2020

New Empirical Models for Condensation on Banks of Plain Tubes.

Zeinelabdeen MIM, Kamran MS and Briggs A. *Heat and Mass Transfer/Waerme- Und Stoffuebertragung* vol. 56, (2) 407-421.

2018

Comparison of empirical models with an experimental database for condensation on banks of tubes.

Zeinelabdeen MIM, Kamran MS and Briggs A. *International Journal of Heat and Mass Transfer* vol. 122, 765-774.

2015

A semi-empirical model for free-convection condensation on horizontal pin-fin tubes.

Ali HM and Briggs A. *International Journal of Heat and Mass Transfer* vol. 81, 157-166.

2014

An investigation of condensate retention on pin-fin tubes.

Ali HM and Briggs A. *Applied Thermal Engineering* vol. 63, (2) 503-510.

2013

Condensation heat transfer on pin-fin tubes: Effect of thermal conductivity and pin height.

Ali HM and Briggs A. *Applied Thermal Engineering* vol. 60, (1-2) 465-471.

Effects of vapor velocity and pressure on Marangoni condensation of steam-ethanol mixtures on a horizontal tube.

Ali H, Wang HS, Briggs A and Rose JW. *Journal of Heat Transfer: Transactions of The Asme* vol. 135, (3).

An investigation of condensate retention on pin-fin tubes.

Ali HM and Briggs A. *Applied Thermal Engineering*.

2012

Condensation of ethylene glycol on pin-fin tubes: Effect of circumferential pin spacing and thickness.

Ali HM and Briggs A. *Applied Thermal Engineering* vol. 49, 9-13.

Condensation of R-113 on pin-fin tubes: Effect of circumferential pin thickness and spacing.

Ali HM and Briggs A. *Heat Transfer Engineering* vol. 33, (3) 205-212.

Effect of vapour velocity on condensate retention between fins during condensation on low-finned tubes.

Fitzgerald CL, Briggs A, Rose JW and Wang HS. *International Journal of Heat and Mass Transfer* vol. 55, (4) 1412-1418.

Enhanced condensation of ethylene glycol on single pin-fin tubes: Effect of pin geometry.

Ali HM and Briggs A. *Journal of Heat Transfer* vol. 134, (1).

2010

Effect of vapour velocity on condensation of ethylene glycol on horizontal integral fin tubes: Heat transfer and retention angle measurements.

Fitzgerald CL, Briggs A, Wang H and Rose JW. *2010 14th International Heat Transfer Conference, Ihtc 14* vol. 2, 89-96.

2007

Effect of vapor velocity on condensation of low-pressure steam on integral-fin tubes.

Namasivayam S and Briggs A. *Journal of Heat Transfer* vol. 129, (11) 1486-1493.

2005

Condensation on a horizontal wire-wrapped tube.

Murase T, Briggs A, Wang HS and Rose JW. *Journal of Heat Transfer* vol. 127, (11) 1207-1213.

Condensation of vapour on sub-cooled liquid columns - Application to the thermal design of shell-and-tube condensers.

Briggs A and Bui HH. *International Journal of Energy Research* vol. 29, (10) 913-921.

Condensation from pure steam and steam-air mixtures on integral-fin tubes in a bank.

Briggs A and Sabaratnam S. *J Heat Trans-T Asme* vol. 127, (6) 571-580.

2004

Heat transfer and pressure drop characteristics for condensation of R113 in a vertical micro-finned tube with wire insert.

Ma X, Briggs A and Rose JW. *International Communications in Heat and Mass Transfer* vol. 31, (5) 619-627.

Forced-convection condensation of ethylene glycol on integral-fin tubes.

Namasivayam S and Briggs A. *American Society of Mechanical Engineers, Heat Transfer Division, (Publication) Htd* vol. 375, (2) 613-619.

2003

Heat Transfer Measurements for Condensation of Steam on a Horizontal Wire-Wrapped Tube.

Briggs A, Wang HS, Murase T and Rose JW. *Journal of Enhanced Heat Transfer* vol. 10, (4) 355-362.

Condensation of steam on integral-fin tubes in a bank.

Briggs A and Sabaratnam S. *Proceedings of The Asme Summer Heat Transfer Conference* vol. 2003, 639-647.

Enhanced condensation of r-113 and steam using three-dimensional pin-fin tubes.

Briggs A. *Experimental Heat Transfer* vol. 16, (1) 61-79.

2000

Heat transfer and pressure drop measurements for in-tube condensation of cfc-113 using microfin tubes and wire inserts.

Briggs A, Kelemenis C and Rose JW. *Experimental Heat Transfer* vol. 13, (3) 163-181.

1999

Heat transfer and pressure drop during in-tube condensation from CFC-113/air mixtures using a wire insert.

Briggs A, Kelemenis C and Rose JW. *Heat and Technology* vol. 17, (2) 57-61.

An evaluation of models for condensation heat transfer on low-finned tubes.

Briggs A and Rose JW. *Journal of Enhanced Heat Transfer* vol. 6, (1) 51-60.

1995

CONDENSATION PERFORMANCE OF SOME COMMERCIAL INTEGRAL FIN TUBES WITH STEAM AND CFC113.

BRIGGS A and ROSE JW. *Exp Heat Transfer* vol. 8, (2) 131-143.

Condensation of steam and R113 on a bank of horizontal tubes in the presence of a noncondensing gas.

Abdullah R, Cooper JR, Briggs A and Rose JW. *Experimental Thermal and Fluid Science* vol. 10, (3) 298-306.

1994

Enhancement of condensation heat transfer on integral-fin tubes using radiused fin-root fillets.

Wen XL, Briggs A and Rose JW. *Journal of Enhanced Heat Transfer* vol. 1, (2) 211-217.

Effect of fin efficiency on a model for condensation heat transfer on a horizontal, integral-fin tube.

Briggs A and Rose JW. *International Journal of Heat and Mass Transfer* vol. 37, (SUPPL. 1) 457-463.

1992

ACCURATE HEAT-TRANSFER MEASUREMENTS FOR CONDENSATION ON HORIZONTAL, INTEGRAL-FIN TUBES.

BRIGGS A, WEN XL and ROSE JW. *J Heat Trans-T Asme* vol. 114, (3) 719-726.
