2024

The origins of mammal growth patterns during the Jurassic mammalian radiation.

Newham E, Corfe IJ, Brewer P, Bright JA, Fernandez V, Gostling NJ, Hoffmann S, Jäger KKR, Kague E, Lovric G, Marone F, Panciroli E, Schneider P, Schultz JA, Suhonen H, Witchell A, Gill PG and Martin T. *Science Advances* vol. 10, (32). American Association For The Advancement of Science (Aaas).

Jurassic fossil juvenile reveals prolonged life history in early mammals.

Panciroli E, Benson RBJ, Fernandez V, Fraser NC, Humpage M, Luo Z-X, Newham E and Walsh S. *Nature* vol. 632, (8026) 815-822. Springer Nature.

2023

Threedimensional visualization of predatory gastropod feeding teeth with synchrotron scanning.

Herbert GS, Hill SA, Pio MJ, Carney R, Carlson A, Newham E and Bright JA. *Journal of Morphology* vol. 284, (10). Wiley.

2022

Reply to: Revisiting life history and morphological proxies for early mammaliaform metabolic rates.

Newham E, Gill PG, Benton MJ, Brewer P, Gostling NJ, Haberth D, Jernvall J, Kankanjää T, Kallonen A, Navarro C, Pacureanu A, Richards K, Robson Brown K, Schneider P, Suhonen H, Tafforeau P, Williams K, Zeller-Plumhoff B and Corfe IJ. *Nature Communications* vol. 13, (1). Springer Nature.

Collagen pre-strain discontinuity at the boneCartilage interface.

Badar W, Ali H, Brooker ON, Newham E, Snow T, Terrill NJ, Tozzi G, Fratzl P, Knight MM and Gupta HS. *Plos One* vol. 17, (9). Public Library of Science (Plos).

The regenerating zebrafish scale: a platform to study osteo-anabolic processes relevant to human skeletal diseases.

Bergen D, Tong Q, Shukla A, Newham E, Zethof J, Lundberg M, Ryan R, Youtlen S, Frysz M, Croucher P, Flik G, Richardson R, Kemp J, Hammond C and Metz J. *Bone Reports* vol. 16,. Elsevier.

New tools suggest a middle Jurassic origin for mammalian endothermy: Advances in state-of-the-art techniques uncover new insights on the evolutionary patterns of mammalian endothermy through time.

Newham E, Gill PG and Corfe IJ. *Bioessays*. Wiley.

Regenerating zebrafish scales express a subset of evolutionary conserved genes involved in human skeletal disease.

Bergen DJM, Tong Q, Shukla A, Newham E, Zethof J, Lundberg M, Ryan R, Youtlen SE, Frysz M, Croucher PI, Flik G, Richardson RJ, Kemp JP, Hammond CL and Metz JR. *Bmc Biology* vol. 20, (1). Springer Nature.

Noninvasive 3D Methods for the Study of Dental Cementum.

Newham E, Brown KR, Corfe IJ, Gill PG, Brewer P, Bayle P and Schneider P. *Dental Cementum in Anthropology* 258-272. Cambridge University Press (Cup).

Identifying Life-History Events in Dental Cementum: A Literature Review.

Newham E and Naji S. *Dental Cementum in Anthropology 155-170*. Cambridge University Press (Cup).

2021

A robust, semi-automated approach for counting cementum increments imaged with synchrotron X-ray computed tomography.

Newham E, Gill PG, Brown KR, Gostling NJ, Corfe IJ and Schneider P. *Plos One* vol. 16, (11).Public Library of Science (Plos).

3D assessment of intervertebral disc degeneration in zebrafish identifies changes in bone density that prime disc disease.

Kague E, Turci F, Newman E, Yang Y, Brown KR, Aglan MS, Otaify GA, Temtamy SA, Ruiz-Perez VL, Cross S, Royall CP, Witten PE and Hammond CL. *Bone Research* vol. 9, (1).Springer Nature.

Wnt16 Elicits a Protective Effect Against Fractures and Supports Bone Repair in Zebrafish.

McGowan LM, Kague E, Vorster A, Newham E, Cross S and Hammond CL. *Jbmr Plus* vol. 5, (3).Oxford University Press (Oup).

2020

Synchrotron radiation-based X-ray tomography reveals life history in primate cementum incrementation.

Newham E, Corfe IJ, Brown KR, Gostling NJ, Gill PG and Schneider P. *Journal of The Royal Society Interface* vol. 17, (172).The Royal Society.

Reptile-like physiology in Early Jurassic stem-mammals.

Newham E, Gill PG, Brewer P, Benton MJ, Fernandez V, Gostling NJ, Haberth D, Jernvall J, Kankaanpää T, Kallonen A, Navarro C, Pacureanu A, Richards K, Brown KR, Schneider P, Suhonen H, Tafforeau P, Williams KA, Zeller-Plumhoff B and Corfe IJ. *Nature Communications* vol. 11, (1).Springer Nature.

Muscle defects due to perturbed somite segmentation contribute to late adult scoliosis.

Lleras-Forero L, Newham E, Teufel S, Kawakami K, Hartmann C, Hammond CL, Knight RD and Schulte-Merker S. *Aging* vol. 12, (18) 18603-18621.Impact Journals.

2019

Finite element and deformation analyses predict pattern of bone failure in loaded zebrafish spines.

Newham E, Kague E, Aggleton JA, Fernee C, Brown KR and Hammond CL. *Journal of The Royal Society Interface* vol. 16, (160).The Royal Society.

2017

Complex neuroanatomy in the rostrum of the Isle of Wight theropod *Neovenator salerii*.

Barker CT, Naish D, Newham E, Katsamenis OL and Dyke G. *Scientific Reports* vol. 7, (1).Springer Nature.

2016

Therian mammals experience an ecomorphological radiation during the Late Cretaceous and selective extinction at the KPg boundary.

Grossnickle DM and Newham E. *Proceedings of The Royal Society B* vol. 283, (1832).The Royal Society.

2014

Mesozoic mammaliaform diversity: The effect of sampling corrections on reconstructions of evolutionary dynamics.

Newham E, Benson R, Upchurch P and Goswami A. *Palaeogeography Palaeoclimatology Palaeoecology* vol. 412, 32-44.Elsevier.
