
- Chartered and certified accountants

- Finance investment analysts and advisors
- Management consultants
- Marketing consultants
- Business analysts
- Entrepreneurs
- Banking

In companies such as:

- Deloitte
- Ernst & Young
- Environmental Defense Fund
- KPMG
- Capco New York
- Photobox
- Bank of China
- IBM
- United Nations Development Programme
- Facebook
- Bloomberg
- JP Morgan
- John Lewis
- Chanel
- ITV

Our research

Since it was founded, the School of Business and Management has produced research of a significant positive social and economic impact.

Our academics are members of the Centre for Research in Equality and Diversity, a prominent international group that is at the forefront of equality and diversity research. The Centre addresses issues including gender and sexuality in male-dominated professions and the implementation of the Equality Act 2010.

The School is also home to the Centre for Globalisation Research, which conducts research around the themes of political economy and macroeconomics; development,

inequality and poverty; and business analytics, innovation and networks.

Our postgraduate programmes offer a structured route to exploring these key issues and connections. You will develop a portfolio of valuable skills and enhance your career opportunities.

About the School

About our programmes

Our Alumni

“I chose Queen Mary because it provided me with a very fitting course and exactly what I was looking for. The course not only helped me hone my skills, but it also helped me realise my potential. The curriculum is designed in a way that helped me prepare for the real world and gain the knowledge I needed to attract the right opportunities. I have been able to gain a more holistic understanding and develop an international perspective of my subject.”

Priya Rathore,
MSc Management, 2022

The School is accredited by the Association to Advance Collegiate Schools of Business (AACSB) in recognition of its world-leading excellence.

82%

of our research was judged as world-leading or internationally excellent.

Times Higher Education 2022

Cancer and Surgical Skills

Barts Cancer Institute (BCI) at Queen Mary University of London is a leading UK cancer research institute, with the overriding objective of ensuring that our research is relevant to and will impact on cancer patients. Our scientists and clinicians create an exciting grouping of expertise dedicated to clinical cancer care, cancer research and excellence in teaching.

Find our degree programmes on **pages 73-74**

BCI was created in 2003 and brought together some of the most eminent cancer research teams in London. Today, BCI is one of four partners in the Cancer Research UK City of London Centre, a world-class hub dedicated to cancer biotherapeutics.

We offer an exceptional learning experience, exposure to modern techniques and state-of-the-art laboratories that enable our students to further their understanding, research and career development in the field of cancer or surgical skills.

Career progression

Our graduates work in a range of medical, biomedical and scientific roles in hospitals and NHS Trusts, universities, pharmaceutical companies and the wider healthcare

sectors, while a large proportion are undertaking further study or research (Graduate Outcomes Survey 2019/20).

Our research

An innovative therapy provides new hope to patients with malignant mesothelioma – a rare but rapidly fatal type of cancer with few effective treatment options. The findings show that the drug extends the median survival of patients compared with current standard treatment. The results are the culmination of 20 years of BCI research that began with Professor Peter Szlosarek's discovery of a key metabolic weakness in cancer cells.

According to results from a phase III clinical trial led by BCI's Professor Peter Schmid, a new drug combination could

save thousands of lives. An immunotherapy drug called 'pembrolizumab' has been shown to significantly reduce disease recurrence in patients with the most aggressive type of breast cancer.

Our academics

Professor Fran Balkwill from Barts Cancer Institute has been named as one of the top 100 female scientists in the UK by Research.com. Fran is Professor of Cancer Biology and Deputy Centre Lead of BCI's Centre for Tumour Microenvironment. Her research focuses on the links between cancer and inflammation, with a particular focus on ovarian cancer, and she researches ways of translating this into treatments to test in clinical trials.

Professor Balkwill is also passionate about science

communication, especially to young people. She has published a number of children's books on scientific topics, and in 2008, she was awarded an OBE for services to science communication to children.

She is Director of the Centre of the Cell, a unique informal biomedical science learning centre based at Queen Mary's

 **Barts Cancer Institute**
Charterhouse Square campus

Our Alumni

"The first thing I enjoyed was the interaction between students and lecturers as well as the support provided by the Teaching Office to international students. Lecturers were always available for students whenever they needed them. Secondly, I enjoyed the clarity of the programme, which provided the full package needed for our different career aspirations, be it in clinics, research, industry, and many others. Third, I enjoyed the cultural and professional diversity among students, where we could share our different experiences and learn from each other at the same time. The fourth aspect I enjoyed was the location of BCI, which is in the centre of London and ideal for someone who wants to visit and enjoy all the wonderful aspects of the city."

Eric Rucogoza,
Analyst in Sustainable Health Financing Program, Clinton Health Access Initiative - CHAI, Rwanda, MSc Cancer and Therapeutics, 2020

Whitechapel campus. Since the opening in 2009, there have been over 225,000 primary and secondary school-age participants in its interactive science shows, workshops, digital experiences and youth engagement events.

She is also a Fellow of the Academy of Medical Sciences.

Computer Science and Electronic Engineering

With expertise spanning a range of technologies, the School of Electronic Engineering and Computer Science undertakes high-quality research that improves lives. The Research Excellence Framework (REF) 2021 ranked our Computer Science research joint first in the UK for impact, and our Engineering research 2nd in the UK for output.

Find our degree programmes on **pages 74-75**

 **Engineering Building**
Mile End campus

Our Alumni

“I studied Computer Science at Queen Mary whilst working full time in defence. When I think about Queen Mary, I remember the helpful lecturers, the interesting workload, up-to-date IT software and overall great student support. I loved studying my degree as it grew my understanding of different subjects that are important in the tech industry. These are all areas that I find to be very important in my day-to-day work. Working full-time and studying part-time was very stressful to say the least, and I found that my lecturers cared about my situation and would offer great support when needed. This made my overall experience at Queen Mary amazing.”

Maryanne Maira,
Customer Data Scientist,
MSc Computer Science, 2020

91%

of our MSc graduates are in employment or graduate study 15 months after graduation.

Graduate Outcomes Survey 2019/20

Our MSc courses are designed with the needs of industry in mind, helping to prepare you for success in your chosen career. You'll be taught by internationally-recognised experts, who are leading technological advances in their fields.

Our academics have strong links with leading employers, and our Industrial Board provides vital input into all aspects of our teaching and research.

We offer a vibrant and multi-disciplinary learning environment with a large and diverse student community and strong industry links, where teaching is exciting and relevant. We pride ourselves on our impactful research, excellent facilities and innovative educators.

Career progression

The average salary for our MSc students 15 months after graduation is £45,158 (Graduate Outcomes Survey 2019/20). The demand for skilled graduates in the areas of computer science and electronic engineering is increasing across a variety of sectors and industries, offering graduates a wide range of careers to choose from.

Our postgraduates have moved into exciting and rewarding roles, equipped with a broad range of skills, gained through our programmes, extracurricular activities and work experience. Previous graduates are now working in roles such as Software Engineer, AI Engineer, Audio Software Developer, Data Scientist, Digital Electronic Hardware Designer, and

Interactive Systems Developer at organisations such as KPMG, S&P Global, Samsung, ITV, Vodafone and Deliveroo.

Our research

Our research groups include Antennas, Cognitive Science, Digital Music, Game AI, Intelligent Sensing, Robotics and Theory, with over 400 researchers from more than 50 countries.

We are established as a centre of national and international excellence in Computer Science and Electronic Engineering research. In the recent REF 2021, 99 per cent of our research was ranked as world-leading or internationally excellent.

As well as teaching you, our lecturers are making a significant difference to

the world around us. Our academics are researching ways to improve the battery life of electric vehicles, developing a digital music platform which serves the needs of disabled musicians and designing artificial intelligence that helps doctors to communicate with patients more effectively. Being taught by someone who is changing the world with their ideas

allows you to be ahead of the curve in your subject area. Entrepreneurship and innovation play a key part in the culture of our School. We have excellent links with industry, working together on numerous commercial and research projects. Researchers in the School have also developed several 'spin-out' companies with a combined value of over £50m.

About our programmes

Dentistry

Based in The Royal London Dental Hospital in East London, the Institute of Dentistry offers cutting-edge technology, a superb education and first-class research facilities.

Find our degree programmes on **pages 75-76**

 **Institute of Dentistry**
Whitechapel campus

Our Alumni

“I believe that Minimally Invasive Dentistry is the future of dentistry. Having an evidence-based dental practice has helped me hone my skills. I enhanced preventive, operative, and clinical practice management skills during the course. We had a great team of students and teachers at Queen Mary and the entire learning process was extraordinary.”

Dr Radhika Goel,
Dental practitioner,
MSc Minimally Invasive Dentistry, 2021

Our postgraduate dentistry programmes are designed to enhance your practical and clinical skills to advance your career from postgraduate certificates and diplomas to masters and Doctorates in Clinical Dentistry (DClinDent). During your studies, whether on campus or online, you'll be taught by world-leading experts, whose teaching is informed by innovative research in their specialist field. We're located in modern, purpose-built premises at The Royal London Dental Hospital in Whitechapel in east London, which houses some of the most modern and technologically advanced equipment in the UK. This includes our recent investment in Simodont Haptic Dental Trainers, which provide a virtual reality training environment.

Career progression

Most of our graduates are working as dental practitioners in the NHS and private sectors, in the UK and abroad, while some go on to further study, teaching and research roles (Graduate Outcomes Survey 2019/20).

Our research

Research by our academics has been instrumental in a number of innovations in dentistry. Notable achievements include the development of a smart toothpaste that “knows” what your teeth need, establishing a pioneering one-stop clinic for Behçet's syndrome that has transformed patient care, and helping thousands sleep better.

Professor Farida Fortune's research has helped reveal the mechanisms behind Behçet's syndrome and driven the

creation of three centres in the UK including one at The Royal London Hospital, which acts as a 'one-stop clinic' for patients. Average diagnosis time has fallen from 14 years to just one and the centres have transformed patient care and improved clinical outcomes.

Since 2013, more than 11,000 patients have benefited from Professor Ama Johal's life-changing treatment for Obstructive Sleep Apnoea (OSA). His modified Sleepwell device improved results for 70% of patients, and he has also had a significant impact on dental education and training.

Our academics

Dr Vanessa Muirhead is a Clinical Senior Lecturer in Dental Public Health and Programme Director for the MSc/PGDip/PGCert Dental

Public Health, Leadership and Policy. Her research has shown that there is a significant issue with the oral health of vulnerable children. This led to the 'Let's Talk about Teeth' project, working with foster carers to understand the oral health of these children and how well-equipped foster

carers were to support them. As a result, the researchers made a series of recommendations that were implemented in all London boroughs. In addition, a booklet for foster carers is used in a number of local authorities across England.

Economics and Finance

A centre of excellence in research and teaching, the School of Economics and Finance is home to a diverse community of Faculty and students.

Find our degree programmes on **pages 76-77**

 **Bank of England**
City of London

We provide a solid foundation in economic and financial theory and practice, driven by research-led teaching from experts in the field. You will be studying at the cutting-edge of your discipline and have access to a wide range of extra-curricular activities to enhance your learning experience.

Our facilities

As a student, you will have access to the same industry software and major statistical databases as real-life traders tracking the stock market, economists in government, think tanks and major consultancies, which will be of huge benefit to your future career and professional development.

As one of a few UK universities with a Trading and Behavioural Lab containing Bloomberg

trading terminals, we have been recognised as a Bloomberg Experiential Learning Partner, in acknowledgment of the School's integration of experiential learning into our curricula.

In addition, you will have access to FXCM FX Trading Stations, Interactive Brokers Trader Workstations (used for finance data analysis and simulation) and free access to popular industry publications.

Professional accreditation

The School is affiliated with the Chartered Financial Analyst (CFA) Institute, with many of our masters programmes offering a CFA pathway.

Our association with professional bodies signals to employers that the School's curriculum is closely tied to professional

practice, providing students with an important competitive edge in the job market.

Student enterprise

Based in the School of Economics and Finance, the Queen Mary MSc Investment Fund is a fund that currently has responsibility for over £40,000 of investments. Established for postgraduate students, the investment fund provides the opportunity for students interested in obtaining relevant, practical work experience in trading and portfolio analysis to apply their knowledge and skills in a real environment.

Career progression

The School has a dedicated team of careers and employability professionals to support our postgraduate students to achieve their dream careers. Providing

one-to-one advice, networking events, mock interviews/assessment centres, skill and knowledge development sessions and much more, our graduates are well prepared for the world of work.

Graduates from the School of Economics and Finance enter into a wide range of careers, including roles at large financial organisations such as JP

Morgan, Goldman Sachs, and Credit Suisse and professional services firms such as EY, PwC, Deloitte and KPMG.

Equipped with the skills for a wide variety of roles, you could follow in the footsteps of our alumni as Finance and Investment Analysts, Taxation Experts, Economists, Consultants and many other career routes.

About the School

About our programmes

Our Alumni

"I always wanted to study in London as it is a leading global financial centre and a city full of opportunities. While doing my research, I found that the courses offered by the School of Economics and Finance were among the best in the UK. Also, facilities provided by the School such as access to the Bloomberg Terminal, free subscription to publications like Financial Times and networking events with employers from top UK companies acted as a great aid to me."

Goshilla Maroam,
MSc Investment and Finance,
2019

Ranked 4th in the UK for research outputs in Economics and Econometrics.

Research Excellence Framework 2021

Engineering and Materials Science

Throughout its history, the School of Engineering and Materials Science has brought together pioneering minds from the scientific community to make significant impacts and advancements. We were the first in the UK to teach Aeronautical Engineering and the first to establish a Materials Science department.

Find our degree programmes on **pages 77-78**

Our staff lead the way in fields such as sustainable energy and medical innovation: developing technology to better harness energy from the sun, repairing foetal membrane defects to reduce preterm births and prevent early deaths in babies, and pioneering new innovative biomaterials now improving the lives of thousands of patients worldwide.

Career progression

Our programmes lead to rewarding careers that make a real difference to the world.

Students have gone on to work for companies such as Siemens, Jaguar Land Rover and Accenture, as well as on to pursue PhD study. Those who choose a career in industry have progressed to positions including Data Scientist,

Programming Analyst and Geophysicist in organisations including HSBC, Tech Alchemy and natural gas companies.

Our facilities

We have recently spent over £30m upgrading our laboratory spaces. The Combustion laboratory focuses on engine performance testing and emissions.

The laboratory of the Centre for Advanced Robotics is equipped with robotic arms, mobile platforms, mechatronic and control systems, artificial intelligence, swarm robots, human-like robotic systems, virtual reality and haptic interfaces, and a human motion tracking system.

Our Aerospace laboratory houses a flight simulator with a cockpit

and fully moving-base platform, virtual vision simulation for a range of visual cueing systems, image processing techniques for the flow field, advanced optical flow diagnostic tools and a unique wind tunnel for the study of laminar flow and its active control. External organisations such as Airbus and the US Airforce are users of these facilities.

The NanoVision Centre in Materials Engineering is a multi-million pound microscope unit, bringing together the latest imaging technologies to open up new avenues for cutting-edge research.

This multidisciplinary facility is unparalleled in the UK, combining high-resolution imaging with structural, chemical and mechanical analysis.

 **Engineering Building**
Mile End campus

Our research

Through research excellence, our academics have improved the outcomes for hundreds of patients worldwide. For example, Dr Karin Hing and her team at Queen Mary are engineering materials that encourage bone growth when used in complex orthopaedic surgeries.

In 2019, Royal Mail launched six stamps to mark 50 years of innovation in British engineering and Dr Hing's work was featured in one of them. Dr Hing's stamp depicts a close-up of the synthetic bone graft with an example of where bone grafts are commonly used to support bone regeneration in orthopaedic surgery.

Graduate Outcomes Survey 2019/20

English and Drama

The School of English and Drama is a dynamic and inclusive learning environment, led by world-renowned artists, academics, writers and practitioners. We combine cutting-edge research and teaching with a commitment to community and social change.

Find our degree programmes on **pages 78-79**

 **The Octagon**
Mile End campus

By challenging norms, championing marginalised voices, and exposing our students to a breadth of material, we improve lives and foster understanding of complex issues.

Career progression

Our masters courses train critical thinkers, artists and writers, placing you at the forefront of critical theory and providing you with a wide range of academic and transferable skills.

The experience cultivated in our courses is increasingly valued by employers in such sectors as secondary and higher education, creative and cultural industries, performing arts, arts management, marketing, digital media, journalism and publishing.

Our research

Our large English department has a wide range of research areas to help you with your research, with a particular focus on Eighteenth Century and Romanticism, the Victorian Period, Modernism and Early Twentieth Century, Contemporary, Postcolonial and World Literatures, and Creative Writing.

In the most recent Research Excellence Framework 2021, our Drama department was ranked first in the UK for the quality of our research.

Our academics are experts in the fields of socially applied performance, arts and mental health, live art and critical approaches to theatre.

What makes our degrees different

- MA English Literature
- This is a genuinely trans-historical course, providing in-depth coverage of many literary periods, genres and styles.
 - You will learn from supportive experts in many different fields of English Literature.
 - You will also gain analytic, communication and research skills valuable for your career.

We have expert staff across a wide range of literary areas:

- Literature and Culture: 1700-1900
- Modern and Contemporary
- Postcolonial and Global Literatures
- Theory

MA Theatre and Performance

- You will work with our internationally respected academic artists, academics and writers.
- You will attend lectures, workshops, and mentoring sessions with visiting artists throughout your studies.
- You will also see the latest in contemporary theatre, from warehouse raves to productions at international institutions like the Old Vic.

MA Creative Writing

- You will work with our professionals to create your own work – including acclaimed writers like Isabel Waidner, Nisha Ramayya, Rachel Allen, Brian Dillon and Michael Hughes.
- You will get insight into careers with your writing in our Creative Writing in the Professions module.
- You will have a supportive community to organise a writing event or start a publication.

Geography, Environmental Science and Global Development

Geography has been taught at Queen Mary since 1894, making us one of the longest-established Schools of Geography in the UK.

Find our degree programmes on **page 79**

Crossrail Place Rooftop Garden
Canary Wharf

We offer a range of masters programmes in geography, environmental science and global development, drawing on the diverse expertise of our staff to tackle some of the greatest challenges of the 21st century, including international development, global health, migration and the sustainable management of aquatic environments.

As the world of work grows more competitive, masters study offers an exciting opportunity to explore a subject you are passionate about and enhance your career prospects.

Students choose our masters programmes for a range of reasons:

- to engage deeply with a subject
- to increase their employability

- in a specialist field
- to prepare for a PhD and academic/research career
- to facilitate a career change
- to advance their existing career.

Our programmes maximise opportunities to develop links between academic and external organisations that benefit your learning and research as well as wider communities. Students on all of our masters programmes actively engage with a range of external organisations – from museums and cultural organisations to overseas development organisations and the water and environmental sector. Many students choose to work with our partner organisations on meaningful real-world projects for their independent dissertation research.

All of our masters degrees are available on a full-time or part-time basis (one year full-time/two years part-time).

Career progression

Our graduates have established careers in the water and environment sector, within government agencies, charities and consultancies, have undertaken PhDs and secured jobs with international NGOs, development organisations, government departments and private companies. Graduate destinations include Affinity Water, Environment Agency, Rivers Trusts, Jacobs, Palladium Group, Fairtrade International and Swiss Re Group.

Our Alumni

"As a government officer of a developing country, I strongly believe that the education that I received allowed me to enhance my technical skills and professional expertise to contribute to the development process and global integration of my country in such a competitive and dynamic global economic order."

Global Public Health

The Wolfson Institute of Population Health is a world-class grouping of scientists and educators in applied health sciences, including public and global health, health services and primary care research, clinical trials, health policy and economics, health data science, behavioural and social sciences, epidemiology, biostatistics, translational and implementation science.

Find our degree programmes on **page 79**

The Institute delivers research and education to drive improvements in the health of local, national and global populations, identifying the causes and methods of prevention of physical and mental health conditions that lead to poor quality of life and premature death.

Our work has had an unprecedented impact on lives across the world. We offer postgraduate degrees in global and public health, and psychology and mental health.

Career progression

93 per cent of our global and public graduates were in employment or study 15 months after graduation (Graduate Outcomes Survey 2019/20). Most are working as medical practitioners, for charities and

nongovernmental organisations and in government, while some have gone on to further study.

Our research

Our researchers explore the causes of poor health and health inequalities, how to detect disease earlier, and design novel interventions and evaluate measures aimed at improving the health and quality of life of individuals and populations, locally, nationally, and across the globe.

Research led by Professor Jack Cuzick confirmed that HPV vaccine could 'nearly eliminate' cervical cancer. He co-designed trials that confirmed the vaccine's safety and efficacy and his team's research also influenced the decision to make HPV screening the first test for cervical cancer. This played a pivotal role in

changing clinical guidelines and screening programmes around the world, which will provide millions of people with earlier diagnosis and protection while sparing many from unnecessary treatments and anxiety.

Dr Doreen Montag's research took her to Peru's Amazonian region, examining how vulnerable indigenous communities are to Covid-19 as high prices, shortages of supplies, and a history of mistreatment has led to mistrust in hospital treatments. Professor Vicky Bird has been awarded a £7m grant to co-direct a new Global Health Research Centre with partners across Latin America, which will work with communities to develop innovative, low-cost solutions to improve healthcare, with a key focus on indigenous populations.

Our academics

Dr Jonathan Kennedy won an award in the inaugural Global Challenges Teaching Awards, aimed at increasing access to global learning for students on both sides of the Atlantic. This first cohort of six scholars from the US and UK focus on pandemics, climate change and racial justice.

In his new book Pathogenesis, Dr Kennedy argues that "infectious diseases have been the driving forces of human history. Diseases have shaped humanity, from the development of agriculture to the global rise of religion", he says.

of our graduates are in employment or further study 15 months after graduation.

Graduate Outcomes Survey 2019/20

History

The School of History was founded in 1912 to teach history and undertake world-class research. More than a century later, we continue to combine these crucial elements of the historian's craft to develop our expertise about the past, and to understand our current and future responsibilities, through a diverse range of historical periods, figures and outlooks.

Find our degree programmes on **page 79**

Gilt of Cain (abolition to slave trade monument)
City of London

Our two postgraduate degree programmes allow you to specialise in either History or in the History of Political Thought and Intellectual History, a programme that is taught collaboratively with UCL.

Career progression

School of History graduates go on to build successful careers in both the private and public sector, and in national and international organisations. Recent examples include:

- The BBC
- In publishing, at prestigious academic presses like Polity Press
- In finance, for example at BNP Paribas and Ernst & Young
- As political advisors in Westminster and the European Parliament

- Congressional campaigns in the US
- At NGOs like Global Witness
- At nonprofits such as Oxfam and The Center for Global Development
- As researchers
- In teaching

With the skillset that a History programme equips you with, many of our graduates have continued onto PhD programmes or are in academia – both in London and at a variety of other institutions from Oxford and Cambridge, to Berkeley and Yale. These include:

- Dr Signy Gutnick Allen, LSE Fellow in Political Theory and former Associate Lecturer in Political Theory at the University of York (MA History of Political Thought

- and Intellectual History)
- Dr Paul Sagar, Lecturer in Political Theory, King's College London (MA History of Political Thought and Intellectual History)

Collaborative teaching

Our MA History of Political Thought and Intellectual History is an intercollegiate University of London programme jointly administered and awarded by UCL and Queen Mary.

The MA draws on the expertise of staff from the wider University of London, as well as leading academics at Queen Mary.

The programme offers advanced training in intellectual history, the history of political thought and the history of philosophy,

spanning the period from the ancient world to the 21st century.

A unique focus on graduate employability

Our MA History offers an intensive research training programme, which includes the chance to specialise in one of eight historical fields. It also includes a unique internship option,

giving invaluable real-world experience and transferable employability skills through a placement with one of our public history or heritage partners.

The teaching for all MA components, including the dissertation, are completed by early summer, facilitating entry into the summer job market.

Learn more

About the School

About our programmes

Our Alumni

“I found the MA at Queen Mary invaluable for my personal and career development. It is built around a number of innovative elements that challenged me, as a student, to think critically about historiographical debates and learn a huge range of skills. The chance to design my own syllabus was something that was especially enjoyable and intellectually rewarding.”

Soufiane Chetti,
MA History, 2022

History is ranked 7th in the UK for research outputs.

Research Excellence Framework 2021

Languages, Linguistics and Film

The School of Languages, Linguistics and Film explores global culture through five distinct but intrinsically linked areas of academic and research excellence, within a vibrant interdisciplinary environment, creating a multilingual community with deep cultural appreciation and universal impact.

Find our degree programmes
on **page 80**

Our expertise encompasses a distinctive combination of areas including formal linguistics, experimental linguistics and sociolinguistics.

We combine research excellence with an unrivalled commitment to social justice and social mobility. For example, our academics have researched accent bias in job interviews, and have also worked to enhance public understanding of palliative care through film.

Career progression

Graduates have gone on to establish successful careers across a range of industries and sectors:

- As writers and directors
- speech and language therapists in the healthcare sector
- teachers and lecturers in universities.

Our facilities

Home to acclaimed academics and cutting-edge research facilities, our Film department attracts the most exciting filmmakers and thinkers of the day.

We opened BLOC, a brand-new Film and Drama Arts research facility, in 2023. It comprises a 4K cinema with Dolby ATMOS, a gallery equipped for multiscreen projection, a

sound-proofed film studio, a performance project room with interaction and monitoring capability from an adjacent post-production suite, and a sound-proofed recording booth.

All spaces are fully accessible, physically connected, and digitally networked.

Our Linguistics department houses state-of-the-art research facilities including a Phonetics lab, a Language Acquisition lab, and a Postgraduate Research Centre.

Law

We are proud of our reputation as a world-leading postgraduate law school, ranked 7th in the UK by the QS World University Rankings 2023. Part of our School of Law, Queen Mary's Centre for Commercial Law Studies is in London's historic legal centre at Lincoln's Inn Fields.

Find our degree programmes on **pages 80-83**

The Centre for Commercial Law Studies (CCLS) attracts a diverse student body from over one hundred countries.

Our students join us to study a choice of over 20 specialist LLM programmes delivered in London and unique distance learning offerings.

Combining excellence in teaching and research across both commercial and non-commercial disciplines, we strive to be at the forefront of legal scholarship and law reform.

Career progression

Our graduates progress into careers in the UK and around the world, with a large number working as solicitors, barristers, lawyers, legal associates or

paralegals. Others move into finance, regulation, policy, compliance, consultancy, patents and trademarks.

Our dedicated law careers and development team offer employability support to our students during their time at CCLS.

Our mentoring programme matches students with mentors from a range of legal professions, including current and former Lord Justices of Appeal, senior partners and legal professionals at leading firms, including Allen & Overy, Cooley LLP, eBay (UK) Ltd, The Walt Disney Company, Shell, Preiskel & Co, Promontory Financial Group and others. Our award-winning qLegal programme also offers students

the opportunity to gain experience within a working legal clinic providing free legal advice and resources to start-ups and entrepreneurs. Being part of the qLegal programme is not only an excellent way to enhance employability but also forms great networks and life-long friendships for students.

Our research and impact

Through ground-breaking research and advocacy work, our experts help shape policies and practice nationally and internationally.

For example, our pioneering Cloud Legal Project (CLP) was launched in 2009 and undertakes research in complex areas of law and regulation that are essential to the successful

development and use of cloud computing services.

The impact of CLP on industry has been huge. CLP's research covers a wide range of topics, including governance of cloud services, cloud contracts, blockchain technology, data protection and privacy in Africa, cloud robotics, taxation of cloud providers and services and the legal status of online digital assets.

About our programmes

About our qLegal programme

Our Alumni

"Being a student legal advisor at the qLegal pro bono clinic was an insightful experience that helped me a lot in my career and gave me an insight into how businesses operate. It is very rare to see a university giving students the ability to increase their commercial awareness through pro bono clinics. I also had the ability to develop transferable skills such as advocacy and communication skills whilst presenting a webinar. Gaining a deeper understanding of my specialisation helped me develop transferable skills such as commercial awareness that helped my career a lot. Thanks to this experience, the support of professors, and the Careers Team, I was successfully selected to attend an open day at an American law firm in 2020. This year, I was also selected for a competitive mentoring program at a Magic Circle firm that only takes ten people."

Emilia Tambwe Tshomba, LLM International Business Law, 2021

Times Higher Education 2022

Mathematical Sciences

The School of Mathematical Sciences offers a diverse, international community of like-minded, intellectually curious students who use both logic and creativity to solve big 21st-century problems in a unique learning environment.

Find our degree programmes on [page 83](#)

In the School of Mathematical Sciences, we work together to achieve our goals. Feel inspired by our world-leading academics, and gain new experiences such as joining our award-winning Mathematics Society.

Career progression

Our flexible and wide range of abstract and real world programmes from MSc Mathematics to MSc Data Analytics and MSc Financial Mathematics, allows you to shape your own career path. Join our esteemed alumni who have gone on to work in research, and for prestigious organisations such as PwC, Santander, HM Revenue and Customs, Deutsche Bank and the NHS.

Our research

Our School is home to seven research groups, spanning a diverse range of mathematical disciplines from Algebra and Number Theory to Statistics and Data Science.

We are proud of the brilliant breakthroughs our researchers have made in recent years, including combining models of malaria transmission with real-world data to reduce the number of malaria deaths in Sub-Saharan Africa.

Our facilities

With one of the largest academic staff in the UK and our recently refurbished £18m Mathematics building with state-of-the-

art facilities, teaching and study spaces, we invest in our students and provide the perfect environment for them to thrive in.

Our building includes a modern lecture theatre, high quality teaching rooms, private and group study areas, a dedicated learning space for postgraduate students and a computing lab.

Additional Qualifications

In today's open-source, fast-changing digital marketplace, it's the real-world experience that will best prepare students of business and finance for the world that waits.

That's why we offer our Masters students the opportunity to

gain the Bloomberg Market Concepts certification alongside their degree.

Bloomberg Market Concepts is industry-standard software used in the finance sector for the provision and analysis of financial market data and news.

 **Maths Building**
Mile End campus

The course provides an interactive introduction to the financial markets, consisting of three sections - Core Concepts (including four modules - Economic Indicators, Currencies, Fixed Income and Equities), Getting Started on the Terminal and Portfolio Management.

About the School

About our programmes

Our Alumni

"Choosing to join the MSc Data Analytics degree at Queen Mary is one of the best decisions I have made in my life. I came from a psychology background and the course was very maths heavy. But thankfully, the lecturers were incredibly patient with my questions and offered a significant amount of support during office hours. This made my transition very smooth. The content was intellectually stimulating with a good balance of theory and practice. The maths part of the programme was grounded in the context to which it would be applied, which made it much easier to understand the bigger picture. The course not only teaches the technicality of the content, but also teaches you how to think like a mathematician."

Helen Lai,
Artificial Intelligence Scientist
at AstraZeneca,
MSc Data Analytics, 2020

Ranked 12th in the UK.

QS World University
Rankings by Subject 2022

Medicine and Life Sciences

Studying medicine and life sciences at Queen Mary means that you will learn from leading experts, who are at the forefront of medical education and research. We make a real impact on health-related challenges for the benefit of local and global populations while delivering high-quality modern training to our students.

Find our degree programmes on **pages 83-86**

 **Centre of the Cell**
Whitechapel campus

Whether you choose to study on campus or online, our unique educational offering includes subjects across the full spectrum of medical and related disciplines with the flexibility to support you at any stage of your career, so you'll emerge ready to address the health challenges the world faces today.

We are ranked 55th in the world for Medicine in the QS World University Rankings by Subject (2023). We work closely with NHS Trusts, health and life science organisations, and charities to turn our world leading research into real-world impact on people and their health.

In turn these partnerships contribute to teaching, placements and research opportunities for our students.

Our specialist institutes provide dedicated opportunities for collaborative teaching and research, modern facilities, and friendly staff and student communities. Whether you are just starting your career in medicine and life sciences or you're looking for specialist training in your clinical area of expertise, you can take advantage of flexible study options to fit around your professional and personal commitments.

Career progression

94 per cent of our graduates were in employment or study 15 months after graduation (Graduate Outcomes Survey 2019/20). Most are working in medical, health and life sciences sectors, for charities and non-governmental organisations and in government, while some have gone on to further study.

Our research

Our internationally recognised research transforms the lives of people around the world while remaining grounded in our local community.

We tackle global medical problems and improve the health of millions. We're ranked joint 11th in the world for research citations in medicine (QS World University Rankings by Subject 2023).

From the laboratory bench to public health initiatives, we're at the forefront of innovation in medical research, finding solutions to some of the world's greatest health challenges.

Our multidisciplinary approach is fundamental to this. Many of our most successful projects are the result of collaborations between

our institutes and talented researchers across Queen Mary and beyond.

Our experts have found that genes can predict patients' responses to arthritis treatment and pave the way for future drug development; hearing loss and epilepsy are early features of Parkinson's, which could

enable more timely diagnosis and treatment; whole genome sequencing can robustly detect the most common neurological diseases and is set to be adopted as a standard diagnostic tool in clinical practice; and a new approach to traumatic brain injuries could revolutionise patient diagnosis and treatment.

About our the Faculty of Medicine and Dentistry

Our Alumni

"I am the founder of Smileworks, one of the largest independent dental practices in the UK. I finished my MSc in Aesthetic Medicine in 2016 and it has been transformational. The course at Queen Mary was perfect because it's academic and I wanted to support my day-to-day practical work with some academic research. It was ideal for advanced practitioners who know the direction they want to take. I was able to build knowledge through my postgraduate degree whilst working in practice, which was ideal. I learnt things I wouldn't have otherwise, to the huge benefit of my patients. This just wouldn't have been possible without that additional MSc under my belt".

Dr M J Rowland-Warmann,
MSc Aesthetic Medicine,
2016

55th

in the world for Medicine.

QS World University
Rankings by Subject 2023

Physical and Chemical Sciences

Throughout its 100-year history, the School of Physical and Chemical Sciences has brought people together to foster world-changing discoveries. We remain at the forefront of some of the most exciting breakthroughs of the last century, such as the discovery of Proxima b, the closest exoplanet to Earth, and the development of novel 'green' solutions in construction.

Find our degree programmes on **page 86**

 **Observatory**
Mile End campus

Physics

Our portfolio of MSc programmes covers topics ranging from nanoscale and functional materials, through the fundamental properties of the universe to its darkest reaches. You will develop key research and analytical skills that prepare you for your next steps in further research or in your chosen career.

During your MSc, you can take advantage of our collaborations and networks, such as GRADnet. This offers a wide range of advanced physics and professional skills training relevant to postgraduate physicists.

Chemistry

Our MSc Chemical Research is designed by world-renowned academics and provides excellent preparation for PhD

study or a career in the chemical industry. We're proud of the links this programme has to chemical enterprises of all sizes, including AstraZeneca, GSK and Pfizer.

As a research-led programme, you will join an active research group within the School to work on your own project.

Career progression

Our graduates have gone on to pursue PhD study here at Queen Mary, as well as other renowned institutions such as the University of Oxford and New York University. Those who choose a career in industry have progressed to positions including Data Scientist, Programming Analyst and Geophysicist in organisations including HSBC, Tech Alchemy and natural gas companies.

Facilities

Our Physics students benefit from the experimental equipment available in our range of research labs and our own rooftop observatory.

A recent £5.2m investment in our Chemistry Laboratory facilities modernised them to align more closely with commercial labs, as part of our commitment to preparing you for the next steps in your career.

Our research

From pioneering work on the optimisation of drug delivery, to the international collaboration jointly responsible for the Nobel Prize-winning discovery of the Higgs boson, our academic accomplishments capture headlines and showcase the diversity of our expertise across a range of areas in the fields

of physics and chemistry. We played a significant role in the discoveries of W and Z bosons and Proxima b, the closest Earth-like exoplanet to us.

We also played a part in the first 'superstring revolution'. Our vibrant Chemistry Department carries out cutting edge research such as Functional Materials and Nanoscience, Synthesis, Catalysis and Physical and Computational Chemistry.

About the
School

About our
programmes

Our Alumni

"In this role, I combine my passion for physics and technology to solve real-world problems for our clients. We make use of state-of-the-art algorithms and processing techniques to form high resolution images of the subsurface of the Earth. In doing both a BSc and MSc in Astrophysics, it's really taught me how to go about learning. That is, taking new concepts like those I now find in Geophysics, breaking them down into the fundamentals and drawing on my general physics knowledge, researching and reading up where needed to understand and learn about something new. Another key skill which I regularly make use of is coding. Having learnt the fundamentals of Python at university during my research projects has been hugely beneficial. It's allowed me to tackle some otherwise insurmountable problems neatly and quickly using scripts developed on the fly."

Bradley Cooper-Barnard,
Geophysicist at CCG,
MSc Astrophysics, 2019

Three of Queen Mary's
Nobel Prize winners are
linked to Physics.

Politics and International Relations

Study in an outstanding and dynamic research environment. Help tackle the critical issues facing politics today, on a local and global level.

Find our degree programmes on **page 86**

 **Houses of Parliament**
Westminster

The School of Politics and International Relations is home to leading active researchers with diverse interests. From the Middle East to British politics, their expertise is reflected in our high-level teaching across the breadth of our programmes.

From distance learning to campus-based teaching, full time or part time, we offer a range of study modes to suit different schedules across a number of programmes.

Our London location and proximity to Westminster puts

you at the political heart of the UK and provides access to industry experts through our stimulating research seminars and lectures.

Career progression

Our graduates go on to build successful careers in the private and public sector, and in national and international government organisations. Recent examples include Oxfam, Ernst & Young, BNP Paribas, Civil Service, and The Center for Global Development.

As a student here, you'll have the chance to join in with the lively

events delivered by high-profile speakers at the Mile End Institute, a major discussion forum that brings you closer to distinguished figures from the world of politics.

Tailored careers support is available to you via Careers Consultants and Student Employability Advisors for career planning, application and CV writing, interview practice and more.

About the Politics and International Relations Hub

Our Alumni

“I was mesmerised by the teaching staff at Queen Mary and the variety of subjects that I could choose to study. A great choice of social networking events, sports activities, and other events that were available to us, even during the pandemic, brought significant benefits to my life. One of the greatest advantages that I received during my master’s was the support and expertise that was shared with me during my dissertation preparation and submission.”

Vasyliya Bondarenko,
MSc Public Policy MSc, 2021

Ranked 7th in the UK for the excellence of its published work research intensity.

Research Excellence Framework 2021

Supportive learning environment

Our staff have regular ‘office hours’ to discuss student feedback and progress.

Psychology and Mental Health

Studying mental health and psychology at Queen Mary means you will learn from some of the most brilliant minds in the field. Our researchers and clinicians create an exciting grouping of expertise dedicated to psychology and mental health research and excellence in teaching on campus or online.

Find our degree programmes on **page 87**

 Peter Landin Building
Mile End campus

Our Alumni

“What Queen Mary offered in this course is a community of mentors and classmates I could collaborate with and further my career. People are coming from all walks of life and are interested in different ways of looking at the relationship between the arts and mental health.”

Kaeleigh De Silva,
Creative Arts and Mental Health PgDip, 2019

We offer a range of flexible study options at our Whitechapel and Mile End campuses in East London and online taught across two leading departments:

- Wolfson Institute of Population Health delivers research and education to drive improvements in the health of local, national and global populations, identifying the causes and methods of prevention of physical and mental health conditions that lead to poor quality of life and premature death.
- The School of Biological and Behavioural Sciences is one of the UK's leading research departments, with a multi-disciplinary approach to teaching and research. A large and dynamic school with strong links with industry, it offers students a stimulating and supportive learning experience.

Career progression

93 per cent of our psychology and mental health graduates were in employment or study 15 months after graduation (Graduate Outcomes Survey 2019/20). Most are working as medical practitioners, for charities and non-governmental organisations and in government, while some have gone on to further study.

Our research

Our researchers authored a major report on the use of Psychologically Informed Planned Environments in prisons, published by the UK's Ministry of Justice. The report shows that, within prisons, the intervention can lead to improved social and relational functioning. Researchers from the Wolfson Institute and the University of Nottingham undertook

a population-based case-control study of medical records to determine if there was a link between dementia diagnosis and suicide risk.

The results showed that suicide risk was almost seven times higher after diagnosis of young onset dementia in patients aged under 65 compared to patients without dementia. The authors conclude that early recognition and a timely, accurate diagnosis of dementia, coupled with specialist support, are hugely important factors in reducing distress caused by this diagnosis.

Professor Vicky Bird received £7m grant to co-direct a new Global Health Research Centre with partners across Latin America. It will work with communities, particularly indigenous populations, to

develop innovative solutions to improve healthcare for non-communicable diseases including mental health conditions.

Our academics

Dr Mark Freestone works in public and forensic mental health, researching the efficacy of treatments for those at risk of violence or becoming victims of violence.

A Fellow of the Alan Turing Institute, he has consulted on forensic mental health issues for NHS England and the London Violence Reduction Programme, as well as films and television series such as Killing Eve and the Channel 4 prison drama Screw.

Postgraduate Research Programmes

Join a thriving, curiosity-driven community of over 2,000 postgraduate research students. Supervised by academics who are world leaders in their fields, they span a range of thesis topics and shape our understanding of some of the biggest challenges facing the world.

Overview of Postgraduate Research study at Queen Mary

As a Queen Mary postgraduate research student, you will be a member of our Doctoral College, a lively and innovative cross- and inter-disciplinary community of postgraduates and research associates. Working in partnership with different bodies across the university, the Doctoral College ensures our Postgraduate Researchers enjoy the best possible environment to conduct their research.

Research areas at Queen Mary

Queen Mary has over 2000 academic staff working across a wide range of different fields, from searching for extrasolar planets to applying cognitive

approaches to reading French fiction. Our academics are always looking to expand the numbers of Postgraduate Research students with whom they work and are eager to hear from potential applicants.

Entry requirements

Our usual requirement for entry onto the Postgraduate Research programme is a first degree with first or upper second-class honours (or equivalent) and a master's degree (normally at merit or above).

Applying for Postgraduate Research programme at Queen Mary

One of the most important things to do before filling out

an application is to find a good match with a supervisor or existing research group. Most Schools advise that you contact a supervisor via email before applying. To find out more about our supervisors and research areas please visit our Postgraduate Research page.

To learn more about our Postgraduate Research programmes, check entry requirements and find the applications forms please visit our Applying for a PhD page.

Terms and conditions

1. Rules and regulations

The offer of, and acceptance of, a place at Queen Mary University of London (“Queen Mary”) is made on the understanding that you agree to our terms and conditions (qmul.ac.uk/prospective/termsandconditions). These cover, among other things, compliance with our Academic Regulations and related policies, payment of fees, attendance at classes, submission of work, attendance at examinations, student discipline, complaints procedure, freedom of speech and equal opportunities policies. To read the Academic Regulations and related policies, visit arcs.qmul.ac.uk/policy.

2. Changes to our programmes

We will aim to deliver your programme so that it closely matches the way it has been described to you by Queen Mary, especially at the point that you accept your offer. However, it is important to understand that there are circumstances in which we may subsequently change aspects of your programme. Our programmes are delivered within a dynamic, academic community by staff who are actively engaged in research. In this context, we might make changes so that our students can learn from the latest academic research. We also value student feedback and provide regular opportunities for our students to comment on

the content of their programme. We may therefore alter your programme in response to this dialogue with current students. Other circumstances which can lead to changes include: staff changes, which can lead to new modules being offered, modules being withdrawn, or a change to who teaches the programme; changes made in response to new requirements from external professional or statutory bodies; or changes to the way in which universities are funded, which might lead to changes in the availability of some student services, for example. In the unlikely event that we discontinue a programme of study, or change it significantly before it begins, we will inform applicants holding an offer of a place at the earliest opportunity, and will endeavour to offer a suitable alternative programme at Queen Mary. We will also ensure that these changes are reflected on our website as soon as possible.

3. Liability for damage to person or property

Queen Mary does not accept any responsibility or liability for any loss and/or damage to:

- (a) your property, students’ and/or visitors’ property and/or
- (b) any transfer of computer viruses to your equipment, students’ and/or visitors’ equipment unless caused by Queen Mary’s negligence.

- (c) Neither does Queen Mary accept any responsibility or liability for personal injury to you, students and/or visitors caused by their misuse or unauthorised use of Queen Mary equipment, while they are on Queen Mary premises, or engaged in Queen Mary activities.

4. Personal Data

Queen Mary will receive personal data from you in various ways when you submit your application for one of our programmes. This may include special category or criminal convictions data under data protection legislation (the General Data Protection Regulations (Regulation (EU) 2016/679) as implemented by the Data Protection Act 2018 (as amended)).

- 4.1** Your personal data (including any special category personal data) will be held by Queen Mary and may be used by Queen Mary to enable it to fulfil its responsibilities to you.

5. Accuracy of information

Queen Mary has made reasonable efforts to ensure that the information provided in this prospectus is both helpful and accurate at the time of going to print. However, this information is subject to change over time. For this reason, it is important that you check our website for

the most up-to-date information (qmul.ac.uk) or contact us using the details contained within this document.

- 5.1** Applicants are strongly advised to check the course finder on the Queen Mary website for up-to-date entry requirements before submitting their application qmul.ac.uk/postgraduate/coursefinder.

- 5.2** You can read our terms and conditions in full at qmul.ac.uk/prospective/termsandconditions.

6. This prospectus

This prospectus was manufactured using UPM Fine Offset sourced from an ISO 14001 certified mill, where the pulp was bleached using an Elemental Chlorine Free process. The materials followed a Chain-of-Custody scheme, made of materials from well-managed, FSC®-certified forests and other controlled sources.
