2021

Modeling the tumor microenvironment of ovarian cancer: The application of self-assembling biomaterials.

Mendoza-martinez AK, Loessner D, Mata A and Azevedo HS. *Cancers vol. 13, (22)*.

Cocrystallization-like strategy for the codelivery of hydrophobic and hydrophilic drugs in a single carrier material formulation.

Li Y, Teng C, Azevedo HS, Yin L and He W. *Chinese Chemical Letters vol. 32, (10) 3071-3075*.

Polymyxin B-Triggered Assembly of Peptide Hydrogels for Localized and Sustained Release of Combined Antimicrobial Therapy.

Shi Y, Wareham DW, Yuan Y, Deng X, Mata A and Azevedo HS. *Advanced Healthcare Materials*.

Hyaluronan (HA) Immobilized on Surfaces via Self-Assembled Monolayers of HA-Binding Peptide Modulates Endothelial Cell Spreading and Migration through Focal Adhesion.

Pang X, Li W, Chang L, Gautrot JE, Wang W and Azevedo HS. *Acs Applied Materials and Interfaces vol. 13, (22) 25792-25804.American Chemical Society*.

A novel capsule-based smell test fabricated via coaxial dripping.

Ismail AS, Goodwin GR, Castrejon-Pita JR, Noyce AJ and Azevedo HS. *Journal of The Royal Society Interface vol. 18, (177).The Royal Society*.

Supramolecular Hydrogels for Protein Delivery in Tissue Engineering.

Lyu Y and Azevedo HS. *Molecules vol. 26, (4).Mdpi Ag*.

Hyaluronan (HA)-inspired glycopolymers as molecular tools for studying HA functions.

Collis DWP, Yilmaz G, Yuan Y, Monaco A, Ochbaum G, Shi Y, OTMMalley C, Uzunova V, Napier R, Bitton R, Becer CR and Azevedo HS. *Rsc Chemical Biology.Royal Society of Chemistry*.

CHAPTER 12: Self-assembled Peptide Nanostructures for Antibacterial Applications.

Shi Y, Wareham DW, Phee LM and Azevedo HS. *Rsc Soft Matter*.

Preface.

Azevedo HS, Mano JF and Borges J.

2020

Unravelling the enzymatic degradation mechanism of supramolecular peptide nanofibers and its correlation with their internal viscosity.

Shi Y, Summers PA, Kuimova MK and Azevedo HS. *Nano Letters.American Chemical Society (Acs)*.

Photoconfigurable, Cell-Remodelable Disulfide Cross-linked Hyaluronic Acid Hydrogels.

Wu L, Di Cio S, Azevedo HS and Gautrot JE. *Biomacromolecules.American Chemical Society*.

Optimizing Silanization to Functionalize Stainless Steel Wire: Towards Breast Cancer Stem Cell Isolation.

Bekmurzayeva A, Dukenbayev K, Azevedo HS, Marsili E, Tosi D and Kanayeva D. *Materials (Basel) vol. 13, (17).Mdpi*.

Complexity emerges from chemistry.

Azevedo HS, Perry SL, Korevaar PA and Das D. *Nat Chem*.

Host-guest-mediated epitope presentation on self-assembled peptide amphiphile hydrogels.

Redondo-Gómez C, Padilla Lopategui S, Azevedo HS and Mata A. *Acs Biomaterials Science and Engineering. American Chemical Society*.

Intracellular codelivery of anti-inflammatory drug and anti-miR155 to treat inflammatory disease.

Teng C, Lin C, Huang F, Xing X, Chen S, Ye L, Azevedo HS, Xu C, Wu Z, Chen Z and He W. *Acta Pharmaceutica Sinica B.Elsevier*.

An Invertebrate Burn Wound Model That Recapitulates the Hallmarks of Burn Trauma and Infection Seen in Mammalian Models.

Maslova E, Shi Y, Sjöberg F, Azevedo HS, Wareham DW and McCarthy RR. *Frontiers in Microbiology vol. 11, Frontiers Media Sa*.

Magnetic field-induced alignment of nanofibrous supramolecular membranes: a molecular design approach to create tissue-like biomaterials.

Radvar E, Shi Y, Grasso S, Edwards-Gayle CJC, Liu X, Mauter MS, Castelletto V, Hamley IW, Reece MJ and Azevedo HS. *Acs Applied Materials and Interfaces.American Chemical Society*.

Disordered protein-graphene oxide co-assembly and supramolecular biofabrication of functional fluidic devices.

Wu Y, Wang W, Mata A, Pugno N, Azevedo H, Karabasov S and Titirici M-M. *Nature Communications.Nature Research (Part of Springer Nature)*.

Targeting Extracellular Vesicles to the Arthritic Joint Using a Damaged Cartilage-Specific Antibody.

Topping LM, Thomas BL, Rhys HI, Tremoleda JL, Foster M, Seed M, Voisin MB, Vinci C, Law HL, Perretti M, Norling LV, Azevedo HS and Nissim A. *Frontiers in Immunology vol. 11, Frontiers Media*.

2019**Interaction of Antimicrobial Lipopeptides with Bacterial Lipid Bilayers.**

Shahane G, Ding W, Palaiokostas M, Azevedo HS and Orsi M. *Journal of Membrane Biology vol. 252, (4-5) 317-329*.

Drug Nanorod-Mediated Intracellular Delivery of microRNA-101 for Self-sensitization via Autophagy Inhibition.

Xin X, Du X, Xiao Q, Azevedo HS, He W and Yin L. *Nano-Micro Letters vol. 11, (1).Springer Science and Business Media Llc*.

Tuning the Matrix Metalloproteinase-1 Degradability of Peptide Amphiphile Nanofibers through Supramolecular Engineering.

Shi Y, Ferreira D, Banerjee J, Pickford A and Azevedo HS. *Biomaterials Science.Royal Society of Chemistry (Rsc)*.

Supramolecular Presentation of Hyaluronan onto Model Surfaces for Studying the Behaviour of Cancer Stem Cells.

Pang X, O'Malley C, Borges J, Rahman MM, Collis DWP, Mano JF, Mackenzie IC and S. Azevedo H. *Advanced Biosystems 1900017-1900017.Wiley*.

Mimicking the endothelial glycocalyx through the supramolecular presentation of hyaluronan on patterned surfaces.

Pang X, Li W, Landwehr E, Yuan Y, Wang W and Azevedo HS. *Faraday Discuss*.

Supramolecular Nanofibrous Peptide/Polymer Hydrogels for the Multiplexing of Bioactive Signals.

Radvar E and Azevedo HS. *Acs Biomaterials Science & Engineering.American Chemical Society (Acs)*.

Enhancing the Potency of Antimicrobial Peptides through Molecular Engineering and Self-Assembly.

Lombardi L, Shi Y, Falanga A, Galdiero E, de Alteriis E, Franci G, Chourpa I, Azevedo HS and Galdiero S. *Biomacromolecules vol. 20, (3) 1362-1374*.

Targeted Delivery of Sildenafil for Inhibiting Pulmonary Vascular Remodeling.

Li B, He W, Ye L, Zhu Y, Tian Y, Chen L, Yang J, Miao M, Shi Y, Azevedo HS, Ma Z and Hao K. *Hypertension vol. 73, (3) 703-711*.

Biomaterials inspired by biology: From molecules to self-assembly.

Azevedo HS. *Encyclopedia of Tissue Engineering and Regenerative Medicine*.

Glycan interactions on glycocalyx mimetic surfaces: General discussion.

Azevedo HS, Braunschweig AB, Chiechi RC, Diaz Fernandez Y, Gildersleeve JC, Godula K, Hartmann L, Miura Y, Schmidt S, Turnbull WB and Zhou D. *Faraday Discussions vol. 219, 183-188*.

Multidimensional micro- and nano-printing technologies: General discussion.

Azevedo HS, Braunschweig A, Byrne JP, Diaz Fernandez Y, Gildersleeve J, Hartmann L, Huang M, Nelson A, Ravoo BJ, Schmidt S, Tammelin T, Turnbull WB, Zheng Z and Zhou D. *Faraday Discussions vol. 219, 73-76*.

New directions in surface functionalization and characterization: General discussion.

Azevedo HS, Braunschweig AB, Chiechi RC, Claridge SA, Cronin L, Diaz Fernandez Y, Feizi T, Hartmann L, Huang M, Miura Y, Palma M, Qiu X, Ravoo BJ, Schmidt S, Turnbull WB, Werner C, Zheng Z and Zhou D. *Faraday Discussions vol. 219, 252-261*.

2018

Surface modification of stainless steel for biomedical applications: Revisiting a century-old material.

Bekmurzayeva A, Duncanson WJ, Azevedo HS and Kanayeva D. *Materials Science and Engineering C*.

Supramolecular Peptide/Polymer Hybrid Hydrogels for Biomedical Applications.

Radvar E and Azevedo HS. *Macromol Biosci e1800221-e1800221*.

Correction to 'Crafting of functional biomaterials by directed molecular self-assembly of triple helical peptide building blocks'.

Banerjee J and Azevedo HS. *Interface Focus vol. 8, (4)*.

Multifunctional Self-Assembling Peptide-Based Nanostructures for Targeted Intracellular Delivery: Design, Physicochemical Characterization, and Biological Assessment.

Shi Y, Lin R, Cui H and Azevedo HS. *Methods Mol Biol vol. 1758, 11-26*.

Bioengineering Complexity and Tuneability in Hydrogels.

Mata A, Azevedo HS, Connelly J and Gautrot J. *Hydrogels*.

Semi-interpenetrating network hyaluronic acid microgel delivery systems in micro-flow.

Chen Q, Passos A, Balabani S, Chivu A, Zhao S, Azevedo HS, Butler P and Song W. *J Colloid Interface Sci vol. 519, 174-185*.

Self-assembling peptides and their application in tissue engineering and regenerative medicine.

Banerjee J, Radvar E and Azevedo HS. *Peptides and Proteins as Biomaterials For Tissue Regeneration and Repair*.

Displaying biofunctionality on materials through templated self-assembly.

Shuturminska K, O'Malley C, Collis DWP, Conde J and Azevedo HS. *Self-Assembling Biomaterials: Molecular Design, Characterization and Application in Biology and Medicine*.

Self-assembling biomaterials: Molecular design, characterization and application in biology and medicine.

Azevedo HS and Da Silva RMP.

10 Self-assembling peptides and their application in tissue engineering and regenerative medicine.

Banerjee J, Radvar E and Azevedo HS. *Peptides and Proteins as Biomaterials For Tissue Regeneration and Repair*.

17 Displaying biofunctionality on materials through templated self-assembly.

Shuturminska K, O'Malley C, Collis DWP, Conde J and Azevedo HS. *Self-Assembling Biomaterials*.

2017

Ugi multicomponent reaction to prepare peptide-peptoid hybrid structures with diverse chemical functionalities.

Hartweg M, Edwards-Gayle CJC, Radvar E, Collis D, Reza M, Kaupp M, Steinkoenig J, Ruokolainen J, Rambo R, Barner-Kowollik C, Hamley IW, Azevedo HS and Becer CR. *Polymer Chemistry vol. 9, (4) 482-489*.

Crafting of functional biomaterials by directed molecular self-assembly of triple helical peptide building blocks.
Banerjee J and Azevedo HS. *Interface Focus* vol. 7, (6) 20160138-20160138.

Nanostructured interfacial self-assembled peptide-polymer membranes for enhanced mineralization and cell adhesion.

Ribeiro S, Radvar E, Shi Y, Borges J, Pirraco RP, Leonor IB, Mano JF, Reis RL, Mata A and Azevedo HS. *Nanoscale* vol. 9, (36) 13670-13682. *Royal Society of Chemistry (Rsc)*.

Elastin-Like Protein, with Statherin Derived Peptide, Controls Fluorapatite Formation and Morphology.

Shuturminska K, Tarakina NV, Azevedo HS, Bushby AJ, Mata A, Anderson P and Al-Jawad M. *Front Physiol* vol. 8, 368-368.

Enzymatic activation of cell-penetrating peptides in self-assembled nanostructures triggers fibre-to-micelle morphological transition.

Shi Y, Hu Y, Ochbaum G, Lin R, Bitton R, Cui H and Azevedo HS. *Chemical Communications* vol. 53, (52) 7037-7040. *Royal Society of Chemistry (Rsc)*.

New Bioengineering Breakthroughs and Enabling Tools in Regenerative Medicine.

Mata A, Azevedo HS, Botto L, Gavara N and Su L. *Current Stem Cell Reports* vol. 3, (2) 83-97.

Empowering the potential of cell-penetrating peptides for targeted intracellular delivery via molecular self-assembly.

Shi Y, Conde J and Azevedo HS.

2016

Phage Display Technology in Biomaterials Engineering: Progress and Opportunities for Applications in Regenerative Medicine.

Martins IM, Reis RL and Azevedo HS. *Acs Chem Biol*.

In vitro blood-brain barrier models for drug research: state-of-the-art and new perspectives on reconstituting these models on artificial basement membrane platforms.

Banerjee J, Shi Y and Azevedo HS. *Drug Discovery Today* vol. early view online, 1367-1386. *Elsevier*.

2015

Biomimetic supramolecular designs for the controlled release of growth factors in bone regeneration.

Azevedo HS and Pashkuleva I. *Advanced Drug Delivery Reviews* vol. 94, 63-76.

Co-Assembly, spatiotemporal control and morphogenesis of a hybrid protein-peptide system.

Inostroza-Brito KE, Collin E, Siton-Mendelson O, Smith KH, Monge-Marcet A, Ferreira DS, Rodr guez RP, Alonso M, Rodr guez-Cabello JC, Reis RL, Sagu s F, Botto L, Bitton R, Azevedo HS and Mata A. *Nature Chemistry* vol. 7, (11) 897-904.

In vitro chondrogenic commitment of human Wharton's jelly stem cells by co-culture with human articular chondrocytes.

Pereira RC, Costa-Pinto AR, Frias AM, Neves NM, Azevedo HS and Reis RL. *Journal of Tissue Engineering and Regenerative Medicine* vol. 11, (6) 1876-1887. *Wiley*.

Tumor Targeting: Dual Targeted Immunotherapy via In Vivo Delivery of Biohybrid RNAi-Peptide Nanoparticles to Tumor-Associated Macrophages and Cancer Cells (Adv. Funct. Mater. 27/2015).

Conde J, Bao C, Tan Y, Cui D, Edelman ER, Azevedo HS, Byrne HJ, Artzi N and Tian F. *Advanced Functional Materials* vol. 25, (27) 4173-4173.

Dual Targeted Immunotherapy via In Vivo Delivery of Biohybrid RNAi-Peptide Nanoparticles to Tumor-Associated Macrophages and Cancer Cells.

Conde J, Bao C, Tan Y, Cui D, Edelman ER, Azevedo HS, Byrne HJ, Artzi N and Tian F. *Advanced Functional Materials* vol. 25, (27) 4183-4194.

Molecularly engineered self-assembling membranes for cell-mediated degradation.

Ferreira DS, Lin Y-A, Cui H, Hubbell JA, Reis RL and Azevedo HS. *Adv Healthc Mater* vol. 4, (4) 602-612.

Presence of starch enhances in vitro biodegradation and biocompatibility of a gentamicin delivery formulation.
Balmayor ER, Baran TE, Unger M, Marques AP, Azevedo HS and Reis RL. *Journal of Biomedical Materials Research - Part B Applied Biomaterials* vol. 103, (8) 1610-1620.

2014

Elastic biodegradable starch/ethylene-co-vinyl alcohol fibre-mesh scaffolds for tissue engineering applications.
Susano MA, Leonor IB, Reis RL and Azevedo HS. *Journal of Applied Polymer Science* vol. 131, (14).

2013

Self-assembly in nature: using the principles of nature to create complex nanobiomaterials.
Mendes AC, Baran ET, Reis RL and Azevedo HS. *Wiley Interdiscip Rev Nanomed Nanobiotechnol* vol. 5, (6) 582-612.

Self-assembly in nature: Using the principles of nature to create complex nanobiomaterials.
Mendes AC, Baran ET, Reis RL and Azevedo HS. *Wiley Interdisciplinary Reviews: Nanomedicine and Nanobiotechnology* vol. 5, (6) 582-612.

Peptide-based microcapsules obtained by self-assembly and microfluidics as controlled environments for cell culture.
Ferreira DS, Reis RL and Azevedo HS. *Soft Matter* vol. 9, (38) 9237-9248.

Hyaluronan and self-assembling peptides as building blocks to reconstruct the extracellular environment in skin tissue.
Ferreira DS, Marques AP, Reis RL and Azevedo HS. *Biomaterials Science* vol. 1, (9) 952-964.

Fabrication of phospholipid-xanthan microcapsules by combining microfluidics with self-assembly.
Mendes AC, Baran ET, Reis RL and Azevedo HS. *Acta Biomaterialia* vol. 9, (5) 6675-6685.

Co-assembled and microfabricated bioactive membranes.
Mendes AC, Smith KH, Tejada-Montes E, Engel E, Reis RL, Azevedo HS and Mata A. *Advanced Functional Materials* vol. 23, (4) 430-438.

Bioactive Membranes: Co-Assembled and Microfabricated Bioactive Membranes (Adv. Funct. Mater. 4/2013).
Mendes AC, Smith KH, Tejada •Montes E, Engel E, Reis RL, Azevedo HS and Mata A. *Advanced Functional Materials* vol. 23, (4) 397-397.

Fabrication of phospholipid-xanthan microcapsules by combining microfluidics with self-assembly.
Mendes AC, Baran ET, Reis RL and Azevedo HS. *Acta Biomaterialia*.

Natural Polymers in Tissue Engineering Applications.
Gomes M, Azevedo H, Malafaya P, Silva S, Oliveira J, Silva G, João Mano RS and Reis R. *Handbook of Biopolymers and Biodegradable Plastics: Properties, Processing and Applications*.

16 Natural Polymers in Tissue Engineering Applications.
Gomes M, Azevedo H, Malafaya P, Silva S, Oliveira J, Silva G, Mano RSJ and Reis R. *Handbook of Biopolymers and Biodegradable Plastics*.

2012

Surfaces Inducing Biomineralization.
Alves NM, Leonor IB, Azevedo HS, Reis RL and Mano JF.

Microfluidic fabrication of self-assembled peptide-polysaccharide microcapsules as 3D environments for cell culture.
Mendes AC, Baran ET, Lisboa P, Reis RL and Azevedo HS. *Biomacromolecules* vol. 13, (12) 4039-4048.

Spontaneous co-assembly of molecularly designed building blocks into hierarchically ordered, dynamic, hybrid macrotubes.
Smith KH, Inostroza KE, Alonso M, Reis RL, Azevedo HS and Mata A. *Journal of Tissue Engineering and Regenerative Medicine* vol. 6, 224-225.

Encapsulation and Survival of a Chondrocyte Cell Line within Xanthan Gum Derivative.

Mendes AC, Baran ET, Pereira RC, Azevedo HS and Reis RL. *Macromolecular Bioscience* vol. 12, (3) 350-359.

Injectable biodegradable starch/chitosan delivery system for the sustained release of gentamicin to treat bone infections.

Balmayor ER, Baran ET, Azevedo HS and Reis RL. *Carbohydrate Polymers* vol. 87, (1) 32-39.

2011

Biodegradable fiber-mesh scaffolds with elastic properties and their potential use in tissue engineering.

Susano M, Frias AM, Leonor IB, Reis RL and Azevedo HS. *24th European Conference On Biomaterials - Annual Conference of The European Society For Biomaterials*.

Palmitoylation of xanthan polysaccharide for self-assembly microcapsule formation and encapsulation of cells in physiological conditions.

Mendes AC, Baran ET, Nunes C, Coimbra MA, Azevedo HS and Reis RL. *Soft Matter* vol. 7, (20) 9647-9658.

MICROFLUIDIC ENCAPSULATION OF CELLS INTO SELF-ASSEMBLING XANTHAN-PHOSPOLIPID AMPHIPHILE FOR CELL THERAPY.

Mendes AC, Baran ET, Azevedo HS and Reis RL. *International Journal of Artificial Organs* vol. 34, (8) 623-623.

HYALURONIC ACID MICROPARTICLES AS INJECTABLE DRUG CARRIER FOR KNEE CARTILAGE REPAIR: EFFECT ON ARTICULAR CHONDROCYTE BEHAVIOR.

Pereira RC, Scaranari M, Gentili C, Cancedda R, Frias AM, Reis RL and Azevedo HS. *International Journal of Artificial Organs* vol. 34, (8) 667-667.

Synthesis and functionalization of superparamagnetic poly-?- caprolactone microparticles for the selective isolation of subpopulations of human adipose-derived stem cells.

Balmayor ER, Pashkuleva I, Frias AM, Azevedo HS and Reis RL. *Journal of The Royal Society Interface* vol. 8, (59) 896-905.

Controlled delivery systems: From pharmaceuticals to cells and genes.

Balmayor ER, Azevedo HS and Reis RL. *Pharmaceutical Research* vol. 28, (6) 1241-1258.

Encapsulation of human articular chondrocytes into 3D hydrogel: phenotype and genotype characterization.

Pereira RC, Gentili C, Cancedda R, Azevedo HS and Reis RL. *Methods in Molecular Biology (Clifton, N.J.)* vol. 695, 167-181.

2010

Highly porous and interconnected starch-based scaffolds: Production, characterization and surface modification.

Pashkuleva I, López-PÁrez PM, Azevedo HS and Reis RL. *Materials Science and Engineering C* vol. 30, (7) 981-989.

Silk fibroin microparticles as carriers for delivery of human recombinant BMPs. Physical characterization and drug release.

Bessa PC, Balmayor ER, Azevedo HS, Nürnberger S, Casal M, Van Griensven M, Reis RL and Redl H. *Journal of Tissue Engineering and Regenerative Medicine* vol. 4, (5) 349-355.

Designing biomaterials based on biomineralization of bone.

Alves NM, Leonor IB, Azevedo HS, Reis RL and Mano JF. *Journal of Materials Chemistry* vol. 20, (15) 2911-2921.

2009

Novel injectable gel (system) as a vehicle for human articular chondrocytes in cartilage tissue regeneration.

Pereira RC, Scaranari M, Castagnola P, Grandizio M, Azevedo HS, Reis RL, Cancedda R and Gentili C. *Journal of Tissue Engineering and Regenerative Medicine* vol. 3, (2) 97-106.

Chitosan scaffolds incorporating lysozyme into CaP coatings produced by a biomimetic route: A novel concept for tissue engineering combining a self-regulated degradation system with in situ pore formation.

Martins AM, Pereira RC, Leonor IB, Azevedo HS and Reis RL. *Acta Biomaterialia* vol. 5, (9) 3328-3336.

Encapsulation of α -amylase into starch-based biomaterials: An enzymatic approach to tailor their degradation rate.

Azevedo HS and Reis RL. *Acta Biomaterialia* vol. 5, (8) 3021-3030.

Preparation and characterization of starch-poly- ϵ -caprolactone microparticles incorporating bioactive agents for drug delivery and tissue engineering applications.

Balmayor ER, Tuzlakoglu K, Azevedo HS and Reis RL. *Acta Biomaterialia* vol. 5, (4) 1035-1045.

Effects of protein incorporation on calcium phosphate coating.

Leonor IB, Alves CM, Azevedo HS and Reis RL. *Materials Science and Engineering C* vol. 29, (3) 913-918.

Starch-poly- ϵ -caprolactone microparticles reduce the needed amount of BMP-2.

Balmayor ER, Feichtinger GA, Azevedo HS, Van Griensven M and Reis RL. *Clinical Orthopaedics and Related Research* vol. 467, (12) 3138-3148.

2008

Self-assembly of biomaterials at an interface: Formation of sacs, membranes, and strings.

Capito RM, Azevedo HS, Velichko Y, Mata A and Stupp SI. *8th World Biomaterials Congress 2008* vol. 1,.

Highly biodegradable starch-conjugated chitosan microspheres as carriers for the controlled release of aminoglycosides antibiotic drugs.

Balmayor ER, Baran ET, Azevedo HS and Reis RL. *8th World Biomaterials Congress 2008* vol. 1,.

Novel injectable gel system as a vehicle for human articular chondrocytes encapsulation for cartilage tissue regeneration.

Pereira R, Scaranari M, Castagnola P, Grandizio M, Azevedo H, Reis RL, Cancedda R and Gentili C. *8th World Biomaterials Congress 2008* vol. 3,.

Natural Polymers in Tissue Engineering Applications.

Gomes M, Azevedo H, Malafaya P, Silva S, Oliveira J, Silva G, Sousa R, Mano J and Reis R.

Natural origin scaffolds with in situ pore forming capability for bone tissue engineering applications.

Martins AM, Santos MI, Azevedo HS, Malafaya PB and Reis RL. *Acta Biomater* vol. 4, (6) 1637-1645.

Starch-poly(ϵ -caprolactone) and starch-poly(lactic acid) fibre-mesh scaffolds for bone tissue engineering applications: Structure, mechanical properties and degradation behaviour.

Gomes ME, Azevedo HS, Moreira AR, EllÄ V, KellomÄki M and Reis RL. *Journal of Tissue Engineering and Regenerative Medicine* vol. 2, (5) 243-252.

A novel enzymatically-mediated drug delivery carrier for bone tissue engineering applications: Combining biodegradable starch-based microparticles and differentiation agents.

Balmayor ER, Tuzlakoglu K, Marques AP, Azevedo HS and Reis RL. *Journal of Materials Science: Materials in Medicine* vol. 19, (4) 1617-1623.

Self-assembly of large and small molecules into hierarchically ordered sacs and membranes.

Capito RM, Azevedo HS, Velichko YS, Mata A and Stupp SI. *Science* vol. 319, (5871) 1812-1816.

Surface structural investigation of starch-based biomaterials.

Pashkuleva I, Azevedo HS and Reis RL. *Macromolecular Bioscience* vol. 8, (2) 210-219.

Natural-based polymers for biomedical applications.

Reis RL, Neves NM, Mano JF, Gomes ME, Marques AP and Azevedo HS. *Natural-Based Polymers For Biomedical Applications* 1-802.

Controlling the degradation of natural polymers for biomedical applications.

Azevedo HS, Santos TC and Reis RL.

Preface.

Reis RL, Neves NM, Mano JF, Gomes ME, Marques AP and Azevedo HS. *Natural-Based Polymers For Biomedical Applications*.

Chapter 6 Natural Polymers in tissue engineering applications.

Gomes M, Azevedo H, Malafaya P, Silva S, Oliveira J, Silva G, Sousa R, Mano J and Reis R. *Tissue Engineering*.

4 Controlling the degradation of natural polymers for biomedical applications.

Azevedo HS, Santos TC and Reis RL. *Natural-Based Polymers For Biomedical Applications*.

2007

Natural origin biodegradable systems in tissue engineering and regenerative medicine: Present status and some moving trends.

Mano JF, Silva GA, Azevedo HS, Malafaya PB, Sousa RA, Silva SS, Boesel LF, Oliveira JM, Santos TC, Marques AP, Neves NM and Reis RL. *Journal of The Royal Society Interface* vol. 4, (17) 999-1030.

2006

Incorporation of α -amylase enzyme and a bioactive filler into hydrophilic, partially degradable, and bioactive cements (HDBC)s as a new approach to tailor simultaneously their degradation and bioactive behavior.

Boesel LF, Azevedo HS and Reis RL. *Biomacromolecules* vol. 7, (9) 2600-2609.

Incorporation of proteins with different isoelectric points into biomimetic Ca-P coatings: A new approach to produce hybrid coatings with tailored properties.

Azevedo HS, Leonor IB and Reis RL. *Key Engineering Materials* vol. 309-311 II, 755-758.

2005

Incorporation of proteins and enzymes at different stages of the preparation of calcium phosphate coatings on a degradable substrate by a biomimetic methodology.

Azevedo HS, Leonor IB, Alves CM and Reis RL. *Materials Science and Engineering C* vol. 25, (2) 169-179.

2004

Influence of protein incorporation in the nucleation and growth of biomimetic calcium phosphate coatings.

Azevedo HS, Leonor IB, Alves CM, Goldsmith RJ and Reis RL. *Transactions - 7th World Biomaterials Congress*.

Natural origin scaffolds with in situ gradual pore forming capability: Development and characterization.

Martins AM, Malafaya PB, Azevedo HS, Santos MI, Coutinho OP and Reis RL. *Transactions - 7th World Biomaterials Congress*.

Effect of incubation conditions and enzyme cocktails on the in vitro degradation behaviour of different starch-based biomaterials.

Azevedo HS and Reis RL. *Transactions - 7th World Biomaterials Congress*.

Novel hydrophilic, partially degradable and bioactive bone cements containing starch and a bioactive glass.

Boesel LF, Azevedo HS and Reis RL. *Transactions - 7th World Biomaterials Congress*.

2003

In vitro assessment of the enzymatic degradation of several starch based biomaterials.

Azevedo HS, Gama FM and Reis RL. *Biomacromolecules* vol. 4, (6) 1703-1712.

Tailoring the bioactivity of natural origin inorganic - Polymeric based systems.

Oliveira AL, Leonor IB, Malafaya PB, Alves CM, Azevedo HS and Reis RL. *Key Engineering Materials* vol. 240-242, 111-142.

Effects of the incorporation of proteins and active enzymes on biomimetic calcium-phosphate coatings.

Leonor IB, Azevedo HS, Alves CM and Reis RL. *Key Engineering Materials* vol. 240-242, 97-100.

2002

Possibilities for recycling cellulases after use in cotton processing: Part I: Effects of end-product inhibition, thermal and mechanical deactivation, and cellulase depletion by adsorption.

Azevedo H, Bishop D and Cavaco-Paulo A. *Applied Biochemistry and Biotechnology - Part a Enzyme Engineering and Biotechnology* vol. 101, (1) 61-75.

Possibilities for recycling cellulases after use in cotton processing: Part II: Separation of cellulases from reaction products and released dyestuffs by ultrafiltration.

Azevedo H, Bishop D and Cavaco-Paulo A. *Applied Biochemistry and Biotechnology - Part a Enzyme Engineering and Biotechnology* vol. 101, (1) 77-91.

2001

Desorption of cellulases from cotton powder.

Azevedo H, Pereira Ramos L and Cavaco-Paulo A. *Biotechnology Letters* vol. 23, (17) 1445-1448.

Recovery of cellulases after textile processing.

Azevedo H and Cavaco-Paulo A. *Abstracts of Papers of The American Chemical Society* vol. 221, U176-U176.

2000

Effects of agitation level on the adsorption, desorption, and activities on cotton fabrics of full length and core domains of EGV (*Humicola insolens*) and CenA (*Cellulomonas fimi*).

Azevedo H, Bishop D and Cavaco-Paulo A. *Enzyme and Microbial Technology* vol. 27, (3-5) 325-329.

1999

Effects of temperature on the cellulose binding ability of cellulase enzymes.

Andreus J, Azevedo H and Cavaco-Paulo A. *Journal of Molecular Catalysis - B Enzymatic* vol. 7, (1-4) 233-239.
