2026

Ferritic Power Plant Steels: Remanent Life Assessment and the Approach to Equilibrium.

. *Materials For High Temperature Power Generation and Process Plant Applications* 225-278. Taylor & Francis.

2025

Mechanism of the Bainite Transformation: A Turning Point.

. *Metallurgical and Materials Transactions A* vol. 57, (1) 1-20. Springer Nature.

Design of Creep-Resistant Steel Welds.

. *Mathematical Modelling of Weld Phenomena: No. 5* 431-448. Taylor & Francis.

2024

Hydrogen and the tetragonality of FeNi (tetrataenite).

. *Materials Science and Technology* vol. 42, (5) 551-557. Sage Publications.

Steels for rails.

. *Progress in Materials Science* vol. 146. Elsevier.

Pearlite in Steels.

. Taylor & Francis.

Simultaneous Transformation to Allotriomorphic and Widmanstätten Ferrite in Steel Welds.

. *Mathematical Modelling of Weld Phenomena: No. 4* 302-320. Taylor & Francis.

Materials Algorithms Project (MAP) - Public Domain Research Software & Data.

. *Mathematical Modelling of Weld Phenomena: No. 4* 235-255. Taylor & Francis.

Review: pure, amorphous iron.

. *Journal of Materials Science* vol. 59, (25) 11278-11287.

Artificial intelligence (AI) futures: India-UK collaborations emerging from the 4th Royal Society Yusuf Hamied workshop.

. *International Journal of Information Management* vol. 76. Elsevier.

Bainite - unanswered questions and why they matter.

. *Proceedings of International Symposia On Steel Science* vol. 2024, 19-28. Iron and Steel Institute of Japan.

MATHEMATICAL MODELLING OF WELD PHENOMENA 4.

.

2 Strengthening of iron and its alloys.

. *Steels* 23-60. Elsevier.

13 Weld microstructures.

. *Steels 383-406. Elsevier.*

7 Acicular ferrite.

. *Steels 199-213. Elsevier.*

16 Mathematical modelling.

. *Steels 445-475. Elsevier.*

Mitigating high temperature hydrogen attack with interphase precipitation.

. *International Journal of Hydrogen Energy vol. 50, 189-198. Elsevier.*

8 Heat treatment of steels: hardenability.

. *Steels 215-233. Elsevier.*

14 Additive manufacture.

. *Steels 407-425. Elsevier.*

6 Bainite.

. *Steels 177-198. Elsevier.*

4 Solutes that are substitutes for iron.

. *Steels 103-136. Elsevier.*

10 Thermomechanical treatment.

. *Steels 279-306. Elsevier.*

9 Tempering of martensite.

. *Steels 235-277. Elsevier.*

12 Stainless steel.

. *Steels 347-381. Elsevier.*

5 Formation of martensite.

. *Steels 137-176. Elsevier.*

3 Iron-carbon equilibrium and plain carbon steels.

. *Steels 61-101. Elsevier.*

11 Embrittlement and fracture.

. *Steels 307-346. Elsevier.*

Preface.

. *Steels xiii-xiv. Elsevier.*

15 Nanostructured steels.

. *Steels 427-443. Elsevier.*

17 Visionary use of steels (C O 2).

. *Steels 477-492. Elsevier.*

1 Iron and its interstitial solutions.

. *Steels 1-22. Elsevier.*

Steels.

.

2023

Geoffrey Wilson Greenwood. 3 February 192913 December 2022.

. *Biographical Memoirs of Fellows of The Royal Society vol. 76, 221-240. The Royal Society.*

Deltoidal icositetrahedron faceting on -Fe crystals found on the surface of the Moon.

. *Journal of Crystal Growth* vol. 617,.Elsevier.

Mechanisms and Models for Creep Deformation and Rupture.

. *Comprehensive Structural Integrity*.

2022

Critical assessment 41: The strength of undeformed pearlite.

. *Materials Science and Technology* vol. 38, (16) 1291-1299.Sage Publications.

High-Temperature Hydrogen Attack on 2.25Cr-1Mo Steel: The Roles of Residual Carbon, Initial Microstructure and Carbide Stability.

. *Metallurgical and Materials Transactions A* vol. 53, (12) 4221-4232.Springer Nature.

2021

Other Fe-C carbides.

. *Theory of Transformations in Steels* 419-444. Taylor & Francis.

Cementite.

. *Theory of Transformations in Steels* 381-418. Taylor & Francis.

Widmanstätten ferrite.

. *Theory of Transformations in Steels* 349-380. Taylor & Francis.

Bainite.

. *Theory of Transformations in Steels* 329-348. Taylor & Francis.

Martensite.

. *Theory of Transformations in Steels* 255-328. Taylor & Francis.

Ferrite by reconstructive transformation.

. *Theory of Transformations in Steels* 165-254. Taylor & Francis.

Diffusion.

. *Theory of Transformations in Steels* 103-164. Taylor & Francis.

Thermodynamics.

. *Theory of Transformations in Steels* 17-102. Taylor & Francis.

Aspects of kinetic theory.

. *Theory of Transformations in Steels* 519-542. Taylor & Francis.

Pearlite.

. *Theory of Transformations in Steels* 497-518. Taylor & Francis.

Substitutionally alloyed precipitates.

. *Theory of Transformations in Steels* 463-496. Taylor & Francis.

Nitrides.

. *Theory of Transformations in Steels* 445-462. Taylor & Francis.

Crystal structures and mechanisms.

. *Theory of Transformations in Steels* 1-16. Taylor & Francis.

Innovations in Everyday Engineering Materials.

. Springer Nature.

2020

Congratulatory Messages from ISIJ Honorary Members.

. *Isij International* vol. 60, (12) 2631-2632.Iron and Steel Institute of Japan.

First-principles calculations of elastic constants for epsilon-carbide and the consequences.

. *Materials Science and Technology* vol. 36, (5) 615-622. Sage Publications.

2019

Effect of nickel aluminide on the bainite transformation in a Fe-0.45C13Ni3Al4Co steel, and associated properties.

. *Materials Science and Engineering A* vol. 767,. Elsevier.

The effect of vanadium alloying on the wear resistance of pearlitic rails.

. *Wear* vol. 436,. Elsevier.

Critical Assessment 34: Are (Hägg), and carbides transition-phases relative to cementite in steels?.

. *Materials Science and Technology* vol. 35, (11) 1301-1305. Sage Publications.

Harnessing the scientific synergy of welding and additive manufacturing.

. *Science and Technology of Welding & Joining* vol. 24, (5) 361-366. Sage Publications.

Effect of tempering heat treatment on the CO₂ corrosion resistance of quench-hardened Cr-Mo low-alloy steels for oil and gas applications.

. *Corrosion Science* vol. 154, 36-48. Elsevier.

From Bainite to Austenite.

. *Bainite in Steels* 239-250. Taylor & Francis.

Stress and Strain Effects.

. *Bainite in Steels* 207-238. Taylor & Francis.

Upper and Lower Bainite.

. *Bainite in Steels* 195-206. Taylor & Francis.

Kinetics.

. *Bainite in Steels* 131-194. Taylor & Francis.

Thermodynamics.

. *Bainite in Steels* 117-130. Taylor & Francis.

Tempering of Bainite.

. *Bainite in Steels* 87-116. Taylor & Francis.

Carbide Precipitation.

. *Bainite in Steels* 61-86. Taylor & Francis.

Bainitic Ferrite.

. *Bainite in Steels* 17-60. Taylor & Francis.

The Transformations in Steel.

. *Bainite in Steels* 509-514. Taylor & Francis.

Other Aspects.

. *Bainite in Steels* 495-508. Taylor & Francis.

Nanostructured Bainite.

. *Bainite in Steels* 455-494. Taylor & Francis.

Modern Bainitic Steels.

. *Bainite in Steels* 367-454. Taylor & Francis.

Mechanical Properties.

. *Bainite in Steels* 303-366. Taylor & Francis.

Other Morphologies Of Bainite.

. *Bainite in Steels* 287-302. Taylor & Francis.

Acicular Ferrite.

. *Bainite in Steels* 251-286. Taylor & Francis.

Introduction.

. *Bainite in Steels* 1-16. Taylor & Francis.

Role of fracture toughness in impact-abrasion wear.

. *Wear* vol. 428, 430-437. Elsevier.

Tensile behaviour of thermally-stable nanocrystalline bainitic-steels.

. *Materials Science and Engineering A* vol. 746, 145-153. Elsevier.

Cementite.

. *International Materials Reviews* vol. 65, (1) 1-27. Sage Publications.

2018

Intermetallic-strengthened nanocrystalline bainitic steel.

. *Materials Science and Technology* vol. 34, (16) 1976-1979. Sage Publications.

Designing steel to resist hydrogen embrittlement: Part 1 trapping capacity.

. *Materials Science and Technology* vol. 34, (14) 1737-1746. Sage Publications.

Solution to the Bagaryatskii and Isaichev ferritecementite orientation relationship problem.

. *Materials Science and Technology* vol. 34, (14) 1666-1668. Sage Publications.

Designing steel to resist hydrogen embrittlement Part 2 precipitate characterisation.

. *Materials Science and Technology* vol. 34, (14) 1747-1758. Sage Publications.

A novel ultra-high strength maraging steel with balanced ductility and creep resistance achieved by nanoscale -NiAl and Laves phase precipitates.

. *Acta Materialia* vol. 149, 285-301. Elsevier.

Editorial.

. *Materials Science and Technology* vol. 34, (7) 763-765. Sage Publications.

Residual stress control of multipass welds using low transformation temperature fillers.

. *Materials Science and Technology* vol. 34, (5) 519-528. Sage Publications.

Modelling of size distribution of blocky retained austenite in Si-containing bainitic steels.

. *Materials Science and Technology* vol. 34, (1) 54-62. Sage Publications.

2017

Atomic Mechanism of the Bainite Transformation.

. *Htm Journal of Heat Treatment and Materials* vol. 72, (6) 340-345. De Gruyter.

Infusion of hydrogen into nanostructured bainitic steel.

. *Materials Characterization* vol. 134, 96-102. Elsevier.

The Effect of a Two-Stage Heat-Treatment on the Microstructural and Mechanical Properties of a Maraging Steel.

. *Materials* vol. 10, (12). Mdpi.

Synchrotron and neural network analysis of the influence of composition and heat treatment on the rolling contact fatigue of hypereutectoid pearlitic steels.

. *Materials Science and Engineering A* vol. 707, 259-269. Elsevier.

In situ synchrotron X-ray study of bainite transformation kinetics in a low-carbon Si-containing steel.

. *Materials Science and Technology* vol. 33, (17) 2147-2156. Sage Publications.

Geometry of Crystals, Polycrystals, and Phase Transformations.

. Taylor & Francis.

Erratum to Mechanical properties of thermally-stable, nanocrystalline bainitic steels [Materials Science & Engineering A 700 (2017) 714720].

. *Materials Science and Engineering A* vol. 704,. Elsevier.

Thermally Stable Nanocrystalline Steel.

. *Metallurgical and Materials Transactions A* vol. 48, (10) 4957-4964. Springer Nature.

A SANS and APT study of precipitate evolution and strengthening in a maraging steel.

. *Materials Science and Engineering A* vol. 702, 414-424. Elsevier.

Mechanical properties of thermally-stable, nanocrystalline bainitic steels.

. *Materials Science and Engineering A* vol. 700, 714-720. Elsevier.

Modelling of recalescence effect on austenite decomposition.

. *Materials Science and Technology* vol. 33, (10) 1258-1267. Sage Publications.

Strength and toughness of clean nanostructured bainite.

. *Materials Science and Technology* vol. 33, (10) 1171-1179. Sage Publications.

Effect of manganese sulphide particle shape on the pinning of grain boundary.

. *Materials Science and Technology* vol. 33, (8) 1013-1018. Sage Publications.

Melt-spinning and semi-solid processing of bainitic steel.

. *Materials Science and Technology* vol. 33, (7) 870-878. Sage Publications.

Tempering of Low-Temperature Bainite.

. *Metallurgical and Materials Transactions A* vol. 48, (7) 3410-3418. Springer Nature.

Low-temperature transformation to bainite in a medium-carbon steel.

. *International Journal of Materials Research (Formerly Zeitschrift Fuer Metallkunde)* vol. 108, (2) 89-98. De Gruyter.

Editorial.

. *Materials Science and Technology* vol. 33, (1) 1-1. Sage Publications.

Chapter 7 Acicular Ferrite.

. *Steels: Microstructure and Properties* 203-216. Elsevier.

Preface to the Third Edition.

. *Steels: Microstructure and Properties*. Elsevier.

Advanced metallic alloys for the fossil fuel industries.

. *Materials Science and Technology* vol. 32, (7) 662-663. Sage Publications.

Synchrotron analysis of toughness anomalies in nanostructured bainite.

. *Acta Materialia* vol. 105, 52-58. Elsevier.

Atomic scale structure characterisation.

. *Materials Science and Technology* vol. 32, (3) 201-202. Sage Publications.

Prevention of Hydrogen Embrittlement in Steels.

. *Isij International* vol. 56, (1).Iron and Steel Institute of Japan.

Feasibility study for thixoforming nanostructured bainitic steels.

. *Materials Science and Engineering A* vol. 651, 708-719.Elsevier.

2015

Dry rolling/sliding wear of nanostructured pearlite.

. *Materials Science and Technology* vol. 31, (14) 1735-1744.Sage Publications.

Niobium in Microalloyed Rail Steels.

. *Hsla Steels 2015, Microalloying 2015 & Offshore Engineering Steels 2015* 33-39. Wiley.

The Electrical Processing of Materials.

. *Materials Science and Technology* vol. 31, (13) 1521-1522.Sage Publications.

Problems in the Welding of Automotive Alloys.

. *Science and Technology of Welding & Joining* vol. 20, (6) 451-453.Sage Publications.

High entropy alloys.

. *Materials Science and Technology* vol. 31, (10) 1139-1141.Sage Publications.

Critical Assessment 13: Elimination of white etching matter in bearing steels.

. *Materials Science and Technology* vol. 31, (9) 1011-1015.Sage Publications.

Austeniteferrite transformation in enhanced niobium, low carbon steel.

. *Materials Science and Technology* vol. 31, (9) 1066-1076.Sage Publications.

Anomalies in carbon concentration determinations from nanostructured bainite.

. *Materials Science and Technology* vol. 31, (7) 758-763.Sage Publications.

Is low phosphorus content in steel a product requirement?.

. *Ironmaking & Steelmaking Processes Products and Applications* vol. 42, (4) 259-267.Sage Publications.

Ausforming of medium carbon steel.

. *Materials Science and Technology* vol. 31, (4) 436-442.Sage Publications.

Pearlite growth rate in FeC and FeMnC steels.

. *Materials Science and Technology* vol. 31, (4) 487-493.Sage Publications.

Stability of stainless-steel nanoparticle and water mixtures.

. *Powder Technology* vol. 272, 34-44.Elsevier.

Further evidence of tetragonality in bainitic ferrite.

. *Materials Science and Technology* vol. 31, (2) 254-256.Sage Publications.

Editorial.

. *Materials Science and Technology* vol. 31, (1) 1-1.Sage Publications.

Role of stress-assisted martensite in the design of strong ultrafine-grained duplex steels.

. *Acta Materialia* vol. 82, 100-114.Elsevier.

2014

Phase Transformations: Nondiffusive.

. *Physical Metallurgy Fifth Edition* 1021-1072.

Physical Metallurgy of Steels.

. *Physical Metallurgy Fifth Edition* 2157-2214.

Segregation of phosphorus to ferrite grain boundaries during transformation in an FeP alloy.

. *International Journal of Materials Research (Formerly Zeitschrift Fuer Metallkunde)* vol. 105, (12) 1166-1172. De Gruyter.

Cracks in Martensite Plates as Hydrogen Traps in a Bearing Steel.

. *Metallurgical and Materials Transactions A* vol. 46, (2) 665-673. Springer Nature.

Bearing steel microstructures after aircraft gas turbine engine service.

. *Materials Science and Technology* vol. 30, (15) 1911-1918. Sage Publications.

Selective oxidation of Al rich FeMnAlC low density steels.

. *Materials Science and Technology* vol. 30, (14) 1805-1814. Sage Publications.

Degradation of nanostructured bainitic steel under rolling contact fatigue.

. *Materials Science and Engineering A* vol. 617, 156-164. Elsevier.

Surface residual stresses in multipass welds produced using low transformation temperature filler alloys.

. *Science and Technology of Welding & Joining* vol. 19, (7) 623-630. Sage Publications.

Effect of tempering upon the tensile properties of a nanostructured bainitic steel.

. *Materials Science and Engineering A* vol. 615, 340-347. Elsevier.

Mechanical Twinning in Aircraft Engine Bearing Steel.

. *Bearing Steel Technologies: 10th Volume, Advances in Steel Technologies For Rolling Bearings 1-13.* Astm International.

Spheroidisation of hypereutectoid state of nanostructured bainitic steel.

. *Materials Science and Technology* vol. 30, (11) 1282-1286. Sage Publications.

Interaction of aluminium with hydrogen in twinning-induced plasticity steel.

. *Scripta Materialia* vol. 87, 9-12. Elsevier.

Hydrogen diffusion and the percolation of austenite in nanostructured bainitic steel.

. *Proceedings of The Royal Society A* vol. 470, (2168). The Royal Society.

Effects of dilution and baseplate strength on stress distributions in multipass welds deposited using low transformation temperature filler alloys.

Powder metallurgical nanostructured medium carbon bainitic steel: Kinetics, structure, and in situ thermal stability studies.

. *Materials Science and Engineering A* vol. 555, 139-147.Elsevier.

Medium-Alloy Manganese-Rich Transformation-Induced Plasticity Steels.

. *Metallurgical and Materials Transactions A* vol. 44, (1) 286-293.Springer Nature.

Nanostructured bainitic steel obtained by powder metallurgy approach: Structure, transformation kinetics and mechanical properties.

. *Powder Metallurgy* vol. 55, (4) 256-259.

Mechanism of misorientation development within coalesced martensite.

. *Materials Science and Technology* vol. 28, (8) 918-923. Sage Publications.

Tool durability maps for friction stir welding of an aluminium alloy.

. *Proceedings of The Royal Society A* vol. 468, (2147) 3552-3570. The Royal Society.

Extremely fine pearlite by continuous cooling transformation.

. *Scripta Materialia* vol. 67, (1) 53-56. Elsevier.

Displacive Phase Transformation and Surface Effects Associated with Confocal Laser Scanning Microscopy.

. *Metallurgical and Materials Transactions A* vol. 43, (12) 4520-4524. Springer Nature.

Twinning-Induced Plasticity Steels.

. *Scripta Materialia* vol. 66, (12). Elsevier.

Estimation of fracture toughness of tempered nanostructured bainite.

. *Materials Science and Technology* vol. 28, (6) 685-689. Sage Publications.

Effect of deformation on hydrogen trapping and effusion in TRIP-assisted steel.

. *Acta Materialia* vol. 60, (10) 4085-4092. Elsevier.

Role of delamination and crystallography on anisotropy of Charpy toughness in API-X80 steel.

. *Materials Science and Engineering A* vol. 546, 314-322. Elsevier.

Promoting the coalescence of bainite platelets.

. *Scripta Materialia* vol. 66, (11) 951-953. Elsevier.

Retention of -ferrite in aluminium-alloyed TRIP-assisted steels.

. *Proceedings of The Royal Society A* vol. 468, (2146) 2904-2914. The Royal Society.

Divorced pearlite in steels.

. *Proceedings of The Royal Society A* vol. 468, (2145) 2767-2778. The Royal Society.

Influence of Silicon in Low Density Fe-C-Mn-Al Steel.

. *Metallurgical and Materials Transactions A* vol. 43, (6) 1731-1735. Springer Nature.

A first-principles investigation on the effects of magnetism on the Bain transformation of -phase FeNi systems.

. *Journal of Applied Physics* vol. 111, (6). Aip Publishing.

Critical assessment: Martensite-start temperature for the transformation.

. *Calphad* vol. 36, 16-22. Elsevier.

Steels for bearings.

. *Progress in Materials Science* vol. 57, (2) 268-435. Elsevier.

Spot weldability of TRIP assisted steels with high carbon and aluminium contents.

. *Science and Technology of Welding & Joining* vol. 17, (2) 92-98. Sage Publications.

Duplex Hardening of Steels for Aeroengine Bearings.

. *Isij International* vol. 52, (11). Iron and Steel Institute of Japan.

More Complete Theory for the Calculation of the Martensite Start Temperature in Steels.

. *Isij International* vol. 52, (1). Iron and Steel Institute of Japan.

EDITORIAL.

. *Materials Science and Technology* vol. 28, (1) 1-2. Sage Publications.

2011

Tackling the toughness of steel pipes produced by high frequency induction welding and heat-treatment.

. *Materials Science and Engineering A* vol. 528, (29-30) 8492-8499.Elsevier.

Low-alloy duplex, directly quenched transformation-induced plasticity steel.

. *Scripta Materialia* vol. 65, (7) 604-607.Elsevier.

Dilatometric analysis of cementite dissolution in hypereutectoid steels containing Cr.

. *Scripta Materialia* vol. 65, (3) 245-248.Elsevier.

Mechanical stabilisation of retained austenite in -TRIP steel.

. *Materials Science and Engineering A* vol. 528, (18) 5900-5903.Elsevier.

Surface Relief Due to Bainite Transformation at 473 K (200 C).

. *Metallurgical and Materials Transactions A* vol. 42, (11).Springer Nature.

Applications of phase field modeling.

. *Current Opinion in Solid State and Materials Science* vol. 15, (3) 81-82.Elsevier.

Diffusion-controlled growth of pearlite in ternary steels.

. *Proceedings of The Royal Society A* vol. 467, (2134) 2948-2961.The Royal Society.

. *Journal of Materials Science* vol. 10, (3) 142-144. Springer Nature.

A Model for the Microstructure of Some Advanced Bainitic Steels.

. *Materials Transactions* vol. 32, (8). Japan Institute of Metals.

Mechanism of the Transition from Bainite to Acicular Ferrite.

. *Materials Transactions* vol. 32, (8). Japan Institute of Metals.

Continuous heating transformation of bainite to austenite.

. *Materials Science and Engineering A* vol. 131, (1) 99-113. Elsevier.

Solidification sequences in stainless steel dissimilar alloy welds.

. *Materials Science and Technology* vol. 7, (1) 50-61. Sage Publications.

1990

Directional recrystallisation in Inconel MA 6000 nickel base oxide dispersion strengthened superalloy.

. *Materials Science and Technology* vol. 6, (12) 1236-1246. Sage Publications.

Kinetics of Martensitic transformation in partially bainitic 300M steel.

. *Materials Science and Engineering A* vol. 129, (2) 257-272. Elsevier.

Microstructure and stability of FeCrC hardfacing alloys.

. *Materials Science and Engineering A* vol. 130, (1) 101-111. Elsevier.

Transition from bainite to acicular ferrite in reheated FeCrC weld deposits.

. *Materials Science and Technology* vol. 6, (10) 1005-1020. Sage Publications.

Transition from bainite to acicular ferrite in reheated FeCrC weld deposits.

. *Materials Science and Technology*.

Nucleation of Widmanstätten ferrite.

. *Materials Science and Technology* vol. 6, (8) 781-784. Sage Publications.

Model for transition from upper to lower bainite.

. *Materials Science and Technology* vol. 6, (7) 592-603. Sage Publications.

Bainite in steels.

. *Metallurgical and Materials Transactions A* vol. 21, (3) 767-797. Springer Nature.

The bainite transformation in chemically heterogeneous 300M high-strength steel.

. *Metallurgical and Materials Transactions A* vol. 21, (3) 859-875. Springer Nature.

The distribution of substitutional alloying elements during the bainite transformation.

. *Metallurgical and Materials Transactions A* vol. 21, (3) 837-844. Springer Nature.

Coupled diffusional/displacive transformations: Part II. Solute trapping.

. *Metallurgical and Materials Transactions A* vol. 21, (3) 805-809. Springer Nature.

Kinetics of the Bainite Transformation.

. *Materials Science Forum* vol. 56-58, 263-274. Trans Tech Publications.

The estimation of non-uniform elongation in low-alloy steel weld deposits.

. *Journal of Materials Science* vol. 25, (1) 613-618. Springer Nature.

1989

Nickel based hardfacing alloys for high temperature applications.

. *Materials Science and Technology* vol. 5, (12) 1220-1228. Sage Publications.

SOME UNRESOLVED ISSUES IN PHASE TRANSFORMATIONS - THE ROLE OF MICROANALYSIS.

. *Journal De Physique Archives* vol. 50, (C8). EDP Sciences.

Thermodynamic estimation of liquidus, solidus A_e3 temperatures, and phase compositions for low alloy multicomponent steels.

. *Materials Science and Technology* vol. 5, (10) 977-984. Sage Publications.

Thermodynamic estimation of liquidus, solidus A_e3 temperatures, and phase compositions for low alloy multicomponent steels.

. *Materials Science and Technology* vol. 5, (10) 977-984. Sage Publications.

Reaustenitization experiments on some high-strength steel weld deposits.

. *Materials Science and Engineering A* vol. 118, 155-170. Elsevier.

The microstructure of submerged arc-weld deposits for high-strength steels.

. *Journal of Materials Science* vol. 24, (9) 3180-3188. Springer Nature.

Lower acicular ferrite.

. *Metallurgical and Materials Transactions A* vol. 20, (9) 1811-1818. Springer Nature.

Comparison of the microstructures and abrasive wear properties of stellite hardfacing alloys deposited by arc welding and laser cladding.

. *Metallurgical and Materials Transactions A* vol. 20, (6) 1037-1054. Springer Nature.

Growth rate data on bainite in alloy steels.

. *Materials Science and Technology* vol. 5, (4) 398-402. Sage Publications.

The interpretation of dilatometric data for transformations in steels.

. *Journal of Materials Science* vol. 8, (4) 477-478. Springer Nature.

Coupled diffusional/displacive transformations.

. *Acta Metallurgica* vol. 37, (2) 381-390. Elsevier.

Author's reply.

. *Metallurgical and Materials Transactions A* vol. 20, (2) 330-332. Springer Nature.

Authors' reply.

. *Metallurgical and Materials Transactions A* vol. 20, (2) 333-334. Springer Nature.

Theoretical analysis of changes in cementite composition during tempering of bainite.

. *Materials Science and Technology* vol. 5, (2) 131-137. Sage Publications.

Orientation relationships between adjacent plates of acicular ferrite in steel weld deposits.

. *Materials Science and Technology* vol. 5, (1) 93-97. Sage Publications.

1988

Nitrogen in submerged-arc weld deposits.

. *Journal of Materials Science* vol. 7, (6) 610-612. Springer Nature.

A model for the strength of the As-deposited regions of steel weld metals.

. *Metallurgical and Materials Transactions A* vol. 19, (6) 1597-1602. Springer Nature.

The nonuniform distribution of inclusions in low-alloy steel weld deposits.

. *Metallurgical and Materials Transactions A* vol. 19, (3) 669-674. Springer Nature.

I.8 The Design of Submerged Arc Weld Deposits for High-strength Steels.

. *Weld Quality: The Role of Computers* 71-78. Elsevier.

Extrinsic and intrinsic nodes in the gamma prime phase of a single crystal superalloy.

. *Acta Metallurgica* vol. 36, (1) 95-109. Elsevier.

1987

Diffusional formation of ferrite in iron and its alloys.

. *Scripta Metallurgica* vol. 21, (11) 1605-1609. Elsevier.

Diffusional and displacive transformations.

. *Scripta Metallurgica* vol. 21, (8) 1017-1022. Elsevier.

1986

The austenite grain structure of low-alloy steel weld deposits.

. *Journal of Materials Science* vol. 21, (11) 3947-3951.

Fe-Cr-C hardfacing alloys for high-temperature applications.

. *Journal of Materials Science* vol. 21, (3) 1015-1019. Springer Nature.

1985

Diffusion-controlled growth of ferrite plates in plain-carbon steels.

. *Materials Science and Technology* vol. 1, (7) 497-504. Sage Publications.

A model for the development of microstructure in low-alloy steel (Fe-Mn-Si-C) weld deposits.

. *Acta Metallurgica* vol. 33, (7) 1271-1283. Elsevier.

Authors' reply.

. *Metallurgical and Materials Transactions A* vol. 16, (3) 466-468. Springer Nature.

The influence of alloying elements on the formation of allotriomorphic ferrite in low-alloy steel weld deposits.

. *Journal of Materials Science* vol. 4, (3) 305-308. Springer Nature.

Diffusional formation of ferrite in iron and its alloys.

. *Progress in Materials Science* vol. 29, (4) 321-386. Elsevier.

1983

Comments on the paper The structure of the broad faces of ferrite plates.

. *Scripta Metallurgica* vol. 17, (12) 1475-1479. Elsevier.

Bainite in silicon steels: new compositionproperty approach Part 1.

. *Metal Science* vol. 17, (9) 411-419. Taylor & Francis.

Bainite in silicon steels: new compositionproperty approach Part 2.

. *Metal Science* vol. 17, (9) 420-425. Taylor & Francis.

Ferrite formation in heterogeneous dual-phase steels.

. *Scripta Metallurgica* vol. 17, (7) 857-860.Elsevier.

Considerations of solute-drag in relation to transformations in steels.

. *Journal of Materials Science* vol. 18, (5) 1473-1481.Springer Nature.

Carbon content of retained austenite in quenched steels.

. *Metal Science* vol. 17, (3) 151-152.Taylor & Francis.

1982

Diffusional Transformations: A Theory for the Formation of Superledges.

. February 16 745-750. De Gruyter.

Bainite: An atom-probe study of the incomplete reaction phenomenon.

. *Acta Metallurgica* vol. 30, (4) 775-784.Elsevier.

Thermodynamic analysis of isothermal transformation diagrams.

. *Metal Science* vol. 16, (3) 159-166.Taylor & Francis.

Application of first-order quasichemical theory to transformations in steels.

. *Metal Science* vol. 16, (3) 167-170.Taylor & Francis.

Diffusional Transformations: A Theory for the Formation of Superledges.

. *Physica Status Solidi (a) Applications and Materials Science* vol. 69, (2) 745-750.Wiley.

An aspect of the nucleation of burst martensite.

. *Journal of Materials Science* vol. 17, (2) 383-386.Springer Nature.

1981

Diffusion of carbon in austenite.

. *Metal Science* vol. 15, (10) 477-480.Taylor & Francis.

The structure of twins in FeNi martensite.

. *Acta Metallurgica* vol. 29, (8) 1473-1474.Elsevier.

Reply to Dahmen's comments on BCC-BCC orientation relationships, surface relief and displacive phase transformations in steels.
