2021

Photo-Actuation Stress of Ultra-Drawn Chain-Extended Polyethylene.

Bhatti MRA, Bilotti E, Peijs T and Bastiaansen CWM. *Acs Applied Polymer Materials*. American Chemical Society.

2020

Photo-thermal actuation of ultra-drawn high-density polyethylene.

Bhatti MRA, Bilotti E, Zhang H, Bastiaansen CWM and Peijs T. *Polymer vol. 207*, Elsevier.

Ultra-High Actuation Stress Polymer Actuators as Light-Driven Artificial Muscles.

Bhatti MRA, Bilotti E, Zhang H, Varghese S, Verpaalen RCP, Schenning APHJ, Bastiaansen CWM and Peijs T. *Acs Applied Materials & Interfaces vol. 12, (29) 33210-33218*.

Fast, Light-Responsive, Metal-Like Polymer Actuators Generating High Stresses at Low Strain.

Verpaalen RCP, Varghese S, Froyen A, Pilz da Cunha M, Pouderoijen MJ, Severn JR, Bhatti MRA, Peijs T, Bastiaansen CWM, Debije MG, Engels TAP and Schenning APHJ. *Matter vol. 2, (6) 1522-1534*. Elsevier.

2019

Polylactic acid/lyocell fibre as an eco-friendly alternative to polyethylene terephthalate/cotton fibre blended yarns and knitted fabrics.

Jabbar A, Tausif M, Tahir HR, Basit A, Bhatti MRA and Abbas G. *Journal of The Textile Institute vol. 111, (1) 129-138*. Taylor & Francis.

2018

Effect of key process variables on mechanical properties of blended vortex spun yarns.

Bhatti MRA, Tausif M, Mir MA, Umar M and Cassidy T. *Journal of The Textile Institute vol. 110, (6) 932-940*.
