2021

**Liquid Phase Peptide Synthesis via One-Pot Nanostar Sieving (PEPSTAR).**

**Liquid Phase Peptide Synthesis via One-Pot Nanostar Sieving (PEPSTAR).**

2020

**Low energy intensity production of fuel-grade bio-butanol enabled by membrane-based extraction.**

**N-Aryl-linked spirocyclic polymers for membrane separations of complex hydrocarbon mixtures.**

**N-Aryl-linked spirocyclic polymers for membrane separations of complex hydrocarbon mixtures.**
Livingston A. *Science* vol. 369, 310-315.

**Nanoscale Chemical Heterogeneity in Aromatic Polyamide Membranes for Reverse Osmosis Applications.**

**High flux thin-film nanocomposites with embedded boron nitride nanotubes for nanofiltration.**
Casanova S, Liu TY, Chew YMJ, Livingston A and Mattia D. *Journal of Membrane Science* vol. 597,.

**Poly(piperazine trimesamide) thin film nanocomposite membrane formation based on MIL-101: Filler aggregation and interfacial polymerization dynamics.**
Butler EL, Petit C and Livingston AG. *Journal of Membrane Science* vol. 596,.

**Proteins tailor pore geometry.**
Livingston AG and Jiang Z. *Nature Materials*.

**On the influence of salt concentration on the transport properties of reverse osmosis membranes in high pressure and high recovery desalination.**
Ebrahim MA, Karan S and Livingston AG. *Journal of Membrane Science* vol. 594,.

**Chapter 1 Challenges and Directions for Green Chemical Engineering--Role of Nanoscale Materials.**

---

List created 13/10/2021
2019

**Membrane Fouling: Does Microscale Roughness Matter?**.

**Reducing the Pore Size of Covalent Organic Frameworks in Thin-Film Composite Membranes Enhances Solute Rejection.**
Corcos AR, Levato GA, Jiang Z, Evans AM, Livingston AG, MarinÃ­as BJ and Dichtel WR. *Acs Materials Letters* vol. 1, (4) 440-446.

**Membrane Fractionation of Liquors from Lignin-First Biorefining.**

**Author Correction: Sequence-defined multifunctional polyethers via liquid-phase synthesis with molecular sieving.**

**Chapter 4 Nanofiltration in the Pharmaceutical and Biopharmaceutical Technology.**
Peeva L and Livingston A. *Current Trends and Future Developments On (Bio-) Membranes. *

2018

**Sequence-defined multifunctional polyethers via liquid-phase synthesis with molecular sieving.**

**Roll-to-roll dip coating of three different PIMs for Organic Solvent Nanofiltration.**

**Iterative peptide synthesis in membrane cascades: Untangling operational decisions.**

**Thin Films: Water Transport through Ultrathin Polyamide Nanofilms Used for Reverse Osmosis (Adv. Mater. 15/2018).**

**Water Transport through Ultrathin Polyamide Nanofilms Used for Reverse Osmosis.**

**A robust thin film composite membrane incorporating thermally rearranged polymer support for organic solvent nanofiltration and pressure retarded osmosis.**

**PECVD modification of nano & ultrafiltration membranes for organic solvent nanofiltration.**

**Solvent-Free Coating of Epoxysilicones for the Fabrication of Composite Membranes.**

**A compact and scalable fabrication method for robust thin film composite membranes.**

2017

**Continuously Operated Hydroamination - Toward High Catalytic Performance via Organic Solvent Nanofiltration in a Membrane Reactor.**
Neutron Reflectivity and Performance of Polyamide Nanofilms for Water Desalination.

Probing flow activity in polyamide layer of reverse osmosis membrane with nanoparticle tracers.

Implication of Side Reactions in Iterative Biopolymer Synthesis: The Case of Membrane Enhanced Peptide Synthesis.

Marchetti P, Peeva L and Livingston A.

Will ultra-high permeance membranes lead to ultra-efficient processes? Challenges for molecular separations in liquid systems.

Negligible ageing in poly(ether-ether-ketone) membranes widens application range for solvent processing.

Membranes from academia to industry.
Nat Mater vol. 16, (3) 280-282.

Nanofiltration Operations in Nonaqueous Systems.
Peeva LG, Marchetti P and Livingston AG. Comprehensive Membrane Science and Engineering.

2016

Organic fouling behaviour of structurally and chemically different forward osmosis membranes - A study of cellulose triacetate and thin film composite membranes.

Micro-to nano-scale characterisation of polyamide structures of the SW30HR RO membrane using advanced electron microscopy and stain tracers.

Controlling biofilm development in the extractive membrane bioreactor.
Yeo BJL, Goh S, Livingston AG and Fane AG. Separation Science and Technology vol. 52, (1) 113-121.

Researchers develop "designer" chemical separation membranes.
Livingston A. Membrane Technology vol. 2016, (11).

Continuous Consecutive Reactions with Inter-Reaction Solvent Exchange by Membrane Separation.

Continuous Consecutive Reactions with Inter-Reaction Solvent Exchange by Membrane Separation.

Solvent recycle with imperfect membranes: A semi-continuous workaround for diafiltration.

Polymer nanofilms with enhanced microporosity by interfacial polymerization.  

Multi-scale modelling of OSN batch concentration with spiral-wound membrane modules using OSN Designer.  

Hybrid polymer/MOF membranes for Organic Solvent Nanofiltration (OSN); Chemical modification and the quest for perfection.  

Towards improved membrane production: using low-toxicity solvents for the preparation of PEEK nanofiltration membranes.  

Energy consumption for desalination -- A comparison of forward osmosis with reverse osmosis, and the potential for perfect membranes.  

2015

Tunable-Porosity Membranes From Discrete Nanoparticles.  
Marchetti P, Mechelhoff M and Livingston AG. Sci Rep vol. 5,.

Crosslinked polybenzimidazole membranes for organic solvent nanofiltration (OSN): Analysis of crosslinking reaction mechanism and effects of reaction parameters.  

Controlling molecular weight cut-off of PEEK nanofiltration membranes using a drying method.  

Performance of spiral-wound membrane modules in organic solvent nanofiltration - Fluid dynamics and mass transfer characteristics.  

Novel MBRs for the removal of organic priority pollutants from industrial wastewaters: a review.  

Liquid-Phase Synthesis of 2'-Methyl-RNA on a Homostar Support through Organic-Solvent Nanofiltration.  

Sub-10 nm polyamide nanofilms with ultrafast solvent transport for molecular separation.  
Karan S, Jiang Z and Livingston AG. Science vol. 348, (6241) 1347-1351.

Organic solvent resistant poly(ether-ether-ketone) nanofiltration membranes.  

Predictive membrane transport models for Organic Solvent Nanofiltration: How complex do we need to be?.  
Marchetti P and Livingston AG. Journal of Membrane Science vol. 476, 530-553.

Molecularly imprinted organic solvent nanofiltration membranes - Revealing molecular recognition and solute rejection behaviour.  

Editorial "Polymers for membrane applications".  
Bismarck A, Li K and Livingston A. Reactive and Functional Polymers vol. 86,.

Improving the permeance of hybrid polymer/metal-organic framework (MOF) membranes for organic solvent nanofiltration (OSN) - development of MOF thin films via interfacial synthesis.  
Synthesis and characterization of branched fullerene-terminated poly(ethylene glycol).
Yau HC, Bayazit MK, Gaffney PRJ, Livingston AG, Steinke JHG and Shaffer MSP. Polymer Chemistry vol. 6, (7) 1056-1065.

2014

Molecular separation with organic solvent nanofiltration: a critical review.

Continuous purification of active pharmaceutical ingredients using multistage organic solvent nanofiltration membrane cascade.

Pore preserving crosslinkers for polyimide OSN membranes.

In Situ Solvent Recovery by Organic Solvent Nanofiltration.

Beyond PEG2000: synthesis and functionalisation of monodisperse PEGylated homostars and clickable bivalent polyethyleneglycols.

Sustainability assessment of organic solvent nanofiltration: from fabrication to application.

Polyamide thin film composite membranes on cross-linked polyimide supports: Improvement of RO performance via activating solvent.
Gorgojo P, Jimenez-Solomon MF and Livingston AG. Desalination vol. 344, 181-188.

Racemisation of 1-Arylethylamines with Shvo-type Organoruthenium Catalysts.

Beyond polyimide: Crosslinked polybenzimidazole membranes for organic solvent nanofiltration (OSN) in harsh environments.

Ultrathin polymer films with intrinsic microporosity: Anomalous solvent permeation and high flux membranes.

Controlling Crystallization via Organic Solvent Nanofiltration: The Influence of Flux on Griseofulvin Crystallization.

Mixed matrix membranes for organic solvent nanofiltration.

Increasing the sustainability of membrane processes through cascade approach and solvent recovery--pharmaceutical purification case study.

Fabrication of hybrid polymer/metal organic framework membranes: mixed matrix membranes versus in situ growth.
Iterative synthesis of monodisperse PEG homostars and linear heterobifunctional PEG.
Székely G, Schaepttoens M, Gaffney PRJ and Livingston AG. Polymer Chemistry vol. 5, (3) 694-697.

2013

Use of Continuous MSMPR Crystallization with Integrated Nanofiltration Membrane Recycle for Enhanced Yield and Purity in API Crystallization.

OSN Designer, a tool for predicting organic solvent nanofiltration technology performance using Aspen One, MATLAB and CAPE OPEN.
Peshev D and Livingston AG. Chemical Engineering Science vol. 104, 975-987.

Beneath the surface: Influence of supports on thin film composite membranes by interfacial polymerization for organic solvent nanofiltration.

High flux thin film nanocomposite membranes based on metal-organic frameworks for organic solvent nanofiltration.

NF in organic solvent/water mixtures: Role of preferential solvation.

Experimental strategies for increasing the catalyst turnover number in a continuous Heck coupling reaction.

Organic Solvent Nanofiltration.

Quality by Design for peptide nanofiltration: Fundamental understanding and process selection.

When the membrane is not enough: A simplified membrane cascade using Organic Solvent Nanofiltration (OSN).

Nanoparticle contrast agents to elucidate the structure of thin film composite nanofiltration membranes.

Pore-flow calculations based on pore size distributions in polyimide membranes determined by a nanoprobe imaging technique.
Stawikowska J, Kim JF and Livingston AG. Chemical Engineering Science vol. 97, 81-95.

High flux hydrophobic membranes for organic solvent nanofiltration (OSN)--Interfacial polymerization, surface modification and solvent activation.
Solomon MFJ, Bhole Y and Livingston AG. Journal of Membrane Science vol. 434, 193-203.

Molecular separation with an organic solvent nanofiltration cascade - augmenting membrane selectivity with process engineering.
Assessment of atomic force microscopy for characterisation of nanofiltration membranes.

Continuous solute fractionation with membrane cascades - A high productivity alternative to diafiltration.
Siew WE, Livingston AG, Ates C and Merschaert A. Separation and Purification Technology vol. 102, 1-14.

Efficient and productive asymmetric Michael addition: development of a highly enantioselective quinidine-based organocatalyst for homogeneous recycling via nanofiltration.

Batchwise and continuous nanofiltration of POSS-tagged Grubbs-Hoveyda-type olefin metathesis catalysts.

2012

High flux membranes for organic solvent nanofiltration (OSN)--Interfacial polymerization with solvent activation.

An improved phenomenological model for prediction of solvent permeation through ceramic NF and UF membranes.

Nanoprobe imaging molecular scale pores in polymeric membranes.

Membranes for Organic Solvent Nanofiltration Based on Preassembled Nanoparticles.

Facilitating the use of counter-current chromatography in pharmaceutical purification through use of organic solvent nanofiltration.
Rundquist E, Pink C, Vilminot E and Livingston A. J Chromatogr A vol. 1229, 156-163.

Separation of reaction product and palladium catalyst after a Heck coupling reaction by means of organic solvent nanofiltration.

Organic solvent nanofiltration : a potential alternative to distillation for solvent recovery from crystallisation mother liquors.

Speciation of Pd(OAc) 2 in ligandless Suzuki-Miyaura reactions.

REMOVED: A Simple Closed-Loop Membrane Cascade System for Purification of Active Pharmaceutical Ingredients (API).
Kim JF, Da Silva AF, Gaffney PRJ and Livingston AG. Procedia Engineering vol. 44, 896-898.

REMOVED: Organic Solvent Nanofiltration Thin Film Composite (TFC) Membranes by Interfacial Polymerisation.
Solomon MFJ, Bhole Y and Livingston AG. Procedia Engineering vol. 44, 253-255.
REMOVED: Modification of Mixed Matrix Membranes for Organic Solvent Nanofiltration.
Campbell J, Davies R, Braddock C and Livingston AG. *Procedia Engineering* vol. 44, 1713-1715.

**2011**

**The effect of membrane formation parameters on performance of polyimide membranes for organic solvent nanofiltration (OSN). Part C. Effect of polyimide characteristics.**

Soroko I, Lopes MP and Livingston A. *Journal of Membrane Science* vol. 381, (1-2) 152-162.

**Method for the preparation of cellulose acetate flat sheet composite membranes for forward osmosis--Desalination using MgSO4 draw solution.**

**Nanofiltration process for the nutritional enrichment and refining of rice bran oil.**

**Environmentally friendly route for the preparation of solvent resistant polyimide nanofiltration membranes.**

**2010**

**Long-Term, Cytokine-Free Ex Vivo Expansion of Human Cord Blood Mononuclear Cells Using a Novel Closed-Loop 3D Dual Hollow Fibre Perfused Bioreactor.**

**Organic Solvent Nanofiltration: A New Paradigm in Peptide Synthesis.**

**A novel approach to modelling counter-current chromatography.**

**The regulatory logic of m-xylene biodegradation by Pseudomonas putida mt-2 exposed by dynamic modelling of the principal node Ps/Pr of the TOL plasmid.**

Nair D, Scarpello JT, White LS, dos Santos LMF, Vankelecom IFJ and Livingston AG. *Cheminform* vol. 33, (5) no-no.

**Membrane enhanced peptide synthesis.**

**Demonstration of Molecular Purification in Polar Aprotic Solvents by Organic Solvent Nanofiltration.**
Sereewatthanawut I, Lim FW, Bhole YS, Ormerod D, Horvath A, Boam AT and Livingston AG. *Organic Process Research & Development* vol. 14, (3) 600-611.

**Organic solvent nanofiltration (OSN) with spiral-wound membrane elements--Highly rejected solute system.**

**Spiral-wound polyaniline membrane modules for organic solvent nanofiltration (OSN).**
2.05 Nanofiltration Operations in Nonaqueous Systems.
Peeva LG, Sairam M and Livingston AG. Comprehensive Membrane Science and Engineering.

2009

Impact of TiO2 nanoparticles on morphology and performance of crosslinked polyimide organic solvent nanofiltration (OSN) membranes.

Enantioseparation via EIC-OSN: Process design and improvement of enantiomers resolvability and separation performance.
Sereewatthanawut I, Ferreira FC, Ghazali NF and Livingston AG. Aiche Journal vol. 56, (4) 893-904.

Enantioselective whole-cell biotransformation of acetophenone to S-phenylethanol by Rhodotorula glutinis. Part II. Aqueous-organic systems: Emulsion and membrane bioreactors.
Valadez-Blanco R and Livingston AG. Biochemical Engineering Journal vol. 46, (1) 54-60.

Enantioselective whole-cell biotransformation of acetophenone to S-phenylethanol by Rhodotorula glutinis Part I. Product formation kinetics and feeding strategies in aqueous media.

A novel phase transition technique for fabrication of mesopore sized ceramic membranes.

Extending Ru-BINAP Catalyst Life and Separating Products from Catalyst Using Membrane Recycling.

Molecular separation: the new frontier in liquid filtration.
Livingston A and Nasso M. Tce (814) 34-36.

Membrane characterisation by SEM, TEM and ESEM: The implications of dry and wetted microstructure on mass transfer through integrally skinned polyimide nanofiltration membranes.

Nanoporous asymmetric polyaniline films for filtration of organic solvents.

Solute molecular transport through polyimide asymmetric organic solvent nanofiltration (OSN) membranes and the effect of membrane-formation parameters on mass transfer.

Crosslinked integrally skinned asymmetric polyaniline membranes for use in organic solvents.
Loh XX, Sairam M, Bismarck A, Steinke JHG, Livingston AG and Li K. Journal of Membrane Science vol. 326, (2) 635-642.

2008

Polyaniline hollow fibres for organic solvent nanofiltration.

Controlling molecular weight cut-off curves for highly solvent stable organic solvent nanofiltration (OSN) membranes.

Organic Solvent Nanofiltration and Adsorbents; A Hybrid Approach to Achieve Ultra Low Palladium Contamination of Post Coupling Reaction Products.
Membranes for the dehydration of solvents by pervaporation.

Polyaniline membranes for the dehydration of tetrahydrofuran by pervaporation.

Evidence of species succession during chlorobenzene biodegradation.

Solvent nanofiltration in organic processes - A rapid and scalable purification technology.

2007

The use of an oil-absorber-bioscrubber system during biodegradation of sequentially alternating loadings of 1,2-dichloroethane and fluorobenzene in a waste gas.

Stability and Performance of Xanthobacter autotrophicus GJ10 during 1,2-Dichloroethane Biodegradation.

Towards a continuous dynamic kinetic resolution of 1-phenylethylamine using a membrane assisted, two vessel process.

Polymeric membranes for nanofiltration in polar aprotic solvents.
Toh YHS, Lim FW and Livingston AG. *Journal of Membrane Science* vol. 301, (1-2) 3-10.

See-Toh YH, Ferreira FC and Livingston AG. *Journal of Membrane Science* vol. 299, (1-2) 236-250.

Simulation of the cellular anabolic activity within biofilms: Where a new immobilized cell will preferably be born?.

Nanofiltration membrane cascade for continuous solvent exchange.

The use of an oil absorber as a strategy to overcome starvation periods in degrading 1,2-dichloroethane in waste gas.

In search of a standard method for the characterisation of organic solvent nanofiltration membranes.

MEMBRANE SEPARATIONS | Nanofiltration in Organic Liquids.

2006

Wong H, SeeÅ¡,Toh YH, Ferreira FC, Crook R and Livingston AG. *Cheminform* vol. 37, (37).

Investigation of the Compatibility of Racemization and Kinetic Resolution for the Dynamic Kinetic Resolution of an Allylic Alcohol.
Effect of solute concentration and mass transfer limitations on transport in organic solvent nanofiltration -- partially rejected solute.

Bioremediation of Industrial and Agro-industrial Effluents.
Kalogerakis N, Livingston AG and Mantzavinos D. *Journal of Chemical Technology & Biotechnology* vol. 81, (9) 1449-1449.

Organic Solvent Nanofiltration.
Livingston AG, Peeva LG and Silva P. *Membrane Technology*.

Enantioselective separation by enantioselective inclusion complexation-organic solvent nanofiltration.

The absolute configuration of (+)-(E)-4-phenylbut-3-ene-2-ol.

Stability and performance of Xanthobacter autotrophicus GJ10 during 1,2-dichloroethane biodegradation.

Investigation of biofilm growth and attrition in a three-phase airlift bioreactor using 35SO42- as a radiolabelled tracer.
Gikas P and Livingston AG. *Journal of Chemical Technology & Biotechnology* vol. 81, (6) 858-865.

Organic solvent nanofiltration in asymmetric hydrogenation: enhancement of enantioselectivity and catalyst stability by ionic liquids.
Wong H-T, See-Toh YH, Ferreira FC, Crook R and Livingston AG. *Chem Commun (Camb)* (19) 2063-2065.

Control of membrane-attached biofilms using surfactants.

Rational approach to the selection of conditions for diastereomeric resolution of chiral amines by diacid resolving agents.
Ferreira FC, Ghazali NF, Cocchini U and Livingston AG. *Tetrahedron Asymmetry* vol. 17, (9) 1337-1348.

The effect of ionic liquids on product yield and catalyst stability.
Wong H-T, Han S and Livingston AG. *Chemical Engineering Science* vol. 61, (4) 1338-1341.

An oil-absorber-bioscrubber system to stabilize biotreatment of pollutants present in waste gas. Fluctuating loads of 1,2-dichloroethane.

Recovery and reuse of ionic liquids and palladium catalyst for Suzuki reactions using organic solvent nanofiltration.

Application of thin film composite membranes to the membrane aromatic recovery system.
Daisley GR, Dastgir MG, Ferreira FC, Peeva LG and Livingston AG. *Journal of Membrane Science* vol. 268, (1) 20-36.

Dehydration of tetrahydrofuran by pervaporation using a composite membrane.

2005

Strain stability in biological systems treating recalcitrant organic compounds.
The performance of composite supported polymeric liquid membranes in the Membrane Aromatic Recovery System (MARS).
Dastgir MG, Peeva LG and Livingston AG. Chemical Engineering Science vol. 60, (24) 7034-7044.

An attempt to compare the performance of bioscrubbers and biotrickling filters for degradation of ethyl acetate in gas streams.

An Improved Protocol for the Synthesis and Nanofiltration of Kim and Park’s Aminocyclopentadienyl Ruthenium Chloride Racemisation Catalyst.

Solvent transport in organic solvent nanofiltration membranes.

The synthesis of polypropylene glycol based polyethers and their use in membranes for the membrane aromatic recovery system (MARS).

Pilot scale application of the Membrane Aromatic Recovery System (MARS) for recovery of phenol from resin production condensates.

Stabilization of Supported Liquid Membranes by γ-Radiation and Their Performance in the Membrane Aromatic Recovery System.
Dastgir MG, Peeva LG, Livingston AG, Morley TA and Steinke JHG. Industrial & Engineering Chemistry Research vol. 44, (20) 7659-7667.

Application of Organic Solvent Nanofiltration to Separation of Ionic Liquids and Products from Ionic Liquid Mediated Reactions.
Han S, Wong H-T and Livingston AG. Chemical Engineering Research and Design vol. 83, (3) 309-316.

Mass transfer enhancement in the membrane aromatic recovery system (MARS): experimental results and comparison with theory.
Ferreira FC, Peeva LG and Livingston AG. Chemical Engineering Science vol. 60, (4) 1029-1042.

Mass transfer enhancement in the Membrane Aromatic Recovery System (MARS): theoretical analysis.
Ferreira FC, Peeva LG and Livingston AG. Chemical Engineering Science vol. 60, (1) 151-166.

2004

Effect of concentration polarisation and osmotic pressure on flux in organic solvent nanofiltration.

Elucidation of the mechanism of chiral selectivity in diastereomeric salt formation using organic solvent nanofiltration.
Ghazali NF, Patterson DA and Livingston AG. Chem Commun (Camb) (8) 962-963.

Recovery of 2,4-dichlorophenol from acidic aqueous streams by Membrane Aromatic Recovery System (MARS).
Dastgir MG, Ferreira FC, Peeva LG and Livingston AG. Journal of Chemical Technology & Biotechnology vol. 79, (4) 381-390.

Overcoming oxygen limitations in membrane-attached biofilms--investigation of flux and diffusivity in an anoxic biofilm.

Physico-chemical interpretation of the SRNF transport mechanism for solvents through dense silicone membranes.
**2003**

**Bioscrubbing of waste gas-substrate absorber to avoid instability induced by inhibition kinetics.**
Oliveira TAC and Livingston AG. *Biotechnol Bioeng* vol. 84, (5) 552-563.

**Reaction mechanisms and kinetics of chemical pretreatment of bioresistant organic molecules by wet air oxidation.**

**Kinetics of Wet Oxidation of P-Coumaric Acid over a CuO.ZnO-Al2O3 Catalyst.**
Mantzavinos D, Hellenbrand R, Livingston AG and Metcalfe IS. *Chemical Engineering Research and Design* vol. 75, (1) 87-91.

**Environmental Risk Assessment of Chemical Plants.**
Stefanis SK, Livingston AG and Pistikopoulos EN. *Advances in Safety and Reliability.*

**Mineralisation of 1,2-dibromoethane and other brominated aliphatics under aerobic conditions.**

1996

**Catalytic wet air oxidation of polyethylene glycol.**
Mantzavinos D, Hellenbrand R, Livingston AG and Metcalfe IS. *Applied Catalysis B Environmental* vol. 11, (1) 99-119.

**Enrichment of mixed cultures capable of aerobic degradation of 1,2-dibromoethane.**

**Partial wet oxidation of p-coumaric acid: Oxidation intermediates, reaction pathways and implications for wastewater treatment.**

**Prediction of optimal biofilm thickness for membrane-attached biofilms growing in an extractive membrane bioreactor.**
Pavasant P, Dos Santos LM, Pistikopoulos EN and Livingston AG. *Biotechnol Bioeng* vol. 52, (3) 373-386.

**Wet air oxidation of polyethylene glycols; mechanisms, intermediates and implications for integrated chemical-biological wastewater treatment.**

**Minimisation of biomass in an extractive membrane bioreactor.**
Strachan LF, dos Santos LMF, Leak DJ and Livingston AG. *Water Science & Technology* vol. 34, (5-6) 273-280.

**Instability phenomenon in an external-loop three-phase gas-liquid-solid airlift reactor (vol 41, pg 2508, 1995).**

**Detoxification of industrial wastewaters in an Extractive Membrane Bioreactor.**

**Catalytic wet oxidation of p-coumaric acid: Partial oxidation intermediates, reaction pathways and catalyst leaching.**
Mantzavinos D, Hellenbrand R, Livingston AG and Metcalfe IS. *Applied Catalysis B Environmental* vol. 7, (3-4) 379-396.
1995

Instability phenomenon in an external-loop three-phase gas-liquid airlift reactor.

Aqueous-aqueous extraction of organic pollutants through tubular silicone rubber membranes.

Dos Santos LM and Livingston AG. *Biotechnol Bioeng* vol. 47, (1) 90-95.

Membrane-attached biofilms for VOC wastewater treatment I: Novel in situ biofilm thickness measurement technique.
Dos Santos LM and Livingston AG. *Biotechnol Bioeng* vol. 47, (1) 82-89.

Minimizing the environmental impact of process Plants: A process systems methodology.
Stefanis SK, Livingston AG and Pistikopoulos EN. *Computers & Chemical Engineering* vol. 19, 39-44.

Dichloroethane Removal from Gas Streams by an Extractive Membrane Bioreactor.
dos Santos LMF, Hoemmerich U and Livingston AG. *Biotechnology Progress* vol. 11, (2) 194-201.

Novel membrane bioreactor for detoxification of VOC wastewaters: Biodegradation of 1,2-dichloroethane.

1994

Extraction and biodegradation of a toxic volatile organic compound (1,2-dichloroethane) from waste-water in a membrane bioreactor.

Hydrodynamics of an external-loop three-phase airlift (TPAL) reactor.
Douek RS, Livingston AG, Johansson AC and Hewitt GF. *Chemical Engineering Science* vol. 49, (22) 3719-3737.

Extractive membrane bioreactors: a new process technology for detoxifying chemical industry wastewaters.

Biological detoxification of a 3-chloronitrobenzene manufacture wastewater in an extractive membrane bioreactor.

Biotreatment of a point-source industrial wastewater arising in 3,4-dichloroaniline manufacture using an extractive membrane bioreactor. [Erratum to document cited in CA120:85584].
Brookes PR and Livingston AG. *Biotechnology Progress* vol. 10, (3) 344-344.

Biotreatment of a point-source industrial wastewater arising in 3,4-dichloroaniline manufacture using an extractive membrane bioreactor.
Brookes PR and Livingston AG. *Biotechnology Progress* vol. 10, (1) 65-75.

1993

Use of ATP to characterize biomass viability in freely suspended and immobilized cell bioreactors.

A novel bioreactor system for the destruction of volatile organic compounds.

Point source detoxification of an industrially produced 3,4-dichloroaniline-manufacture wastewater using a membrane bioreactor.

Livingston AG. *Biotechnol Bioeng* vol. 41, (10) 915-926.
Livingston AG. *Biotechnol Bioeng* vol. 41, (10) 927-936.

Mass transfer in liquid–solid fluidized beds of ion exchange resins at low Reynolds numbers.
Livingston AG and Noble JB. *Chemical Engineering Science* vol. 48, (6) 1174-1178.

Livingston AG and Zhang SF. *Chemical Engineering Science* vol. 48, (9) 1641-1654.

1991

Degradation of 3,4-dichloroaniline in synthetic and industrially produced wastewaters by mixed cultures freely suspended and immobilized in a packed-bed reactor.

Biodegradation of 3,4-dichloroaniline in a fluidized bed bioreactor and a steady-state biofilm Kinetic model.

DEVELOPMENT OF A PHENOL DEGRADING FLUIDIZED-BED BIOREACTOR FOR CONSTANT BIOMASS HOLDUP.
LIVINGSTON AG and CHASE HA. *Chemical Engineering Journal and The Biochemical Engineering Journal* vol. 45, (3) B35-B47.

Development of a phenol degrading fluidized bed bioreactor for constant biomass holdup.
Livingston AG and Chase HA. *Chemical Engineering Journal* vol. 45, (3) B57-B66.

1990

LIQUID-SOLID MASS TRANSFER IN A THREE PHASE DRAFT TUBE FLUIDIZED BED REACTOR.
LIVINGSTON AG and CHASE HA. *Chemical Engineering Communications* vol. 92, (1) 225-244.

1989

Modeling phenol degradation in a fluidized-bed bioreactor.

Preparation and characterization of adsorbents for use in high-performance liquid affinity chromatography.
