2021

Fallow time determination in dentistry using aerosol measurement in mechanically and non-mechanically ventilated environments.

A Unified Geometry Parametrization Method for Turbomachinery Blades.

2020

An adjoint-assisted multilevel multifidelity method for uncertainty quantification and its application to turbomachinery manufacturing variability.

A mesh adaptation strategy for complex wall-modeled turbomachinery LES.

The efficacy of an extraoral scavenging device on reduction of splatter contamination during dental aerosol generating procedures: an exploratory study.

Consistent treatment of incompletely converged iterative linear solvers in reverse-mode algorithmic differentiation.

Seeding and adjoining zero-halo partitioned parallel scientific codes.
Mohanamuraly P, Hascoët L and Müller JD. *Optimization Methods and Software* vol. 35, (3) 618-637.

2019

A Newton-Krylov Solver for Robust Turbomachinery Aerodynamic Analysis.

Geometric continuity constraints of automatically derived parametrisations in CAD-based shape optimisation.
Intracranial aneurysms: looking beyond size in neuroimaging: the role of anatomical factors and haemodynamics.

Checkpointing with Time Gaps for Unsteady Adjoint CFD.
Hückelheim JC and Müller JD. *Computational Methods in Applied Sciences*.

Adjoint-based aerodynamic optimisation of wing shape using non-uniform rational B-splines.
Zhang X, Jesudasan R and Müller JD. *Computational Methods in Applied Sciences*.

A comparative study of two different CAD-based mesh deformation methods for structural shape optimization.
Schwalbach M, Verstraete T, Müller JD and Gauger N. *Computational Methods in Applied Sciences*.

2018

Algorithmic differentiation of the Open CASCADE Technology CAD kernel and its coupling with an adjoint CFD solver.

Parallelizable adjoint stencil computations using transposed forward-mode algorithmic differentiation.
Hückelheim JC, Hovland PD, Strout MM and Müller JD. *Optimization Methods and Software* vol. 33, (4-6) 672-693.

Sensitivity Analysis and Gradient-based Optimisation of Feed Spacer Shape in Reverse Osmosis Membrane Processes Using Discrete Adjoint Approach.

2017

NURBS-based and Parametric-based Shape Optimisation with differentiated CAD Kernel.

Wing-body junction optimisation with CAD-based parametrisation including a moving intersection.
Xu S, Timme S, Mykhaskiv O and Müller JD. *Aerospace Science and Technology* vol. 68, 543-551.

A Mesh Adaptation Strategy to Predict Pressure Losses in LES of Swirled Flows.

Reverse-mode algorithmic differentiation of an OpenMP-parallel compressible flow solver.

ADJOINT BASED DESIGN OPTIMISATION OF AN INTERNAL COOLING CHANNEL U-BEND FOR MINIMIZED PRESSURE LOSSES.

2016

Algorithmic differentiation of code with multiple context-specific activities.
Hückelheim JC, Hascote L and Müller JD. *Acm Transactions On Intelligent Systems and Technology* vol. 43, (4).

2015

LES Study of Transverse Acoustic Instabilities in a Swirled Kerosene/Air Combustion Chamber.
Stabilisation of discrete steady adjoint solvers.

2013

**CAD-based shape optimisation with CFD using a discrete adjoint.**

2012

**One-shot optimisation with grid adaptation using adjoint sensitivities (ECCOMAS 2012).**

**CFD development with automatic differentiation.**
Jones D, Müller JD and Bayyuk S. *50th Aiaa Aerospace Sciences Meeting Including The New Horizons Forum and Aerospace Exposition*.

**Acoustic and Large Eddy Simulation studies of azimuthal modes in annular combustion chambers.**

**Sensitivity of flow simulations in a cerebral aneurysm.**

**Acoustic and Large Eddy Simulation studies of azimuthal modes in annular combustion chambers.**

**Goal-based flow optimisation for automotive design.**

2011

**Pseudo-timestepping and verification for automatic differentiation derived CFD codes.**

**Preparation and assembly of discrete adjoint CFD codes.**

**CAD-based shape optimisation using adjoint sensitivities.**
Yu G, Müller JD, Jones D and Christakopoulos F. *Computers and Fluids* vol. 46, (1) 512-516.

2010

**Challenges of developing engineering students’ writing through peer assessment.**

**Discretisation of diffusive fluxes on hybrid grids.**
Puigt G, Auffray V and Müller JD. *Journal of Computational Physics* vol. 229, (5) 1425-1447.

2008

**Toward modular multigrid design optimisation.**
Jaworski A and Müller JD. *Lecture Notes in Computational Science and Engineering* vol. 64 LNCSE, 281-291.

**Validation of a fluid-structure interaction model for a bileaflet mechanical heart valve.**
Forsythe N and Mueller JD. *Int J Comput Fluid D* vol. 22, (8) 541-553.

2003

**Algorithm developments for discrete adjoint methods.**
Giles MB, Duta MC, Müller JD and Pierce NA. *Aiaa Journal* vol. 41, (2) 198-205.
2002

Edge-based multigrid and preconditioning for hybrid grids.

2001

Adaptive local grid refinement for unsteady reacting flows.
Müller JD, Schönfeld ET and Légier JP. *15th Aiaa Computational Fluid Dynamics Conference.*

Solution adaptive mesh refinement using adjoint error analysis.
Müller JD and Giles MB. *15th Aiaa Computational Fluid Dynamics Conference.*
