2020

Is markerless, smart phone recorded two-dimensional video a clinically useful measure of relevant lower limb kinematics in runners with patellofemoral pain? A validity and reliability study.

Neal BS, Lack SD, Barton CJ, Birn-Jeffery A, Miller S and Morrissey D. *Physical Therapy in Sport* vol. 43, 36-42. Elsevier.

2019

Shear-sensitive adhesion enables size-independent adhesive performance in stick insects.

Labonte D, Struecker MY, Birn-Jeffery AV and Federle W. *Proceedings of The Royal Society B: Biological Sciences* vol. 286, (1913).

Increased hip adduction during running is associated with patellofemoral pain and differs between males and females: A case-control study.

Neal BS, Barton CJ, Birn-Jeffery A and Morrissey D. *Journal of Biomechanics* vol. 91, 133-139.

A systematic review of shoulder injury prevalence, proportion, rate, type, onset, severity, mechanism and risk factors in female artistic gymnasts.

Hinds N, ANGIOI M, BIRN-JEFFERY AV and TWYLCROSS-LEWIS R. *Physical Therapy in Sport* vol. 35, 106-115. Elsevier.

2018

The effects & mechanisms of increasing running step rate: A feasibility study in a mixed-sex group of runners with patellofemoral pain.

Neal BS, Barton CJ, Birn-Jeffery A, Daley M and Morrissey D. *Physical Therapy in Sport* vol. 32, 244-251.

Scaling of avian bipedal locomotion reveals independent effects of body mass and leg posture on gait.

Daley MA and BIRN-JEFFERY AV. *Journal of Experimental Biology. Company of Biologists*.

Queen Mary University London: One of the longest established masters of sport and exercise medicine globally (continuing professional development series).

Lack S, Birn-Jeffery A, Beasley I and Morrissey D. *British Journal of Sports Medicine* vol. 52, (3) 206-207.

2016

Light level impacts locomotor biomechanics in a secondarily diurnal gecko, *Rhoptropus afer*.

Birn-Jeffery AV and Higham TE. *J Exp Biol* vol. 219, (Pt 22) 3649-3655.

Human and avian running on uneven ground: a model-based comparison.

Müller R, Birn-Jeffery AV and Blum Y. *J R Soc Interface* vol. 13, (122).

Geckos decouple fore- and hind limb kinematics in response to changes in incline.

Birn-Jeffery AV and Higham TE. *Frontiers in Zoology* vol. 13, (1).

2015

Adaptive simplification and the evolution of gecko locomotion: Morphological and biomechanical consequences of losing adhesion.

Higham TE, Birn-Jeffery AV, Collins CE, Hulseley CD and Russell AP. *Proceedings of The National Academy of Sciences of The United States of America* vol. 112, (3) 809-814.

Functional divergence between morphs of a dwarf chameleon: Differential locomotor kinematics in relation to habitat structure.

Higham TE, Measey GJ, Birn-Jeffery AV, Herrel A and Tolley KA. *Biological Journal of The Linnean Society* vol. 116, (1) 27-40.

2014

The scaling of uphill and downhill locomotion in legged animals.

Birn-Jeffery AV and Higham TE. *Integrative and Comparative Biology* vol. 54, (6) 1159-1172.

Geckos significantly alter foot orientation to facilitate adhesion during downhill locomotion.

Birn-Jeffery AV and Higham TE. *Biology Letters* vol. 10, (10).

Swing-leg trajectory of running guinea fowl suggests task-level priority of force regulation rather than disturbance rejection.

Blum Y, Vejdani HR, Birn-Jeffery AV, Hubicki CM, Hurst JW and Daley MA. *Plos One* vol. 9, (6).

Don't break a leg: Running birds from quail to ostrich prioritise leg safety and economy on uneven terrain.

Birn-Jeffery AV, Hubicki CM, Blum Y, Renjewski D, Hurst JW and Daley MA. *Journal of Experimental Biology* vol. 217, (21) 3786-3796.

2012

Pedal Claw Curvature in Birds, Lizards and Mesozoic Dinosaurs - Complicated Categories and Compensating for Mass-Specific and Phylogenetic Control.

Birn-Jeffery AV, Miller CE, Naish D, Rayfield EJ and Hone DWE. *Plos One* vol. 7, (12).

Birds achieve high robustness in uneven terrain through active control of landing conditions.

Birn-Jeffery AV and Daley MA. *Journal of Experimental Biology* vol. 215, (12) 2117-2127.

2011

Does a crouched leg posture enhance running stability and robustness?.

Blum Y, Birn-Jeffery A, Daley MA and Seyfarth A. *Journal of Theoretical Biology* vol. 281, (1) 97-106.
