2025

Elemental segregation and solute transport in the in-situ alloying of miscible Ti-Nb alloys using laser powder bed fusion.

. *Acta Materialia* 121417-121417.Elsevier Bv.

Achieving the strength-ductility balance through the control of the prior -grain size in laser beam powder bed fusion of Ti-6Al-4V.

. *Additive Manufacturing* vol. 109, 104842-104842.Elsevier Bv.

Tailoring microstructure in functionally graded NiTi alloys using in-situ alloying directed energy deposition.

. *Journal of Materials Processing Technology* vol. 341, 118884-118884.Elsevier Bv.

Additive manufacturing-by-design for support structures: a critical review.

. *International Journal of Extreme Manufacturing* vol. 7, (5) 052002-052002.IOP Publishing.

Quantifying chemical homogeneity across the melt pool in laser powder-bed fusion of metallic glass matrix composites from blended elemental powders.

. *Journal of Materials Research and Technology* vol. 35, 6397-6407.Elsevier Bv.

Unravel melt pool and bubble dynamics during laser powder bed fusion of polyamides using synchrotron X-ray imaging and process simulation.

. *Virtual and Physical Prototyping* vol. 20, (1).Informa Uk Limited.

Lack of fusion-induced cracking effect on tensile and fatigue behaviours of laser powder-bed fusion-processed Ti-6Al-4V implant.

. *Engineering Failure Analysis* vol. 168, 109095-109095.Elsevier Bv.

Thermal-solutal convection-induced low-angle grain boundaries in single-crystal nickel-based superalloy solidification.

. *Journal of Materials Science & Technology* vol. 208, 214-229.Elsevier Bv.

2024

Uncovering the fracture mechanism of Laves (1 1 1)/ Ni6Nb7 (0 0 0 1) interfaces by first-principles calculations.

. *Acta Materialia* vol. 281, 120426-120426.Elsevier Bv.

Integrated modeling to control vaporization-induced composition change during additive manufacturing of nickel-based superalloys.

. *Npj Computational Materials* vol. 10, (1).Springer Science and Business Media Llc.

A microscale cellular automaton method for solid-state phase transformation of directed energy deposited Ti6Al4V.

. *Additive Manufacturing* vol. 95, 104517-104517.Elsevier Bv.

On the microstructure evolution and strengthening mechanism of GH4099 Ni-based superalloy fabricated by laser powder bed fusion.

. *Materials Today Communications* vol. 40, 109734-109734.Elsevier Bv.

On the control of epitaxial growth and stray grains during laser-directed energy deposited Ni-based single crystal superalloy.

. *Materials Characterization* vol. 212, 113969-113969.Elsevier Bv.

Laser-inherent porosity defects in additively manufactured Ti6Al4V implant: Formation, distribution, and effect on fatigue performance.

. *Journal of Materials Research and Technology* vol. 30, 5121-5132.Elsevier Bv.

Pore evolution mechanisms during directed energy deposition additive manufacturing.

. *Nature Communications* vol. 15, (1).Springer Science and Business Media Llc.

In-process monitoring and direct simulation of Argon shielding gas and vapour dynamics to control laser-matter interaction in laser powder bed fusion additive manufacturing.

. *Additive Manufacturing* vol. 80, 103953-103953.Elsevier Bv.

2023

Solute trapping and non-equilibrium microstructure during rapid solidification of additive manufacturing.

. *Nature Communications* vol. 14, (1).Springer Science and Business Media Llc.

Gradient microstructure and strength-ductility synergy improvement of 2319 aluminum alloys by hybrid additive manufacturing.

. *Journal of Alloys and Compounds* vol. 968, 171781-171781.Elsevier Bv.

First-principles study of oxygen segregation and its effect on the embrittlement of molybdenum symmetrical tilt grain boundaries.

. *Acta Materialia* vol. 261, 119387-119387.Elsevier Bv.

High-temperature phase stability and phase transformations of Niobium-Chromium Laves phase: Experimental and first-principles calculation studies.

. *Materials & Design* vol. 236, 112483-112483.Elsevier Bv.

Melt Flow-Induced Mechanical Deformation and Fracture Behaviour of Dendrites in Alloy Solidification.

. *Metallurgical and Materials Transactions A* vol. 54, (12) 4612-4619.Springer Science and Business Media Llc.

Effects of Fly Ash Composition to Mitigate Conversion of Calcium Aluminate Cement Composites.

. *Buildings* vol. 13, (10) 2453-2453.Mdpi Ag.

Melt flow-induced mechanical deformation of dendrites in alloy solidification: A coupled thermal fluid - solid mechanics approach.

. *Journal of Materials Research and Technology* vol. 25, 4094-4109.Elsevier Bv.

Real-time prediction and adaptive adjustment of continuous casting based on deep learning.

. *Communications Engineering* vol. 2, (1).Springer Science and Business Media Llc.

Grain refinement and columnar-to-equiaxed transition of Ti6Al4V during additive manufacturing via different laser oscillations.

. *International Journal of Machine Tools and Manufacture* vol. 189, 104031-104031.Elsevier Bv.

Simulation of the solute transport and microstructure evolution during the selective laser melting process.

. *IOP Conference Series: Materials Science and Engineering* vol. 1281, (1) 012003-012003.IOP Publishing.

Effects of extended mixing processes on fresh, hardened and durable properties of cement systems incorporating fly ash.

. *Scientific Reports* vol. 13, (1).Springer Science and Business Media Llc.

Additive manufacturing of tantalum scaffolds: Processing, microstructure and process-induced defects.

. *International Journal of Refractory Metals and Hard Materials* vol. 112, 106132-106132.Elsevier Bv.

Laser-based additive manufacturing of bulk metallic glasses: recent advances and future perspectives for biomedical applications.

. *Journal of Materials Research and Technology* vol. 23, 2956-2990.Elsevier Bv.

Physics-based thermal-chemical-fluid-microstructure modelling of in-situ alloying using additive manufacturing: Composition-microstructure control.

. *Additive Manufacturing* vol. 64, 103428-103428.Elsevier Bv.

Microstructure characteristics of a René N5 Ni-based single-crystal superalloy prepared by laser-directed energy deposition.

. *Additive Manufacturing* vol. 61, 103363-103363.Elsevier Bv.

Multi-length-scale study on the heat treatment response to supersaturated nickel-based superalloys: Precipitation reactions and incipient recrystallisation.

. *Additive Manufacturing* vol. 62, 103389-103389.Elsevier Bv.

2022

A physics-based life prediction model of HP40Nb heat-resistant alloy in a coupled creep-carburisation environment.

. *Materials Science and Engineering: A* vol. 860, 144260-144260.Elsevier Bv.

variant-sensitive deformation behaviour of Inconel 718 superalloy.

. *Journal of Materials Science & Technology* vol. 126, 169-181.Elsevier Bv.

Development, characterisation, and modelling of processability of nitinol stents using laser powder bed fusion.

. *Journal of Alloys and Compounds* vol. 909, 164681-164681.Elsevier Bv.

A new toxic-free Ti40Zr10Co36Pd14 metallic glass with good biocompatibility and surface behaviour comparable to Ti-6Al-4V.

. *Materials & Design* vol. 218, 110691-110691.Elsevier Bv.

Metallurgical Data Science for Steel Industry: A Case Study on Basic Oxygen Furnace.

. *Steel Research International* vol. 93, (12).Wiley.

Insight into the sensitivities of freckles in the directional solidification of single-crystal turbine blades.

. *Journal of Manufacturing Processes* vol. 77, 219-228.Elsevier Bv.

Evaluating data-driven algorithms for predicting mechanical properties with small datasets: A case study on gear steel hardenability.

. *International Journal of Minerals, Metallurgy and Materials* vol. 29, (4) 836-847.Springer Science and Business Media Llc.

Use of barite concrete for radiation shielding against gamma-rays and neutrons.

. *Construction and Building Materials* vol. 326, 126838-126838.Elsevier Bv.

Chemical species mixing during direct energy deposition of bimetallic systems using titanium and dissimilar refractory metals for repair and biomedical applications.

. *Additive Manufacturing* vol. 51, 102654-102654.Elsevier Bv.

Numerical simulation of fluid dynamic behavior of melting, mixing, vaporization and solidification for process optimization in in-situ alloying additive manufacturing.

. *The Proceedings of The Fluids Engineering Conference* vol. 2022, OS11-08.Japan Society of Mechanical Engineers.

2021

Additive manufacturability of superalloys: Process-induced porosity, cooling rate and metal vapour.

. *Additive Manufacturing* vol. 47, 102339-102339.Elsevier Bv.

Solute enrichment induced dendritic fragmentation in directional solidification of nickel-based superalloys.

. *Acta Materialia* vol. 215, 117043-117043.Elsevier Bv.

Digital materials design by thermal-fluid science for multi-metal additive manufacturing.

. *Acta Materialia* vol. 210, 116825-116825.Elsevier Bv.

A novel low-modulus titanium alloy for biomedical applications: A comparison between selective laser melting and metal injection moulding.

. *Materials Science and Engineering: A* vol. 812, 141081-141081.Elsevier Bv.

Thermal-solutal-fluid flow of channel segregation during directional solidification of single-crystal nickel-based superalloys.

. *Acta Materialia* vol. 206, 116620-116620.Elsevier Bv.

High Entropy Alloys as Filler Metals for Joining.

. *Entropy* vol. 23, (1) 78-78.Mdpi Ag.

Ultra-high temperature deformation in a single crystal superalloy: Mesoscale process simulation and micromechanisms.

. *Acta Materialia* vol. 203, 116468-116468.Elsevier Bv.

Alloys-by-design: Application to new superalloys for additive manufacturing.

. *Acta Materialia* vol. 202, 417-436.Elsevier Bv.

2020

Spinodal decomposition versus classical nucleation in a nickel-base superalloy powder: An in-situ neutron diffraction and atomic-scale analysis.

. *Acta Materialia* vol. 200, 959-970.Elsevier Bv.

On the nature of hexagonality within the solidification structure of single crystal alloys: Mechanisms and applications.

. *Acta Materialia* vol. 200, 417-431.Elsevier Bv.

Metal 3D printing as a disruptive technology for superalloys.

. *Nature Communications* vol. 11, (1).Springer Science and Business Media Llc.

Relating micro-segregation to site specific high temperature deformation in single crystal nickel-base superalloy castings.

. *Materials Science and Engineering: A* vol. 773, 138862-138862.Elsevier Bv.

2018

A computational study on the three-dimensional printability of precipitate-strengthened nickel-based superalloys.

. *Proceedings of The Royal Society a: Mathematical, Physical and Engineering Sciences* vol. 474, (2220) 20180295-20180295.The Royal Society.

Neutron tomography methods applied to a nickel-based superalloy additive manufacture build.

. *Materials Letters* vol. 230, 109-112.Elsevier Bv.

Mean-field modelling of the intermetallic precipitate phases during heat treatment and additive manufacture of Inconel 718.

. *Acta Materialia* vol. 156, 432-445.Elsevier Bv.

Prediction of grain structure evolution during rapid solidification of high energy density beam induced re-melting.

. *Materials & Design* vol. 147, 200-210.Elsevier Bv.

Modelling of thermal fluid dynamics for fusion welding.

. *Journal of Materials Processing Technology* vol. 252, 176-182.Elsevier Bv.

2017

The contrasting roles of creep and stress relaxation in the time-dependent deformation during in-situ cooling of a nickel-base single crystal superalloy.

. *Scientific Reports* vol. 7, (1).Springer Science and Business Media Llc.

Nucleation of recrystallisation in castings of single crystal Ni-based superalloys.

. *Acta Materialia* vol. 129, 112-123.Elsevier Bv.

In-situ neutron diffraction during stress relaxation of a single crystal nickel-base superalloy.

. *Scripta Materialia* vol. 131, 103-107.Elsevier Bv.

Keyhole formation and thermal fluid flow-induced porosity during laser fusion welding in titanium alloys: Experimental and modelling.

. *Acta Materialia* vol. 126, 251-263.Elsevier Bv.

An experimental investigation into the stress and strain development of a Ni-base single crystal superalloy during cooling from solidification.

. *Materials & Design* vol. 114, 475-483.Elsevier Bv.

Visco-plasticity during in-situ cooling from solidification of a nickel-base single crystal superalloy using neutron diffraction.

. *Materials Science and Engineering: A* vol. 681, 32-40.Elsevier Bv.

Mesoscale modelling of selective laser melting: Thermal fluid dynamics and microstructural evolution.

. *Computational Materials Science* vol. 126, 479-490.Elsevier Bv.

2016

An Integrated Modeling Approach for Predicting Process Maps of Residual Stress and Distortion in a Laser Weld: A Combined CFDFE Methodology.

. *Metallurgical and Materials Transactions B* vol. 47, (5) 2954-2962.Springer Science and Business Media Llc.

Porosity Formation in Laser Welded Ti6Al4V Alloy: Modelling and Validation.

. Wiley.

The role of stress relaxation and creep during high temperature deformation in Ni-base single crystal superalloys Implications to strain build-up during directional solidification.

. *Acta Materialia* vol. 106, 322-332.Elsevier Bv.

2015

An Improved Method of Capturing the Surface Boundary of a Ti-6Al-4V Fusion Weld Bead for Finite Element Modeling.

. *Metallurgical and Materials Transactions B* vol. 47, (1) 485-494.Springer Science and Business Media Llc.

On the role of melt flow into the surface structure and porosity development during selective laser melting.

. *Acta Materialia* vol. 96, 72-79.Elsevier Bv.

On the role of thermal fluid dynamics into the evolution of porosity during selective laser melting.

. *Scripta Materialia* vol. 105, 14-17.Elsevier Bv.

2013

Analysis of the mechanical deformation arising from investment casting of directionally solidified nickel-based superalloys.

. *Materials Science and Technology* vol. 29, (7) 843-853.Sage Publications.

Prediction of recrystallization in investment cast single-crystal superalloys.

. *Acta Materialia* vol. 61, (1) 51-66.Elsevier Bv.

2012

Prediction of Plastic Strain for Recrystallisation during Investment Casting of Single Crystal Superalloys.

. Wiley.

2011

Numerical Modelling of Stress and Strain Evolution during Solidification of a Single Crystal Superalloy.

. *Advanced Materials Research* vol. 278, 204-209.Trans Tech Publications, Ltd.
