2017

Elastin-Like Protein, with Statherin Derived Peptide, Controls Fluorapatite Formation and Morphology. 

Enzymatic activation of cell-penetrating peptides in self-assembled nanostructures triggers fibre-to-micelle morphological transition. 

In vitro chondrogenic commitment of human Wharton's jelly stem cells by co-culture with human articular chondrocytes. 
Pereira RC, Costa-Pinto AR, Frias AM, Neves NM, Azevedo HS and Reis RL. Journal of Tissue Engineering and Regenerative Medicine vol. 11, (6) 1876-1887.

New Bioengineering Breakthroughs and Enabling Tools in Regenerative Medicine. 
MATA A, Azevedo HS, Botto L, Gavara N and Su L. Current Stem Cell Reports.

2016

Phage Display Technology in Biomaterials Engineering: Progress and Opportunities for Applications in Regenerative Medicine. 
Martins IM, Reis RL and Azevedo HS. Acs Chem Biol.

In vitro blood-brain barrier models for drug research: state-of-the-art and new perspectives on reconstituting these models on artificial basement membrane platforms. 

2015

Presence of starch enhances in vitro biodegradation and biocompatibility of a gentamicin delivery formulation. 

Biomimetic supramolecular designs for the controlled release of growth factors in bone regeneration. 

Co-assembly, spatiotemporal control and morphogenesis of a hybrid protein-peptide system. 

Dual targeted immunotherapy via in vivo delivery of biohybrid RNAI-peptide nanoparticles to tumour-associated macrophages and cancer cells. 
Molecularly engineered self-assembling membranes for cell-mediated degradation.

2014

Elastic biodegradable starch/ethylene-co-vinyl alcohol fibre-mesh scaffolds for tissue engineering applications.

2013

Self-assembly in nature: Using the principles of nature to create complex nanobiomaterials.
Mendes AC, Baran ET, Reis RL and Azevedo HS. *Wiley Interdisciplinary Reviews: Nanomedicine and Nanobiotechnology* vol. 5, (6) 582-612.

Peptide-based microcapsules obtained by self-assembly and microfluidics as controlled environments for cell culture.
Ferreira DS, Reis RL and Azevedo HS. *Soft Matter* vol. 9, (38) 9237-9248.

Hyaluronan and self-assembling peptides as building blocks to reconstruct the extracellular environment in skin tissue.
Ferreira DS, Marques AP, Reis RL and Azevedo HS. *Biomaterials Science* vol. 1, (9) 952-964.

Fabrication of phospholipid-xanthan microcapsules by combining microfluidics with self-assembly.
Mendes AC, Baran ET, Reis RL and Azevedo HS. *Acta Biomaterialia* vol. 9, (5) 6675-6685.

Co-assembled and microfabricated bioactive membranes.

2012

Surfaces Inducing Biomineralization.
Alves NM, Leonor IB, Azevedo HS, Reis RL and Mano JF.

Microfluidic fabrication of self-assembled peptide-polysaccharide microcapsules as 3D environments for cell culture.

Spontaneous co-assembly of molecularly designed building blocks into hierarchically ordered, dynamic, hybrid macrotubes.

Encapsulation and Survival of a Chondrocyte Cell Line within Xanthan Gum Derivative.
Mendes AC, Baran ET, Pereira RC, Azevedo HS and Reis RL. *Macromolecular Bioscience* vol. 12, (3) 350-359.

Injectable biodegradable starch/chitosan delivery system for the sustained release of gentamicin to treat bone infections.
Balmayor ER, Baran ET, Azevedo HS and Reis RL. *Carbohydrate Polymers* vol. 87, (1) 32-39.

2011

Biodegradable fiber-mesh scaffolds with elastic properties and their potential use in tissue engineering.
Susano M, Frias AM, Leonor IB, Reis RL and Azevedo HS. *24th European Conference On Biomaterials - Annual Conference of The European Society For Biomaterials*.

Palmitoylation of xanthan polysaccharide for self-assembly microcapsule formation and encapsulation of cells in physiological conditions.
Mendes AC, Baran ET, Nunes C, Coimbra MA, Azevedo HS and Reis RL. *Soft Matter* vol. 7, (20) 9647-9658.

MICROFLUIDIC ENCAPSULATION OF CELLS INTO SELF-ASSEMBLING XANTHAN-PHOSPOLIPID AMPHIPHILE FOR CELL THERAPY.
HYALURONIC ACID MICROPARTICLES AS INJECTABLE DRUG CARRIER FOR KNEE CARTILAGE REPAIR: EFFECT ON ARTICULAR CHONDROCYTE BEHAVIOR.

**Synthesis and functionalization of superparamagnetic poly-? caprolactone microparticles for the selective isolation of subpopulations of human adipose-derived stem cells.**
Balmayor ER, Pashkuleva I, Frias AM, Azevedo HS and Reis RL. *Journal of The Royal Society Interface* vol. 8, (59) 896-905.

**Controlled delivery systems: From pharmaceuticals to cells and genes.**
Balmayor ER, Azevedo HS and Reis RL. *Pharmaceutical Research* vol. 28, (6) 1241-1258.

**Encapsulation of human articular chondrocytes into 3D hydrogel: phenotype and genotype characterization.**

2010

**Highly porous and interconnected starch-based scaffolds: Production, characterization and surface modification.**

**Silk fibroin microparticles as carriers for delivery of human recombinant BMPs. Physical characterization and drug release.**

**Designing biomaterials based on biomineralization of bone.**

2009

**Novel injectable gel (system) as a vehicle for human articular chondrocytes in cartilage tissue regeneration.**

**Starch-poly-?caprolactone microparticles reduce the needed amount of BMP-2.**

**Chitosan scaffolds incorporating lysozyme into CaP coatings produced by a biomimetic route: A novel concept for tissue engineering combining a self-regulated degradation system with in situ pore formation.**

**Encapsulation of ?-amylase into starch-based biomaterials: An enzymatic approach to tailor their degradation rate.**
Azevedo HS and Reis RL. *Acta Biomaterialia* vol. 5, (8) 3021-3030.

**Preparation and characterization of starch-poly-?-caprolactone microparticles incorporating bioactive agents for drug delivery and tissue engineering applications.**

**Effects of protein incorporation on calcium phosphate coating.**
Leonor IB, Alves CM, Azevedo HS and Reis RL. *Materials Science and Engineering C* vol. 29, (3) 913-918.

2008

**Highly biodegradable starch-conjugated chitosan microspheres as carriers for the controlled release of aminoglycosides antibiotic drugs.**
Balmayor ER, Baran ET, Azevedo HS and Reis RL. *8th World Biomaterials Congress 2008* vol. 1.
Novel injectable gel system as a vehicle for human articular chondrocytes encapsulation for cartilage tissue regeneration.

**Natural Polymers in Tissue Engineering Applications.**

**Self-assembly of biomaterials at an interface: Formation of sacs, membranes, and strings.**
Capito RM, Azevedo HS, Velichko Y, Mata A and Stupp SI. *8th World Biomaterials Congress 2008* vol. 1.,

**Natural origin scaffolds with in situ pore forming capability for bone tissue engineering applications.**
Martins AM, Santos MI, Azevedo HS, Malafaya PB and Reis RL. *Acta Biomater* vol. 4, (6) 1637-1645.

**Controlling the degradation of natural polymers for biomedical applications.**
Azevedo HS, Santos TC and Reis RL.

**Preface.**
Reis RL, Neves NM, Mano JF, Gomes ME, Marques AP and Azevedo HS. *Natural-Based Polymers For Biomedical Applications.*

**Starch-poly(?-caprolactone) and starch-poly(lactic acid) fibre-mesh scaffolds for bone tissue engineering applications: Structure, mechanical properties and degradation behaviour.**

**A novel enzymatically-mediated drug delivery carrier for bone tissue engineering applications: Combining biodegradable starch-based microparticles and differentiation agents.**

**Self-assembly of large and small molecules into hierarchically ordered sacs and membranes.**

**Surface structural investigation of starch-based biomaterials.**
Pashkuleva I, Azevedo HS and Reis RL. *Macromolecular Bioscience* vol. 8, (2) 210-219.

**Natural-based polymers for biomedical applications.**
Reis RL, Neves NM, Mano JF, Gomes ME, Marques AP and Azevedo HS. *Natural-Based Polymers For Biomedical Applications* 1-802.

2007

**Natural origin biodegradable systems in tissue engineering and regenerative medicine: Present status and some moving trends.**

2006

**Incorporation of ?-amylase enzyme and a bioactive filler into hydrophilic, partially degradable, and bioactive cements (HDBC)s as a new approach to tailor simultaneously their degradation and bioactive behavior.**
Boesel LF, Azevedo HS and Reis RL. *Biomacromolecules* vol. 7, (9) 2600-2609.

**Incorporation of proteins with different isoelectric points into biomimetic Ca-P coatings: A new approach to produce hybrid coatings with tailored properties.**

2005

**Incorporation of proteins and enzymes at different stages of the preparation of calcium phosphate coatings on a degradable substrate by a biomimetic methodology.**
2004

Novel hydrophilic, partially degradable and bioactive bone cements containing starch and a bioactive glass. Boesel LF, Azevedo HS and Reis RL. *Transactions - 7th World Biomaterials Congress.*

Influence of protein incorporation in the nucleation and growth of biomimetic calcium phosphate coatings. Azevedo HS, Leonor IB, Alves CM, Goldsmith RJ and Reis RL. *Transactions - 7th World Biomaterials Congress.*

Natural origin scaffolds with in situ gradual pore forming capability: Development and characterization. Martins AM, Malafaya PB, Azevedo HS, Santos MI, Coutinho OP and Reis RL. *Transactions - 7th World Biomaterials Congress.*

Effect of incubation conditions and enzyme cocktails on the in vitro degradation behaviour of different starch-based biomaterials. Azevedo HS and Reis RL. *Transactions - 7th World Biomaterials Congress.*

2003

In vitro assessment of the enzymatic degradation of several starch based biomaterials. Azevedo HS, Gama FM and Reis RL. *Biomacromolecules vol. 4, (6) 1703-1712.*

Effects of the incorporation of proteins and active enzymes on biomimetic calcium-phosphate coatings. Leonor IB, Azevedo HS, Alves CM and Reis RL. *Key Engineering Materials vol. 240-242, 97-100.*
