2026

Focused Liquid Pinching in Coaxial Drop Capsule Generation.

. *Langmuir* vol. 42, (8) 6344-6353. *American Chemical Society (Acs)*.

2024

Liquid pinching dynamics in an inertial transitioning regime.

. *Physical Review Research* vol. 6, (4). *American Physical Society (Aps)*.

2022

The role of geometry on controlled cavity collapse and top jet drop.

. *Physics of Fluids* vol. 34, (7). *Aip Publishing*.

229 Developing novel smell test for Parkinsons disease using microencapsulation of essential oils in alginate.

. *Journal of Neurology Neurosurgery & Psychiatry* vol. 93, (6) a79.3-a7a79. *Bmj*.

2021

Characterization of capillary waves: A review and a new optical method.

. *Physics of Fluids* vol. 33, (10). *Aip Publishing*.

A novel capsule-based smell test fabricated via coaxial dripping.

. *Journal of The Royal Society Interface* vol. 18, (177). *The Royal Society*.

2019

Scaling Laws for Transition from Varicose to Whipping Instabilities in Electrohydrodynamic Jetting.

. *Physical Review Applied* vol. 12, (1). *American Physical Society (Aps)*.

2018

Breakup Length of Electrified Liquid Jets: Scaling Laws and Applications.

. *Physical Review Applied* vol. 10, (6). *American Physical Society (Aps)*.

Controlled cavity collapse: scaling laws of drop formation.

. *Soft Matter* vol. 14, (37) 7671-7679. *Royal Society of Chemistry (Rsc)*.

2016

Effect of a Surrounding Liquid Environment on the Electrical Disruption of Pendant Droplets.

. *Langmuir: The Acs Journal of Surfaces and Colloids* vol. 32, (27) 6815-6824. *American Chemical Society*.

2015

Convective-to-absolute instability transition in a viscoelastic capillary jet subject to unrelaxed axial elastic tension.

. *Physical Review E* vol. 92, (2).

Stability of a rivulet flowing in a microchannel.

. *International Journal of Multiphase Flow* vol. 69, 1-7.

2014

Isothermal dissolution of small rising bubbles in a low viscosity liquid.

. *Chemical Engineering and Processing: Process Intensification* vol. 85, 136-144.
