About Queen Mary

 **Canalside**
Mile End campus

Welcome to Queen Mary University of London, a Russell Group University like no other. We combine academic excellence with a nurturing and supportive student experience, vibrant city life with the safety of a campus community, and a rich history with a diverse, innovative outlook.

Who we are

Queen Mary has a proud and distinctive history stretching back to 1785 and beyond. From the very beginning, inclusion and social justice have been at the heart of our mission.

Today we are one of the world's leading research-intensive universities, ranked 14th in the world and 5th in the UK for research quality (Times Higher Education World University Rankings 2024).

We are the top University in the country for both social mobility (The Sutton Trust 2021) and public engagement (The National Co-ordinating

Centre for Public Engagement Platinum Watermark). With more than 170 nationalities on our London campuses alone, we are also one of the most diverse universities anywhere.

The London advantage

At Queen Mary, you get the safety and security of campus life while living in one of the most exciting parts of London. Here you will have access to our state-of-the-art facilities, exceptional teaching and dynamic student community. All of our London campuses are well connected, making it easy to explore the city, the UK or even further afield.

Winner of the **University of the Year** award at the UK Social Mobility Awards 2022

Chat to one of our students

Your support network

Our student and academic services help you make the most of your time at Queen Mary. There are people to support you with academic and course-related queries as well as health and personal issues.

Supporting your study

Your Advisor

In your School or Institute, your Advisor is your first point of contact. Usually an academic member of staff, your Advisor's main role is to discuss academic progress, but they can also refer or recommend you to other support services.

Learning support

The Academic Skills Enhancement Service helps students from any taught programme and level of study to achieve academic success at Queen Mary. It supports all aspects of study, including time management, critical thinking and academic writing. Workshops, one-to-one tutorials and drop-ins run throughout the year.

Language Centre

Our students have the opportunity to learn a language alongside their studies, either for credit or as an extracurricular activity. You can choose from Arabic, Bengali, Chinese, French, German, Italian, Japanese and Spanish.

You also have access to a range of extracurricular in-session modules in Academic and Professional Communication, which support your academic success and employment prospects.

PASS

Schemes like our Peer-Assisted Study Support scheme (PASS) allow new students to connect with mentors in other years, helping with the transition to university life. Students can also take advantage of the University Buddy Scheme, as well as more tailored mentoring programmes across Queen Mary.

Supporting your wellbeing

Advice and Counselling Service

Our Advice and Counselling Service offers a range of specialist, professional and confidential services to support students with their finances, welfare, legal issues, emotional and mental health, and other psychological issues.

Disability and Dyslexia Service

Our Disability and Dyslexia Service offers support to all students with disabilities – including specific learning differences like dyslexia and mental health diagnoses – from application right through to graduation.

Students' Union

Academic Advice Service

This service offers advice and representation on a number of academic welfare issues, including applications for extenuating circumstances and appeals.

Student Health Service

You can access our GP-led free healthcare service via the Student Health Service on our Mile End campus. Students living in Queen Mary accommodation at Mile End or Whitechapel – and any students living in the borough of Tower Hamlets – can register with the service.

Sports clubs, societies and volunteering opportunities

Whatever your interests, there is something for you at Queen Mary. With more than 300 student societies and sports clubs, and access to a range of student discounts, there are always opportunities to try something new and meet like-minded people.

Sport

Qmotion is the Students' Union's state-of-the-art sport and fitness centre. Based on our Mile End campus, and covering three floors, the centre holds more than 30 group exercise classes a week, and offers additional services such as personal training, and free personalised training programmes for members.

There are sport and exercise options for every student, and for every level of interest and ability. Taking part in physical activities is a great way to enrich your university experience while improving your physical and mental wellbeing.

Options include:

- Get Active: turn up and play over 15 different sports weekly, pay as you go sessions with no commitment needed.
- Social leagues: there are no-commitment sport leagues happening on or near campus.

- Club sport: compete for the University in any of our 70+ clubs, with matches taking place at our sports ground in Chislehurst, as well as iconic venues such as the Olympic Park.
- Community Foundation: gain qualifications, volunteer and make a difference in the community.
- Talented Athlete Programme: get top-level support to help you towards a dual career.
- Focus Team Programme: get support for your team to help achieve competition success.

Clubs and societies

Joining one of Queen Mary's 300+ clubs or societies is one of the best ways to meet friends and make the most out of your university experience. From art, poetry, Bollywood dance and gaming to politics, history and student media, there's something for everyone – and if you can't find a club to suit your interests, you can start your own.

Volunteering

Get involved in the local community by volunteering alongside other Queen Mary students. Choose from hundreds of one-off, short-term or ongoing opportunities, make new friends, gain valuable skills and experience, and – most importantly – make a difference.

Student voice

Queen Mary Students' Union is your voice as a member of the student body. The Students' Union's mission is to improve students' lives through listening to your feedback and electing students to represent your views.

Learn more

Queen Mary
Students' Union

With its vibrant campus community, Russell Group reputation and programme flexibility, Queen Mary quickly emerged as **Nick's** top choice.

The unique location and campus set-up were a big factor in Nick's decision making. "I always wanted to study and live in London," he says. "I really like that it's a campus University. Everything is in one place, and you're right in the centre of London so get to experience everything the city has to offer."

As well as the benefits of campus and city life, the module flexibility also appealed to Nick. "I was looking for a university that would allow me to study Mathematics without studying Further Maths. I was really attracted to the course and how it was structured – I could personalise the degree to what I wanted to do after graduating."

Nick chose to live on campus in his first year and would recommend it to any prospective students. "Being so close to everything was great, it made it so much easier to meet new people and develop friendships. It was easy to access all the evening activities, such as group and society events."

In fact, one of Nick's favourite things about Queen Mary is the richness of extra-curricular life. "I love music, and the University really supports creative outlets. I'm President of the Music Society and we have put on lots of concerts and collaborations with other groups. There are also always opportunities to

test out groups and activities before you join, so you can try your hand at different things."

Settling in to university life has been easy for Nick, thanks in part to what the School of Maths provides. "We have really cool lecture theatres, and an undergraduate hub which is a great space to work and meet new people. There are spaces for things like learning cafés where you can ask lecturers any questions you have. There are also amazing views across London!"

Nick
BSc Mathematics,
Final year

Student life in London

 **Computer Lab**
Mile End Campus

Our historic campuses provide a safe, welcoming and vibrant place to learn, with state-of-the-art facilities, exceptional teaching and a dynamic student experience – in the best city in the world to study in.

When it comes to world cities, London has it all: history, food, sport, culture, adventure – and countless career opportunities.

East London is one of the most energetic parts of the capital, attracting artists, creatives and tech entrepreneurs from around the world. It's international and bustling – a place where new ideas spring up and exciting things happen. It's also home to some of the best restaurants, nightlife and culture that the city has to offer.

Getting around couldn't be easier. All our London campuses are well connected to the rest of the city, the UK and further afield. From any campus, you're

just a short tube journey from Oxford Circus, Leicester Square, King's Cross, and the rest of London's amazing sights. If you're going abroad, London has fantastic connections to the rest of the world.

What's more, London's cycleways make it easy and safe to cycle to, from, and between our campuses. Cycling is a fun and convenient way to explore the city, including the beautiful parks and canal towpaths close to campus. Our Mile End site is around a 10-minute cycle from the iconic Queen Elizabeth Olympic Park, home to the London Stadium, with the leafy open spaces of the Lee Valley just beyond.

in the world to study in

QS Best Student Cities 2024

170

Over **170 nationalities**
represented on our campuses

Where you'll be studying

East London is a vibrant place where rich history meets the cutting edge of culture and innovation.

From our Mile End and Whitechapel campuses, you're just a short walk from Shoreditch and Brick Lane, where you'll find amazing food, nightlife and a wide array of independent shops and galleries.

When you need a break from the hustle and bustle, there's plenty of green space to enjoy.

From our Mile End campus, a short walk along the tranquil Regent's Canal brings you to Victoria Park. It's one of inner London's largest green spaces and hosts a weekly food market, as well as a line-up of festivals.

Excellent transport links such as Underground, Overground, National Rail and bus services

mean you're never far from the beating heart of London.

A short Tube ride takes you into the City, London's financial hub and home to iconic landmarks like St Paul's Cathedral. A few stops beyond is the West End, London's theatre district, where you'll find attractions like Chinatown and Piccadilly Circus.

Our London campuses

Mile End campus

Mile End campus is home to Humanities and Social Sciences, and Science and Engineering. It offers facilities geared towards an exceptional learning experience including lecture theatres, 24-hour library, cafés, a gym and our canalside. Student accommodation is nearby.

- ☐ Mile End station
- ☐ Stepney Green station

Whitechapel campus

The Whitechapel campus is where most of our medical and dental students are based. It's also home to the Whitechapel Library, the Barts and The London Students' Association, and The Royal London Hospital.

- ☐ Whitechapel station
- ☐ Stepney Green station

Lincoln's Inn Fields campus

The Postgraduate Law Centre at Lincoln's Inn Fields is home to the Centre for Commercial Law Studies. It's located in Holborn, the heart of legal London, and is a base for LLM teaching and postgraduate research law students.

- ☐ Holborn station
- ☐ Chancery Lane station

Charterhouse Square campus

Located near the Barbican, Charterhouse Square is where many of our medical research institutes are based, and home to world-leading researchers. There is also a hall of residence for our medical students.

- ☐ Barbican station
- ☐ Farringdon station

West Smithfield campus

The West Smithfield campus in Farringdon is home to some of our postgraduate medical research students. It includes St Bartholomew's Hospital (Barts), the West Smithfield Medical Library, and some of our medical research facilities.

- ☐ Barbican station
- ☐ Farringdon station

London City Institute of Technology

The Institute specialises in higher technical education and apprenticeships with a focus on STEM subjects.

- ☐ Canning Town station
- ☐ East India station

Department W

Department W is a newly refurbished building located between Mile End and Whitechapel campuses containing office space for our Professional Services staff.

- ☐ Stepney Green station
- ☐ Whitechapel station

Ilford campus

This new dedicated teaching space allows medical students to learn in both a classroom and mock ward environment.

- ☐ Ilford station

Chislehurst Sports Ground

The sports ground in south-east London provides excellent facilities for football, cricket and rugby.

- ☐ Chislehurst station

Accommodation and campus community

At Queen Mary, you benefit from the safety and community feel of campus life, with all the excitement of London right on your doorstep.

A welcoming community

Our campuses are communities in their own right, bringing together students to study and socialise. Our campuses in Mile End, Whitechapel, Charterhouse Square and West Smithfield house almost 3,000 student bedrooms.

There are a range of affordable options across our halls of residence, either on campus or a short distance away. Residential fees start from around £168 per week for a non-ensuite room.

Our experienced team of housing advisors is here to help you make the right accommodation choice, whether you choose to live in halls of residence or an alternative housing option.

Our accommodation guarantee

We guarantee accommodation to all new undergraduate and foundation students, as long as you meet the eligibility criteria on our accommodation webpages.

All our campus accommodation is in self-catered flats, just a few minutes' walk from everything you need to get the best student and education experience. You'll feel at home as part of our friendly community of staff and students.

A peaceful oasis in a busy city

We are the only campus-based Russell Group University in London. Our Mile End campus is unique, providing everything you need to live, learn and get the most out of university.

More information about Mile End can be found in the Our London Campuses section on page 18.

Our halls of residence have a friendly and relaxed atmosphere, surrounded by greenery and attractive outdoor spaces. At times, it's easy to forget that you're living in the heart of a bustling capital city.

You will enjoy being part of a diverse and friendly community, with everything you need right on your doorstep. Campus accommodation is fun, safe and convenient – an affordable way to enjoy London life.

The best teaching and support

Queen Mary is one of the world's leading research universities, which means you'll be learning from leaders in their field.

Underpinned by cutting-edge research

Our innovative teaching is inspired by world-leading research. Our educators work at the forefront of their disciplines, and this directly benefits your learning experience – giving you the knowledge and skills you need to succeed.

Building an inclusive curriculum, together

Queen Mary's aim is to be the most inclusive university of its kind, anywhere. When it comes to our teaching, this means empowering our students to voice their ideas and opinions, and diversifying our curriculum to help you broaden your intellectual horizons.

We aim to acknowledge and address the inequalities in society by including diverse perspectives and identities in our teaching material – so our programmes are exciting, challenging and relevant.

We co-create our approach to education with our students, as we believe their input helps us ensure our programmes are student-centred and our learning environment is inclusive.

The best of in-person and digital education

We continually work with our students to improve our educational offer. The result is an experience that's tailored to you, and makes use of the latest technology to enhance our education approach.

Small active learning groups provide an opportunity to build up a community of practice, and a supportive network with whom to share approaches. Large group and facilitated sessions – such as tutorials, lab work and seminars – are interactive and include learning by doing. Course material will be available online to enable you to learn at your own pace, revisiting material when you want to, while staying in close and easy contact with other students and our world-leading academic staff.

Planning for your future

From day one we help you plan for and build your future career, allowing you to stand out from the crowd and approach the job market with confidence.

Employers are looking for well-rounded graduates with transferable skills, and we can help you develop these through a variety of tailored resources and approaches.

From internships and community volunteering, to studying abroad and learning a new language, these opportunities help you broaden your horizons, develop your skillset, and meet new people from all walks of life.

We're also here to help you decide what path to take after

graduation and give you the tools you need to pursue it. Our Careers and Enterprise team offers a wide range of advice, resources and events to help you find your ideal career, along with practical help with applications and interview preparation.

If you'd like to start your own business or social enterprise, you'll be supported to develop your entrepreneurial mindset. Our high-impact developmental programmes and funding opportunities can help you turn your idea into a reality.

Queen Mary Graduate Attributes

Studying a degree is an investment in your future career. At Queen Mary, we maximise your investment by offering continuous opportunities for skill and knowledge development throughout your journey with us.

Graduate Attributes are the knowledge, skills and behaviours you'll develop as you go through your learning experience. Woven into every aspect of student life, they are designed to enhance your academic and social experience and provide you with the strongest start to your career.

Whether you're honing your negotiation and communication skills through a group assessment, getting to grips with how to use AI to support your research, or growing your understanding of how sustainability relates to your subject area, these are the skills that will help you stand out from the crowd.

We're committed to making sure everyone who studies, works and contributes to Queen Mary gets the most out of their experience. By embedding these attributes throughout your programmes, we are giving you the best possible start to your future.

Inclusive curriculum

At Queen Mary, we are committed to delivering a curriculum that is exciting, challenging and relevant, and acknowledges the diverse voices, perspectives and identities represented within our community.

Our students are the key to understanding what a truly inclusive learning environment looks like. We worked with them to co-create a curriculum that is engaging and enables individuals to thrive while they study with us and in their future careers.

We recognise that to remain relevant and inclusive we must continually adapt the way we teach and interpret the subjects we study.

Questioning the way we do things to support specific learning needs, like assessing the type of module assignments we set, can benefit all.

We encourage students to be open-minded and confident when engaging with contrary perspectives, and responsive to feedback. They graduate with a global outlook and the ability to flourish in multicultural environments locally and around the world.

Because of my inspiring lecturers, I was able to tackle the topics that were of interest to me while getting clear guidance and support from them throughout. The modules included a wide range of interesting topics, so I was able to build a unique path in the field. My peers, who were from diverse backgrounds, were an amazing part of the whole experience bringing so much more knowledge and passion into the classroom."

Farhasaad Shahid,
BA Global Development

Attributes

Starting your career journey

We work with you to give you the guidance, tools and opportunities needed to gain confidence and take your next step. The result? You'll leave us ready to face the future on your terms.

We tailor your development around your schedule and your goals – whether that's an industry placement, a part-time job on or near campus, or starting a business.

Your opportunities from day one

As soon as you join us, you'll have access to the support you need, whether that's a one-to-one appointment, a workshop led by our expert careers consultants, or our comprehensive online resources. You can build up your work experience through our Student Consultancy Project, industry placements, paid internships, starting your own business or social enterprise and more.

We'll also help you find a job to earn money alongside your studies. Flexible work is available either on or off campus through our in-house recruitment agency, and you'll always be paid at least the London Living Wage.

Work while you learn

Industrial or professional experience offers you amazing opportunities to gain crucial skills and make contacts. It's also a great way to put your learning into practice while gaining an insight into your chosen industry.

Our Mile End campus is less than 20 minutes from the City, Canary Wharf, the West End and Tech City, putting you in easy reach of some of the world's most exciting companies.

A Year in Industry will normally take place after your second year of study, but it's not something offered with every programme – so do check your options before you apply.

Many Schools can help you find subject-specific placements, and our Careers and Enterprise team runs an award-winning work experience programme.

My advisors guided me to secure an industrial placement at Rolls-Royce, where I worked as a mechanical engineering intern and had incredible opportunities to learn from industrial experts."

Soham Deshpande,
MEng Mechanical Engineering with Industrial Experience,
5th year

I found an internship at a boarding school in Kent teaching foreign languages, so I've got some experience teaching and am able to think about that as a potential career."

Careers and
Enterprise

Degree apprenticeships

Queen Mary University of London was the first Russell Group University to launch degree apprenticeships. Since then, we have grown our apprenticeship offering alongside our portfolio of excellent employers.

Degree apprenticeships allow you to work as an employee while you study. They give you the opportunity to gain a paid-for degree while getting industry experience and earning a salary in a role of your choice.

There are a variety of ways the apprenticeship is delivered, with most people attending the University on a particular day or block of time.

Not only will you earn a competitive salary throughout the duration of the programme, your tuition fees are fully funded by the government and your employer, meaning you will not need to take out a tuition fee loan.

Current Degree Apprenticeship employers include the BBC, Morgan Stanley, KPMG, Goldman Sachs and the NHS.

We currently offer the following degree apprenticeship programmes at undergraduate level:

- BSc (Econ)(Hons) Applied Finance
- BSc (Hons) Digital and Technology Solutions (Data Analyst)
- BSc (Hons) Digital and Technology Solutions (Software Engineer)

You normally apply directly to an employer or through the National Apprenticeship Service. However, applications for the BSc (Hons) Digital and Technology Solutions (Data Analyst) are made through UCAS. Full details can be found on our website.

Learn more

Degree apprenticeships

Study abroad

Studying abroad is the adventure of a lifetime. You will come away with amazing memories, increased confidence, invaluable life skills and the chance to learn – or improve – a foreign language.

Start planning your adventure

Many of our programmes open up the world to our students via studying abroad. Placements normally last a full year (your third year), though Humanities and Social Sciences degrees offer a study abroad scheme for the first semester of your second or third year. Your final year is spent at Queen Mary.

Queen Mary has exchange agreements with prestigious institutions in over 30 countries, including University of Sydney, Cornell University, University of California, University of Hong Kong and University of Amsterdam.

What's the benefit?

Studying abroad gives you the best of both worlds: a Queen Mary degree and the chance to live in another country – with full access to your host institution's social, academic and cultural life. It's a chance to broaden your horizons, establish your independence, meet new friends from all over the world and gain a global outlook.

What's more, employers actively search for the skills you'll gain by taking part in overseas programmes. These skills include resilience, cross-cultural communication skills, and the ability to adapt to new environments.

Summer Schools and short programmes

At Queen Mary, you'll have the chance to spend one or several weeks during the summer overseas on a language, academic or cultural immersion programme at one of our partner institutions.

Our flexible summer and short-term programmes take place outside the academic calendar and are a great option for students who want to have a short-term experience abroad.

What about money?

Students should be prepared to meet the costs of a study abroad experience. Queen Mary helps students understand their financial situation, so they can make an informed decision on the destination and duration of their programme.

Bursaries and grants are prioritised for students from low-income backgrounds and those who might traditionally be under-represented in higher education.

Over £550k was provided in funding during the 2023/24 academic year.

Help and support

Get help where and when you need it, every step of the way; meet with Queen Mary support teams, attend workshops to help you prepare, and receive ongoing support while abroad.

"If you go abroad, be ready to adapt, to experience things you would never have experienced, to fail, to win, to be uncomfortable and to learn who you are and what your limits are. Going abroad is a great way of getting a sense of who you are because you are actively challenging your comfort zone, reaching outside of it to know where you succeed and where you fail."

How to apply

 **Electronics Lab**
Mile End campus

March – August

Do your research

- Choose your degree programme, check the entry requirements and find out about upcoming in-person and online Open Days: **qmul.ac.uk/undergraduate**
- You can also speak to current Queen Mary students online: **qmul.ac.uk/unibuddy**
- Book a place on our regular campus tours: **qmul.ac.uk/campustours**
- Prepare your Universities and Colleges Admissions Service (UCAS) application.
- Register your UCAS account: **ucas.com/apply**
- Write your personal statement.
- Organise your academic reference.

September – June

Make your application

- Submit your application from early September: **ucas.com** Queen Mary's code is Q50
- Make sure to check the UCAS website for your chosen courses' application deadlines. For example, the deadline to apply for Medicine and Dentistry courses will often be much earlier than other subjects.
- Applications made after all UCAS deadlines have passed will go into Clearing. Please note that not all subjects will go into Clearing.

January – June

Accept your offer

- Decide your firm and insurance choices on UCAS by the deadline. It's always a good idea to confirm as soon as possible.
- Once you have firmly accepted your offer, you can apply for accommodation: **residences.qmul.ac.uk**
- We will write to you after you have accepted your offer to advise you on your next steps.

March to August

- Research courses and attend an Open Day
- Create a university and course shortlist and write your personal statement
- Research bursaries and scholarships

How to apply to Queen Mary

*This information is correct as of January 2024.

Contextual admissions

At Queen Mary, our mission is to create a truly inclusive environment where we support talented students regardless of their educational background or personal experience.

What are contextual offers?

Queen Mary is committed to opening the doors of opportunity and welcoming students from all backgrounds.

We understand that the context or environment in which you study can impact the grades you achieve as well as your opportunity to participate in extra-curricular activities.

To ensure we take this into account when we review your application, we consider a broad range of contextual information provided on your UCAS application form.

By using this information, we are better able to understand your academic potential and ensure we give all applicants an equal opportunity to study with us.

Who is eligible?

Our contextual admissions policy considers a range of factors, such as your social or economic background, the performance of your secondary school or college, and whether you have experience in care.

What will the offer be?

For eligible students, we may adjust our entry requirements by offering a reduced grade threshold for specific programmes.

The reduction will vary depending on your individual circumstances and the programme of study you choose. You can find typical contextual offers, alongside standard grade requirements, on our online course finder.

Learn more

Contextual admissions

Eligibility calculator

Course finder

Student finance, bursaries and support

There is a range of financial support available to students based both in the UK and overseas, including bursaries and scholarships.

Tuition fees for UK students

Queen Mary's tuition fee for UK students starting their course in 2024/25 is £9,250, in line with the Government's policy. Tuition may increase depending on inflation and government policy. Any changes to University fees will be published for individual courses online via the undergraduate course finder.

Most UK students are eligible for the Government's student finance tuition fee loan. If you choose to access it, you do not have to pay your tuition fees upfront.

If you choose to pay your tuition fees upfront, it's important to understand when your payments are due – our tuition fee webpage explains this.

UK Government student finance

The Government's student finance package includes:

- Tuition fee loans (for covering the cost of UK-based university tuition. This is not income-assessed).
- Maintenance loans (to help with the cost of living. This is partly income-assessed).
- Supplementary grants (for students with particular circumstances or needs).

It is advisable to apply as early as possible to Student Finance England (or the equivalent in Wales, Scotland or Northern Ireland), who will determine your eligibility.

International tuition fees

For information about fees and finance for international students, please see page 42.

Queen Mary Bursary

UK students receive the Queen Mary Bursary if they are eligible for Government Student Finance living cost support and have a household income of less than £35,000 per year.

Forty per cent of our UK students receive this Bursary. The amount you receive each year will depend on your household income.

You don't need to apply separately for the Bursary as long as you have applied to your regional student authority for income-assessed UK Government financial support.

Scholarships

We are delighted to introduce a new Global Talent Scholarship worth £3,000 for highly qualified undergraduate offer holders joining us in September 2024. The Scholarship is available to all international students with an offer for an eligible programme, regardless of nationality, who meet the criteria outlined on our website.

We also provide a generous package of scholarships for home and international students. Full details are available on our website.

Advice and support

The Advice and Counselling Service provides confidential advice about your eligibility for funding, planning your budget, applying for student finance, and other financial and practical issues. You can contact us at any time before or during your studies. We particularly encourage care experienced students and students who do not have family contact (estranged) to contact us before starting their course.

Financial Assistance Fund

The Financial Assistance Fund can help any student with living costs and unexpected financial emergencies. You do not have to repay an award from the Fund. Applications will be carefully assessed and means-tested to help eligible students through financial hardship. We also provide an alumni discount to any student who continues their studies with us at post-graduate level.

Living costs

If you need help budgeting as a student, we are here to provide support and guidance. Find out more by visiting our Money and Practical Advice webpages or speaking to one of our Advisors.

The information in this section is correct as of January 2024. For the latest information, please use the QR codes below.

International student admissions

With more than 170 nationalities on our campuses, Queen Mary is proud to welcome students from all over the world.

After accepting your offer from Queen Mary, you'll receive communications from us about applying for your accommodation and preparing for life in London. Once you've met your offer conditions and your offer status is changed to 'unconditional', we will provide information about applying for a visa, if needed. This normally happens up to three months before you are due to start your programme, although you can apply six months before your programme's start date.

Entry qualifications

We consider many different qualifications for entry. You can find out if the qualifications you are taking will be considered on our country-specific admissions webpages. English language requirements can be found on the course finder or on the international student webpages.

Making an application

Undergraduate applications are made via UCAS, through which

you can apply for up to five degree programmes.

Foundation programmes

If you're not ready for undergraduate study, we offer a range of foundation programmes to prepare you for degree level study. See page 48 for more information.

Tuition fees

Most international students pay overseas tuition fees. Find out more on our international students' webpages.

Scholarships and bursaries

We understand that studying at university – especially in another country – is a big investment personally and financially.

We also believe that education is for everyone, which is why we offer a variety of scholarships and bursaries to help the brightest undergraduate students join Queen Mary, including the Global Talent Scholarship.

You can search by country and academic school on our website.

Student visa application

Most international students will need to apply for student immigration permission to study in the UK. You can apply for your student visa up to six months before your course start date, from the country where you are living. You can also prepare your supporting documents in advance, including evidence of your funds if required.

Our guide to applying for student immigration permission explains what you need to complete and the required format of the evidence of your funds.

Before you arrive

Queen Mary staff are on hand to speak with applicants both in person in over 50 countries annually, or online via individual calls and webinars at the pre- and post-application stage.

1

Check and prepare the documents and requirements for your visa application.

2

Once we've confirmed your details, we'll release your Certificate of Acceptance of Study (CAS).

3

Student visa processing takes at least three weeks, but could take longer in busy periods.

4

Once your visa is secured, start looking at flights to London and preparing for your studies.

5

Enrol online and arrive in London in September to join Welcome Week and your academic induction programme.

Applying for student immigration permission

Sened
LLB Law,
Second year

Sened was after "the best of both worlds" – a university that combined community with a first-rate education.

"I wanted to attend a university where I felt included. A university where I felt supported and cared for," Sened explains. After completing her foundation year at a different institution, Sened made the move to Queen Mary – and has never looked back.

"The law school here has a great reputation, and of course Queen Mary is part of the Russell Group." Inclusivity and representation are also incredibly important to her. "I struggled at my original university, but I'm very happy here – largely due to the diverse student population."

Sened has found it's easy to thrive at Queen Mary thanks to the support and opportunities on offer. "I've joined the Legal Advice Centre – a pro bono service. My teachers are all experts in their field and respected within the industry. Every week we receive career emails with opportunities, and every week there is something I'm interested in. Studying law at university has transformed my whole way of thinking."

In addition to professional development, Sened has embraced the social side of campus life. "I play football for the women's football team, an

amazing way to make friends. I am also part of the Queen Mary African and Caribbean Society as I wanted to be in touch with my African heritage and culture. There is a society for anything and everything!"

Then there's Queen Mary's London location, which Sened describes as "the best city in the world to be a student" with all it has to offer. But what makes Queen Mary truly special for her is the unique set-up. "You also have the campus experience which I think is so important as a student – it gives you a real sense of safety and security."

Foundation programmes

Our foundation programmes are designed to equip ambitious students with the skills and experience they need to progress on to an undergraduate degree. The programmes are all taught by Queen Mary academics on our unique campuses in East London, which are home to students from more than 170 nationalities.

Foundation programmes

Our foundation courses offer students an alternative route into Queen Mary's undergraduate programmes. Available in a wide range of subject areas, our foundation programmes give you the subject-specific knowledge and academic study skills required to progress on to an undergraduate degree at Queen Mary or elsewhere.

During your programme, you will have full access to all student facilities, including welfare, social and sports facilities and the library.

We provide academic and personal support to prepare you for undergraduate degree studies. The courses are designed to help you gain the study skills required to progress on to an undergraduate degree at Queen Mary or elsewhere.

Our programmes

Please check our website to find out more about foundation programmes for Home students.

International Foundation Year pathways

Humanities and Social Sciences

- Business and Management
- Economics and Finance
- English Literature, Film and Drama
- Geography and Development
- Law (entry to the School of Law is unavailable if you have taken a qualification that could allow you to gain direct entry with the required grades)
- Politics and International Relations

Science and Engineering

- Biological Science
- Chemical Science
- Electrical Engineering
- Engineering
- Mathematics
- Materials Science
- Physics

Medicine and Dentistry

- Certificate in Clinical Foundation Studies

Please note that if you have completed the majority of your secondary school education in the UK, you may not be eligible for entry to some of the programmes.

Our foundation programmes

International Foundation Year

Biological and Biomedical Sciences

Our programmes span all biological and biomedical sciences, from the study of whole organisms to genetics and molecular biology.

Our programmes

Our programmes cover a wide range of areas and interests, whether that be medical, environmental or molecular.

For those with an interest in medical aspects of the subject area, we have programmes like Biomedical Sciences, Medical Genetics and Neuroscience. If you're interested in ecology or conservation, our Zoology programme focuses on the underlying concepts that shape our understanding of animal diversity.

Or for those more interested in the molecular side of biological science we have Biochemistry,

which combines the study of molecular biology and chemistry. All of our programmes offer the opportunity to gain a global perspective by undertaking a Year Abroad.

Where can studying Biological and Biomedical Sciences take you?

Studying one of our programmes will open up opportunities within a range of fields, including medical, scientific and research careers. You might also decide to undertake further study, developing the skills and knowledge you acquire throughout your undergraduate modules.

About our programmes

91%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

The highlight of my course has been the practical lab sessions. They have really helped bring the course to life! I recently went on a field trip to AstraZeneca with the Queen Mary William Harvey Research Institute Society and feel the scientific skills I have learnt throughout the course have helped prepare me for a lab-based career."

Shaumiyah Manivannan,
BSc Pharmacology and
Innovative Therapeutics,
2025

Learn more

For other courses related to this discipline, please see pages 78–79.

Business and Management

Our Business and Management programmes are designed to create responsible future leaders. Many of our degrees are professionally accredited, giving you a head start in your chosen career.

Our programmes

Our teaching is underpinned by the values of social justice, sustainability and good governance. We invite our students to ask incisive questions, to challenge their assumptions, and to search for solutions to real-world business challenges.

You'll learn from internationally acclaimed experts in their fields, who teach students to think beyond textbooks, management fads and overly simplistic formulas for success.

Our undergraduate programmes are diverse, covering accounting, finance, human resources, international business, marketing, management and social change.

Where can studying Business and Management take you?

Our graduates are highly sought after by industry leaders, and our location close to the financial heart of the UK puts you in easy reach of some of the world's most exciting organisations. Recent graduates have gone on to work for Amazon, Deloitte, ITV, PwC and Salesforce.

Our alumni have also gone on to start their own charities: Bilal Bin Saqib (BSc Business Management, 2011) founded Tayaba, a non-profit organisation that has changed the lives of more than 20,000 people living in water-deprived communities.

For other courses related to this discipline, please see pages 79–80.

About our programmes

#12

Our research is ranked 12th in the UK for impact

Research Excellence Framework 2021

I've had a chance to explore accounting, finance, statistics, marketing, entrepreneurship and human resource management. I've been able to take part in SBM-only events and projects – such as consultancy projects and various guest lectures – as well as access paid work opportunities within the School."

Laura Stanculescu,
BSc Business Management,
2022

Chemical Sciences

Our Chemistry and Pharmaceutical Chemistry programmes are accredited by the Royal Society of Chemistry. You'll be taught by senior academics in physical, computational, organic and inorganic chemistry.

Our programmes

At Queen Mary, we're proud of our vibrant research culture and ensure that every new discovery informs our taught courses.

Our Chemistry and Pharmaceutical Chemistry programmes are taught in the Joseph Priestley Building, which has benefited from a £5.2m investment in a new undergraduate teaching lab. The design itself is similar to commercial laboratories, preparing students for the next stage of their careers.

A Year in Industry offers students work experience in a real-world setting and a fantastic chance to practise and hone their skills, and because of our

Royal Society of Chemistry (RSC) accreditation, Chemistry and Pharmaceutical Chemistry graduates gain Associate Member of the RSC status.

Where can studying Chemical Sciences take you?

Our graduates often work in a range of sectors, including clinical and laboratory work, media, technology and finance. Many also move on to postgraduate study.

Recent employers have included GlaxoSmithKline, Boots UK, Hammersmith Medicines Research, St George's University Hospitals NHS Foundation Trust and KPMG.

About our programmes

95%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

“

My chemistry degree helps me expand my knowledge not just in the chemistry field but also to explore the physical and mathematical side. It causes me to push myself as an individual due to the diverse nature of the course itself."

Nishma Thakor,
BSc Chemistry with a
Year in Industry,
2020

For other courses related to this discipline, please see pages 80–81.

Comparative Literature

At Queen Mary, you'll study literature in translation from a huge variety of countries, cultures and periods, relating to everything from history, psychology and philosophy to painting, film and music.

Our programmes

Studying comparative literature expands your literary and cultural horizons while helping you develop an impressive set of transferable skills, including analytical ability, highly sophisticated reading and presentation skills and the ability to put things in context.

Our choice of modules lets you discover modern fairy tales, postmodern novels and short stories from around the world. In addition, you can study modules in modern languages, film studies and linguistics, or modules from other humanities.

Comparative literature can also be studied jointly with a modern language (French, German, Hispanic Studies or Russian), or with linguistics or film studies. These combinations allow

you to approach similar topics from two distinct angles, using the knowledge and skills from one subject to deepen your appreciation of the other.

Where can studying Comparative Literature take you?

Our graduates go on to enjoy a wide variety of careers. Some apply their degree knowledge directly by working in the arts, media or PR. Others take up roles in editing and copywriting, publishing, banking, corporate services, governance assistance and event management.

Our graduates' writing skills are also highly sought after in many other sectors such as journalism, advertising, marketing and professions such as law (via the Solicitors Qualifying Examination) and teaching.

About our programmes

50

Ranked top 50 in the world for English Language and Literature

QS World University Rankings by Subject 2024

“

With Comparative Literature there was so much to draw upon, and taking myself away into the library and discovering all of that was amazing. Another highlight was the people, and some of my great friends were on that course with me."

Francesca Pearce,
BA Comparative Literature,
2018

Learn more

For other courses related to this discipline, please see page 81.

Computer Science and AI

Our programmes are shaped by our outstanding industry connections, ensuring you graduate with a degree that could take you anywhere. You'll be taught by research-leading academics that support you in becoming the industry leader of tomorrow.

Our programmes

All our degrees offer a wide range of modules and dedicated student support. You'll study a broad curriculum to equip you with a solid grounding in your discipline. In your final year, you'll apply your knowledge, skills and experience to a large-scale project, allowing you to put what you have learnt into practice.

Our sector-leading research and industry collaborations shape our degree programmes, which are taught using cutting-edge tools and techniques that will prepare you for your career. Our partnerships with employers

shape our research and teaching, and many of our degrees are professionally accredited

Where can studying Computer Science and AI take you?

One of the most exciting parts of computer science is the growth of new fields and sectors you might not have heard of just a few years ago.

Our students graduate with a strong skillset, ready to adapt to changes and opportunities. Recent graduates have gone on to work for Google, IBM, TikTok, the NHS, eBay and Goldman Sachs.

About our programmes

#8

Ranked 8th in the UK for Computer Science

Times Higher Education Rankings by Subject 2024

The thing I like most about my course is the breadth of topics that it covers. Additionally, students are supported and encouraged to do their own reading and study, to pursue knowledge in areas where passion for your subject can thrive and grow."

Paul,
BSc Computer Science
with a Year in Industry,
2023

Learn more

Dentistry

Studying in the capital means being at the forefront of modern dentistry. Providing oral healthcare in a hugely busy and diverse city gives you unparalleled opportunities to learn.

Our programmes

Situated in Whitechapel next to The Royal London Hospital – one of the capital's leading trauma and emergency care centres and home to London's Air Ambulance – Queen Mary's Faculty of Medicine and Dentistry is perfectly located.

The Institute of Dentistry at Queen Mary – the first new dental school to be built in the UK for more than 40 years – houses state-of-the-art facilities and follows an innovative curriculum.

Where can studying Dentistry take you?

Our BDS Dentistry graduates have an enviable employment

record, with 97 per cent of those in employment going on to highly skilled jobs or further study (Graduate Outcomes Survey 2020/21).

Most of our BDS graduates typically work as dental foundation trainees, after which they either remain in the NHS or move into the private sector as dentists. A number of our graduates also work as dental practitioners in hospitals or in the community, with some working overseas.

Our BSc in Oral Health will enable registration with the General Dental Council as both a dental hygienist and a dental therapist.

About our programmes

#15

Ranked 15th in the world for dentistry

QS World University Rankings by Subject 2023

Studying dentistry is a lot of fun – there are new things to learn every day, interacting with patients or learning in the lab. What I most enjoy about studying here is how friendly people are. Staff and students in my year and older years are always willing to help."

Shraddha Sheth,
BDS Dentistry,
2026

Learn more

For other courses related to this discipline, please see page 83.

Drama

At Queen Mary you will be taught by world leading academics and artists. Drama was ranked first in the 2021 Research Excellence Framework, and our research informs our teaching of the practice, history and theory of theatre and performance.

Our programmes

Drama changes lives. Our programme immerses students in theatre and performance from a variety of cultures and historical periods – across plays, theatre, live art, applied and socially engaged performance, and new media.

We develop practical and theoretical knowledge and expertise about performance, its histories, how it intervenes in the present, how it might affect the future, and how it can be used in different settings – theatres, art galleries and museums, schools, prisons, warehouses, and the street – in the UK and internationally. We draw on London's rich resources, from visiting the West End, to exploring the heritage of East End music halls, to making audio walks with local communities.

Learn more

For other courses related to this discipline, please see page 84.

Where can studying Drama take you?

Our graduates are critically and creatively informed, ready to pursue employment and further training in the arts and beyond.

Drama graduates go on to work in a variety of roles, including performing, programming and producing. They work in sectors as varied as the arts, entrepreneurship, law, media, publishing, education, social work, TV production and charities.

Recent drama graduates work for companies including the National Theatre, Shakespeare's Globe, the BBC, Greenwich and Docklands International Festivals, Capital Radio and The Prince's Trust.

About our programmes

#6

Ranked 6th in the UK

Times Good University Guide 2023

Drama at Queen Mary has changed my perspective of what performance can be and the impact it has in a wider context."

**Emma Howes,
BA Film and Drama,
2023**

Economics and Finance

You'll be given the tools and opportunities you need to succeed in your chosen career. We're located close to London's financial districts in the City and Canary Wharf, and you'll benefit from our links with leading names in banking and finance.

Our programmes

We offer a broad curriculum, providing a solid foundation in the three core areas of economics: microeconomics, macroeconomics and quantitative analysis, as well as finance.

You can combine our degrees with an Integrated Foundation Year, a Year Abroad, or a Year in Industry, and all of our finance degrees are accredited by the Chartered Financial Analysts Society. This means that our graduates can take Investment Management Certificate professional qualifications without having to complete a further two years of study.

We're one of the few UK universities to offer access to Bloomberg trading terminals in our designated trading room,

as well as an Interactive Brokers Trader Workstation and FXCM Forex Trading Station, as used by economists. You'll also benefit from access to the major statistical databases and software packages.

Where can studying Economics and Finance take you?

Our graduates find employment in a broad range of financial services companies including J.P. Morgan, Barclays and Deloitte, as well as interesting non-financial roles such as Civil Service graduate schemes.

Our dedicated careers advisors provide one-to-one support, practice interviews, CV checks and entrepreneur advice that's available throughout your studies. Additionally, we invite a wide variety of employers on to campus for exclusive financial events.

Learn more

For other courses related to this discipline, please see pages 84–87.

About our programmes

100

Ranked top 100 in the world for Economics and Econometrics

QS World University Rankings by Subject 2023

The University laid solid foundations for my career – helping me to augment my theoretical knowledge through practical modules such as econometrics and develop subject-related skillsets that remain pivotal in my current job."

**Namrata Halder,
Associate PwC,
BSc Economics and Finance,
2021**

Engineering

Our degree programmes address the global challenges facing society, and how your future in engineering can tackle these.

Our programmes

We teach students how engineering theory is applied in real situations, and how engineering principles can be used to solve current issues.

Our practical approach helps to bring engineering concepts to life, placing student-centred learning, plus design, build and testing exercises at the heart of our programmes.

From your first year, you'll build a strong foundation in fundamental engineering concepts such as fluid mechanics, design, materials and mathematical modelling, while being introduced to chosen specialisms through our Explore Engineering modules.

We've invested more than £30m in refurbishing and expanding our engineering labs, with

continual investment planned, to ensure that our students have access to state-of-the-art facilities.

Our curriculum has been informed by students and employers from our Industrial Advisory Board.

Where can studying Engineering take you?

An engineering degree offers exciting career prospects, with engineering and manufacturing industries in the UK and across the world expected to expand even further over the next decade.

Recent graduates of our programmes have gone on to work for companies including British Airways, Jaguar Land Rover, Procter & Gamble, IBM, the NHS, Vodafone and Crossrail.

About our programmes

#2

Ranked 2nd for research outputs in the field of engineering

Research Excellence Framework 2021

“

My programme has been an ideal blend of biology, medicine and engineering concepts. The curriculum has allowed me to work on projects at the intersection of healthcare and technology, from designing medical devices to analysing biological data. The professors have extensive expertise, and I have been able to get hands-on experience in labs with equipment like ECGs, ultrasound imaging and CAD software.”

Balvinder Dhillon,
MEng Biomedical Engineering,
2023

For other courses related to this discipline, please see pages 88–89.

English

We're dedicated to the broadest and most inclusive vision of English studies. You'll expand your critical skills through innovative approaches to cultures and periods, from early modern texts to today's writing.

Our programmes

Our exciting BA English programme will teach you how to read and interpret texts from a wide range of periods, places and genres, and to understand them in their historical, political and cultural contexts.

You'll gain a grounding in the critical and theoretical approaches that have shaped English literature in recent years. Our teaching takes an interdisciplinary approach: you'll discover how philosophy, psychology and other disciplines can enrich our understanding of literary works.

Based in the heart of London, the English department has a world-class reputation and an impressive range of expertise and choice of modules. From medieval epics and Renaissance literary culture to cutting-edge contemporary fiction and

everything in between, there are opportunities to personalise your English degree and study the topics that most interest you.

Where can studying English take you?

Our graduates go on to work in all sorts of sectors, including law, teaching, publishing, media and communications, marketing, and arts and heritage.

Some of our most well-known alumni include the authors Sarah Waters, Caleb Femi, Gabriel Krauze, JG Ballard and Conn Iggulden, the TV comedy writer James Lamont, and the broadcaster Adrian Chiles.

Recent graduates work for HarperCollins, Historic Royal Palaces, The Independent, London & Partners, Penguin Random House and Shakespeare's Globe.

For other courses related to this discipline, please see page 90.

About our programmes

#10

Ranked 10th in the UK for graduate prospect outcomes

Complete University Guide 2024

“

Studying English Literature at Queen Mary was exciting because there's such a colourful range of modules to choose from. It really enlightened my view of the world and gave me the skills that helped me secure my role as a reporter.”

Sawdah Bhaimiya,
BA English,
2021

Environmental Science

You will learn about physical and ecological processes behind global emergencies like climate change, biodiversity loss and environmental degradation. You will then explore novel management and policy interventions to mitigate environmental risks and restore damaged ecosystems.

Our programmes

You will develop a strong base of scientific knowledge and choose specialist topics tailored to your own interests and career goals. From climate change and conservation to environmental engineering, ecology and evolution, our modules will develop your understanding of society's most pressing challenges.

Thanks to our local, national and international connections, you can apply your knowledge to real-world problems, working with community groups, environmental trusts and charities to make a positive change.

All our degrees have a four-year version that includes

a full Year Abroad, allowing you to study at a prestigious partner university and immerse yourself in a different culture.

Where can studying Environmental Science take you?

A degree in environmental science will provide you with a unique range of skills, including data collection and evaluation, laboratory analysis, independent field research, project management, teamwork and communication.

Our graduates have gone on to work as environmental consultants, sustainability analysts, geomorphologists and science communicators.

About our programmes

100%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

I chose Queen Mary as I wanted to be at the forefront of research in the environmental field and studying environmental science in the capital city has proved to be invaluable."

William Flynn, BSc Environmental Science, 2018

Learn more

For other courses related to this discipline, please see page 91.

Film Studies

At Queen Mary, you'll learn from filmmakers and academics at the cutting edge of their field. You'll explore the history and theory of the cinema, while also learning the technical and practical aspects of film production.

Our programmes

Our practical modules introduce you to the creative and technical skills required for scriptwriting, production managing, directing and editing.

The department houses facilities including a state-of-the-art cinema, a film production suite, two film studios with professional lighting grids, two edit suites and motion capture equipment.

Film studies' mixture of theory, practice, history and languages makes it a natural partner for several subjects. You may choose to study it jointly with comparative literature, drama, English, French, German, Hispanic Studies or Russian.

Where can studying Film Studies take you?

Film studies prepares you for careers in film, television and the creative arts, or you can continue in academic study.

You'll graduate with an excellent knowledge base and a range of transferable analytical, research and communication skills.

Graduates have found work as artistic and film directors, cinematographers, digital editors, dubbing coordinators, short film producers and post-production runners, with companies such as Equinox Film and TV Production, SALT. TV, Walks of Life Films, Pocket Blockbuster and Fremantle.

About our programmes

#9

Ranked 9th in the UK

Research Excellence Framework 2021

I had a great time studying film at Queen Mary. I loved that there was a challenging mix of theory, history and film practice to get your teeth into. I especially enjoyed the filmmaking aspect, working with real actors and budgets and learning to be professional in that environment helped me prepare for the real world."

Suzie, BA Film Studies, 2017

Learn more

For other courses related to this discipline, please see pages 91–92.

Geography

Geography's unique concern with how our social and physical environments interact puts it at the forefront of many pressing global challenges including climate change, sustainable development, international migration and global health.

Our programmes

Our modules explore the critical challenges of our time: you could study globalisation and international development as well as climate change and environmental management.

As such, you will graduate with a well-rounded knowledge of the social, political, economic and environmental processes that shape the world around you.

We offer exceptional laboratory facilities and a range of exciting fieldwork opportunities*, allowing you to apply knowledge from the classroom in real-world settings.

Where can studying Geography take you?

Geography gives you a unique range of subject-specific and transferable skills, including data collection and analysis, the interpretation and evaluation of complex ideas and evidence, and individual and group project management.

Many of our graduates use their subject knowledge directly in environmental policy, town or transport planning, or geographical information systems. Others take their transferable skills into other careers, from business to health. Recent graduate destinations include Deloitte, KPMG, the Environment Agency and the United Nations.

About our programmes

#17

Ranked 17th in the UK for Geography

QS World University Rankings by Subject 2023

“

My favourite part about my degree is how practical it is, with frequent field trips and weekly lab and practical classes. It's not just sitting in a lecture hall all week. Although I commute to Queen Mary from my home in Kent the School has been so understanding and accommodating."

Millie,
BSc Geography
2023

*Fieldwork destinations and opportunities may vary year-on-year and are subject to change and discontinuation.

Learn more

For other courses related to this discipline, please see page 92.

Global Development

Combining insights from across the humanities and social sciences, you will explore social, economic, political and cultural change across the Global South.

Our programmes

Our BA Global Development examines pressing development issues, from social inequalities and climate change to gender and race, through an innovative interdisciplinary programme.

As well as studying the social science theories and methods needed to understand development challenges from different perspectives, you will learn about different languages and cultures to challenge the common use of Western historical experiences as the universal templates against which the rest of the world is understood.

You will be equipped for your career through first-hand

experience of debating development in both theory and practice, conducting original fieldwork and engaging with global policy actors. You can study a four-year version of BA Global Development that includes a full Year Abroad.

Where can studying Global Development take you?

A degree in global development will provide you with a number of transferable and sought after skills that will prepare you for a career in a wide range of sectors.

Our graduates progress into careers including development consultancy, NGOs or development agencies and project management in the public and third sector.

Learn more

For other courses related to this discipline, please see page 92.

About our programmes

91%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

“

My journey at Queen Mary University has been wonderful. Global development studies have shaped my academic approach to matters pertaining to our global landscape. It has always been my dream to find work in not-for-profit organisations ie, United Nations, or UNICEF – organisations that champion humanitarian matters."

Elizabeth,
MA Global Development,
2023

History

Our exceptional choice of modules means you can construct a degree that's tailored to your interests. As a result, our undergraduate historians are consistently among the most satisfied in the prestigious Russell Group.

Our programmes

At Queen Mary, you'll experience the real benefits of studying history in London. Key historical sites, museums and archives are just a short journey away. Our students and staff work together to develop their expertise about the past and understand their responsibilities to the present and the future, through study of an increasingly diverse range of historical periods, figures and outlooks.

Our modules cover topics spanning continents and millennia, so our students can pursue their passions while continuing to explore new areas of history. You'll get one-to-one supervision with an academic Advisor, and this support will remain with you until your final-year dissertation.

Where can studying History take you?

Studying history allows you to keep your options open: you'll explore existing passions while developing key writing, presentation and analytical skills.

The broad range of skills acquired by studying history, coupled with extracurricular opportunities, prepares you for success in a diverse range of careers.

History graduates can apply their knowledge directly to careers in museums, education or the arts and heritage sector. Other less traditional career pathways include media, law, public relations, public affairs and business.

About our programmes

92%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

The biggest factor that pushed me to study at the School of History at Queen Mary University was the huge variety of modules available to choose from. It meant that I had a chance to explore areas of history that I had not yet had a chance to or even knew existed."

Anita Doda,
BA History,
2023

Learn more

For other courses related to this discipline, please see page 93.

Law

Our expert academics will support you to achieve your goals by combining rigorous knowledge and practical skills. This is enhanced by projects that enable you to experience law in a professional context.

Our programmes

In addition to our LLB Law programme, we offer several undergraduate law programmes, including the UK's first Law and Climate Justice LLB.

Extracurricular opportunities include our award-winning Legal Advice Centre, which provides free legal advice to the public and Queen Mary staff and students, and the George Hinde Moot Competition. These opportunities are unique to Queen Mary students, and allow you to gain valuable experience and put your knowledge into practice.

Where can studying Law take you?

There are multiple career paths available to law graduates. Many of our graduates have progressed to qualify and practise as solicitors and barristers in England and Wales, as well as other jurisdictions.

Our alumni have also gone on to roles in a broad range of professions, such as compliance and regulation, the public sector, legal publishing, financial services, journalism, policy, NGOs and charitable bodies.

About our programmes

90%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

The most valuable thing about studying law at Queen Mary is the friendliness, responsiveness and help offered by professors and tutors. You never feel like you are struggling, there is always someone to lend a hand."

Nada Zarkal,
English and French Law LLB,
2023

Learn more

For other courses related to this discipline, please see pages 93–94.

Liberal Arts

Studying Liberal Arts allows you to explore areas across the humanities and social sciences. Specialise in areas that interest you most, and gain a wide-variety of skills.

Our programmes

The concept of the liberal arts stretches back centuries, focusing on what underpins active and effective citizenship.

You'll choose what to study from a wide array of options, and you can explore languages, film, history, geography, English, drama, politics and international relations and more.

All of our liberal arts students study a language in their first year to help develop broad cultural awareness, improve linguistic skills and learn to connect across cultures.

Where can studying Liberal Arts take you?

Liberal arts students develop a transferable skill set, which is more important than ever. They master data gathering and analysis, independent reflection, communication, judgement and international awareness. These skills are highly valued by employers and open up a wide range of options across the private, public and third sectors.

Curating your own studies ensures that you follow your passions, and presents fulfilling opportunities to engage with new challenges and develop your independence. You can also take advantage of our Year in Industry to develop practical experience in the workplace as part of your studies.

About our programmes

#5

Ranked 5th in London for Arts and Humanities

QS World University Rankings by Subject 2023

My favorite aspect is the interdisciplinarity of it, how much choice I have to explore all my interests. I like especially that one term I can have film, literature and language classes and another term history and politics classes."

Rosa,
BA Liberal Arts,
2023

Linguistics

Our Department of Linguistics is one of the largest in the UK and is exceptionally broad-based. You'll be taught by experts and leaders in their fields, seeing how linguistics applies to the real world.

Our programmes

Our research and teaching cover the major branches of linguistics: formal syntax and semantics, experimental linguistics, and sociolinguistics, including gender and media linguistics.

You might find yourself studying a little-known language such as Fijian with a native speaker, collecting data on changing London English, designing an experiment to measure phonological perception in bilingual children, or selecting features for a language of your own in a module on language construction.

Our Department of Linguistics is one of the largest in the UK and is exceptionally broad-based. Joint programmes involving

a modern language include a required Year Abroad, and all linguistics students may choose to take a Year Abroad as part of their degree.

Where can studying Linguistics take you?

Because linguistics combines natural sciences, social sciences and humanities, our graduates are employed in many different sectors.

Recent graduates have gone on to work in software, consulting, research, marketing, social media, translation and localisation, and journalism. Employers of our graduates include BBC London, the Cabinet Office, Teach First and RandomStorm.

For other courses related to this discipline, please see pages 94–95.

About our programmes

100%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

I chose Queen Mary because of its excellent track record of fantastic achievements along with its state-of-the-art linguistic research facilities such as ultrasound imaging, eye-tracking, EEG (full faraday cage) and sound-proof recording, all allowing students to pursue their research confidently feeling assured that they have the best equipment at their disposal."

Alnasim,
BA Linguistics,
2022

Materials Science

We are proud to have made history as the first materials science department in the UK, and we strive to continue our tradition of excellence in the present day.

Our programmes

Our materials science programme enables you to study the structure and properties of materials, plus the processes of manufacturing them, to prepare you to design and develop new and improved materials in the future.

Our practical approach places student-centred learning, laboratory work, case studies and testing exercises at the heart of our programmes.

From your first year, you'll explore how materials engineering interacts with other types of engineering. Modules in design and experimental practice will help you to develop the skills needed to become a materials engineer, and put the theory you have learnt into perspective.

We've invested more than £30m in refurbishing and expanding our

engineering labs, with continual investment planned, to ensure that our students have access to state-of-the-art facilities.

Where can studying Materials Science take you?

Materials science offers a multitude of exciting, challenging and rewarding career options.

You could work in a range of industries where materials are used, including the automotive, aerospace and renewable energy sectors, as well as working with medical devices, consumer products or pioneering the development of new materials as a researcher.

Recent graduates of this programme are now working at companies such as Accenture, Capgemini Invent, FDM Group and Bonham & Brook Ltd.

About our programmes

#1

Ranked first for graduate prospect outcomes

Complete University Guide 2024

“

I really enjoyed the student-centred learning module. The thought process required to solve the tasks they set you is really engaging and extremely varied. One week I would be looking at characterisation techniques and the next I would be building a boat. I had a lot of fun with this module and developed a lot of other skills while doing it."

Jack Devile,
BEng Materials Science
and Engineering with
Industrial Experience,
2020

Mathematical Sciences

Our academics are pioneering new mathematical discoveries and applications to better understand the world around us, tackle major issues, and accelerate scientific breakthroughs. Study with us and join a diverse community of brilliant mathematicians.

Our programmes

Our programmes are designed with your future career in mind. Whether that's in data, finance, research, statistics, or anything in between, we're committed to helping you get there.

Our courses are flexible too. With such a wide choice of modules, you'll tailor your degree to your interests and aspirations. We also teach computer programming across all courses, helping you build a cutting-edge professional toolkit.

You can also choose to spend a year in industry or a year abroad at one of our partner institutions. This is a great way to gain valuable skills and experience.

Where can studying Mathematical Sciences take you?

As a maths graduate, you'll have proven yourself as a problem solver with strong analytical, numerical and computational skills. You'll join thousands of alumni who've gone on to work in rewarding and well-paid roles, including actuaries, data scientists, investment bankers, medical statisticians, software engineers, teachers and so much more.

Recent graduates have secured roles with Amazon, Deloitte, Google, HSBC, KPMG, Lloyds and the NHS.

About our programmes

90%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

“

Actuarial science allowed me to pursue the aspects of maths I enjoy and focus on real-world applications. I have developed data analysis skills, learned to programme, and met so many practicing actuaries right here at Queen Mary."

Shaun Marchant,
BSc Actuarial Science,
2024

Medicine

At Queen Mary, you'll be taught by experts in their field who are passionately engaged with their subject. We work closely with our diverse local community to address their health needs and improve their quality of life.

Medicine in London

Studying at Queen Mary means learning at the forefront of modern medicine, and exposes you to a more diverse range of people and health problems than at almost any other medical school in the UK.

Our Faculty of Medicine and Dentistry brings together two venerable teaching institutions: St Bartholomew's Hospital and The London Hospital Medical College. We also have a new satellite campus in Ilford, which enables students to learn in both the classroom and a mock ward environment.

Most students have the opportunity to take an extra year of study leading to an intercalated bachelors or masters degree.

Medicine in Malta

Our five-year programme offers you a curriculum and qualification very similar to that taught at Queen Mary in London, combined with a Mediterranean lifestyle.

Problem-based learning (PBL) ensures that our doctors are trained in thinking strategies along with subject knowledge, further enhanced through early clinical placements. You will be taught by experts within their field, while also taking advantage of the close-knit community our Malta campus brings.

Situated on the island of Gozo, a short ferry ride from the main island of Malta, you will be surrounded by scenic views, cultural events, and the tranquillity and safety of the island. Like Malta, it enjoys 300 days of sunshine a year.

About our programmes

#3

Ranked 3rd in London for Medicine

The Guardian University Guide 2024

“

Studying medicine is incredibly rewarding. Year on year more pieces are added, and it is incredibly satisfying when you are able to figure a medical problem out. Now I'm on hospital placement it's fascinating being able to talk to patients and see everything you have learnt in a practical context."

Harry Collier-Smith,
Medicine MBBS,
2025

For other courses related to this discipline, please see page 96.

Modern Languages and Cultures

Our modern languages programmes focus on culture and identity alongside the workings of the languages themselves. You'll immerse yourself in language and culture, studying literature, film, and even philosophy, as much as grammar and translation.

Our programmes

You can study single and combined honours degrees involving our main language areas of French, German, Russian and Spanish, with Chinese and Portuguese also offered in combination with another language.

Our BA Modern Languages also offers the opportunity to study a third language as a minor subject, adding Catalan, Japanese and Modern Arabic to the mix.

All of our modern languages programmes include a Year Abroad. This experience is a big part of what makes studying modern languages such an enriching experience.

[Learn more](#)

About our programmes

20

Ranked top 20 in the UK for Modern Languages

QS World University Rankings by Subject 2023

“

My favourite aspect of this course is the unique blend of language and business studies, offering a well-rounded education that's both intellectually stimulating and practically relevant."

Thasmitha Varathanathan,
BA German with Business Management,
2023

Physics and Astronomy

From finding our nearest exoplanet, Proxima b, to aiding in the discovery of the Higgs boson, the Department of Physics and Astronomy has long brought people together to make world-changing discoveries.

Our programmes

Our degrees combine academic rigour with a comprehensive programme of careers and employability activities, all within a friendly and supportive environment.

All of our programmes are accredited by the Institute of Physics, which ensures consistently high academic standards.

You will be taught by academics working on high-profile international collaborations, including experiments at CERN.

Where can studying Physics and Astronomy take you?

Our programmes are flexible, so you can pick modules in line with your preferred specialism, preparing you for careers in diverse fields of physics. Many graduates continue their studies with an MSc and PhD, often as a precursor to a career in research. The skills you'll develop are also highly transferable into other sectors, including business, technology and finance.

Recent graduates of the Department of Physics and Astronomy have been employed by the UK Space Agency, JPMorgan Chase, European Astronaut Centre, Airbus and IBM.

About our programmes

95%

of BSc Physics graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

The academics and administrative staff are excellent and always helpful. The lectures run by PsiStar (the physics student society) are amazing. With the help of the careers team, I was able to secure two SEPnet internships during the summer vacations which helped me to learn some crucial coding and data analytical skills."

Ankur Dev,
MSci Astrophysics,
2020

Politics and International Relations

Our London location means you'll benefit from a range of high-profile visiting speakers from think tanks, national political institutions and party headquarters. Regular events give our students the chance to engage with Westminster, Whitehall and the third sector.

Our programmes

You'll have a wide choice of politics and international relations modules, all taught by active, highly rated researchers at the cutting edge of their respective fields.

We provide our students with networking opportunities through hosting speakers on campus from the Government, national political institutions, party HQs, high-profile organisations and think-tanks.

We also have active student-run societies that organise debates and visiting speakers of their own, thereby providing an opportunity for experiential learning.

Where can studying Politics and International Relations take you?

Beyond subject knowledge, you'll graduate with an excellent set of transferable skills that are highly valued by employers, including analytical, research and communication skills.

Our graduates go on to work in sectors such as government, charities or lobbying and public affairs, while others work in policy research, campaigning or the commercial arena.

Recent graduates have found jobs with the House of Commons, the Home Office, the Labour Party and PwC.

About our programmes

96%

of graduates are in full time employment or further study 15 months after graduation

Graduate Outcomes Survey 2020/21

The School of Politics and International Relations sparked my interest in global dynamics. The engaging curriculum, dedicated faculty, and diverse perspectives foster a rich academic atmosphere. The hands-on approach within the School made exploring political dynamics informative, inspiring a passion for change."

Noor Hassan,
BA Politics and
International Relations,
2024

For other courses related to this discipline, please see pages 99–101.

Psychology

Our biological and neuroscientific emphasis sets us apart from many other psychology degrees, which are often based within social science departments.

Our programmes

We treat psychology as a natural and experimental science, whether you approach it from the perspective of psychology or neuroscience. You'll learn about cognitive, social, developmental and abnormal psychology and then apply this knowledge in topics such as counselling and health psychology.

You'll also explore the origins of the human mind and behaviour, drawing on animal cognition, neuroscience and behavioural genetics and epigenetics.

Where can studying Psychology take you?

Our programme prepares you for further study and careers in biological and medical sciences, social sciences and humanities.

Recent Psychology graduates have gone on to work for organisations such as Barts Health NHS Trust, Burgess Autistic Institute and Easy Steps ABA Services for Autism.

About our programmes

92%

of our School's research is rated as either world-leading or internationally excellent

Research Excellence Framework 2021

“

What made studying at Queen Mary so enjoyable was the variety of research occurring in the department. I was able to speak to a variety of lecturers, each with their own unique skills and research area. The high level of talent that Queen Mary attracted made it possible to work within cutting edge research. This exposure was largely responsible for my ability to undertake an interdisciplinary PhD, blending both psychology and nutrition.”

Luke Sartori,
BSc Psychology,
2021

For other courses related to this discipline, please see page 101.

Shraddha was drawn to Queen Mary's sense of community, as well as the industry-leading facilities on offer.

"I felt that Queen Mary had a lot to offer compared to other universities in the UK. The facilities the University provides for my course are incredibly advanced, and the highly diverse environment ensures the cultural knowledge I gain, when interacting with students from many different cultures and backgrounds, is unlike any other.

"Queen Mary has its own dental hospital, allowing us to receive in-depth training on several different specialities within dentistry, and the lecturers at Queen Mary are also leaders within their field, so we are learning the best techniques from some of the most experienced clinicians in the UK."

It's a combination Shraddha feels will set her up for success after graduation.

"The course ensures we will leave university feeling confident in tackling difficult clinical cases we may come across, creating brilliant dentists."

The support on offer at Queen Mary was also an important factor for Shraddha. "I wanted to make sure there was both academic and non-academic support available at the university I went to, and find that if I have any queries here, the lecturers are always on hand to support you. The support around our studies has also been great. For example, when moving into accommodation we were given lists of things to bring to university, and were grouped with individuals from similar courses so we didn't feel out of place!"

As well as her studies, Shraddha has enjoyed getting involved

with the extra-curricular activities on offer at Queen Mary. "There are so many societies to get involved with. I am a part of the netball society, and enjoy playing matches and attending training when I can! Queen Mary's Hindu society has also been a great way for me to practice my religion and has allowed me to meet others with the same views and aspirations as I have."

Being based in London has been another important factor for Shraddha, both personally and professionally.

"There is always something going on in London, and at Queen Mary you are in the heart of East London, and just a short journey from central London. It's a beautiful city to live in, and you are surrounded with so many opportunities to meet new people and try new things."

Shraddha
BDS Dentistry,
Third year

BEng (Hons) Electrical and Electronic Engineering | UCAS code H600 | qmul.ac.uk/H600

Duration	Year Abroad	Related courses	A-level requirements	IB requirements	ESL requirements
3 years	H60Y	Foundation – HHX0; Year in Industry – H602	ABB including Mathematics (a second science subject, preferably Physics, Electronics or Computer Science is also required) ¹	32 points, 655 at HL including Mathematics (a second science subject, preferably Physics, Electronics or Computer Science is also required)	6.0 overall, 5.5 in W, R, L and S

BEng (Hons) Computer Systems Engineering | UCAS code H162 | qmul.ac.uk/H162

Duration	Year Abroad	Related courses	A-level requirements	IB requirements	ESL requirements
3 years	H16Y	Foundation – HHX0; Year in Industry – H163	ABB including Mathematics ¹	32 points, 655 at HL including Mathematics	6.0 overall, 5.5 in W, R, L and S

MSci (Hons) Computer Science | UCAS code G401 | qmul.ac.uk/G401

Duration	Year Abroad	Related courses	A-level requirements	IB requirements	ESL requirements
4 years	G41Y	–	A*AA including either Mathematics, Computer Science, or Physics ¹	36 points, 666 at HL including either Mathematics, Computer Science, or Physics	6.0 overall, 5.5 in W, R, L and S

MEng (Hons) Electrical and Electronic Engineering | UCAS code H608 | qmul.ac.uk/H608

Duration	Year Abroad	Related courses	A-level requirements	IB requirements	ESL requirements
4 years	–	–	AAB including Mathematics (a second science subject, preferably Physics, Electronics or Computer Science is also required) ¹	34 points, 665 at HL including Mathematics (a second science subject, preferably Physics, Electronics or Computer Science is also required)	6.0 overall, 5.5 in W, R, L and S

Dentistry

BDS Dentistry | UCAS code A200 | qmul.ac.uk/A200

Duration	Year Abroad	Related courses	A-level requirements	IB requirements	ESL requirements
5 years	–	–	A*AA including Biology or Chemistry, and a second science or Mathematics (results must be achieved in one sitting over a period of no longer than two years) ¹	38 points, 666 at HL including Biology or Chemistry, and a second science or Mathematics	7.0 overall, 6.5 in W, 5.5 in R, L, S

BSc (Hons) Oral Health | UCAS code A910 | qmul.ac.uk/A910

Duration	Year Abroad	Related courses	A-level requirements	IB requirements	ESL requirements
3 years	–	–	ABB including Biology ¹	32 points, 655 at HL including Biology	7.0 overall, 6.5 in W, 5.5 in R, L, S

Terms and conditions

1. Rules and regulations

The offer of, and acceptance of, a place at Queen Mary University of London ("Queen Mary") is made on the understanding that you agree to our terms and conditions (qmul.ac.uk/prospective/termsandconditions).

These cover, among other things, compliance with our Academic Regulations and related policies, payment of fees, attendance at classes, submission of work, attendance at examinations, student discipline, complaints procedure, freedom of speech and equal opportunities policies. To read the Academic Regulations and related policies, visit arcs.qmul.ac.uk/policy.

2. Changes to our programmes

We will aim to deliver your programme so that it closely matches the way it has been described to you by Queen Mary, especially at the point that you accept your offer. However, it is important to understand that there are circumstances in which we may subsequently change aspects of your programme. Our programmes are delivered within a dynamic, academic community by staff who are actively engaged in research. In this context, we might make changes so that our students can learn from the latest academic research. We also value student feedback and

provide regular opportunities for our students to comment on the content of their programme. We may therefore alter your programme in response to this dialogue with current students. Other circumstances which can lead to changes include: staff changes, which can lead to new modules being offered, modules being withdrawn, or a change to who teaches the programme; changes made in response to new requirements from external professional or statutory bodies; or changes to the way in which universities are funded, which might lead to changes in the availability of some student services, for example. In the unlikely event that we discontinue a programme of study, or change it significantly before it begins, we will inform applicants holding an offer of a place at the earliest opportunity, and will endeavour to offer a suitable alternative programme at Queen Mary. We will also ensure that these changes are reflected on our website as soon as possible.

3. Liability for damage to person or property

Queen Mary does not accept any responsibility or liability for any loss and/or damage to:

- your property, students' and/or visitors' property and/or
- any transfer of computer viruses to your equipment, students' and/or visitors' equipment unless caused by Queen Mary's negligence.

c) Neither does Queen Mary accept any responsibility or liability for personal injury to you, students and/or visitors caused by their misuse or unauthorised use of Queen Mary equipment, while they are on Queen Mary premises, or engaged in Queen Mary activities.

4. Personal Data

Queen Mary will receive personal data from you in various ways when you submit your application for one of our programmes. This may include special category or criminal convictions data under data protection legislation (the General Data Protection Regulations (Regulation (EU) 2016/679) as implemented by the Data Protection Act 2018 (as amended)).

4.1

Your personal data (including any special category personal data) will be held by Queen Mary and may be used by Queen Mary to enable it to fulfil its responsibilities to you.

5. Accuracy of information

Queen Mary has made reasonable efforts to ensure that the information provided in this prospectus is both helpful and accurate at the time of going to print. However, this information is subject to change over time. For this reason, it is important that you check our website for the

most up-to-date information (qmul.ac.uk) or contact us using the details contained within this document.

5.1

Applicants are strongly advised to check the course finder on the Queen Mary website for up-to-date entry requirements before submitting their application qmul.ac.uk/undergraduate/coursefinder.

5.2

You can read our terms and conditions in full at qmul.ac.uk/prospective/termsandconditions.

6. Graduate destinations

All information on graduate destinations has been reported by our graduates to their School or Institute after graduation. These sections of the prospectus relate mainly to our graduates from 2021 onwards.
