2019

Performance evaluation of surgical techniques for treatment of scapholunate instability in a type II wrist.

Quantification of gas permeability of epoxy resin composites with graphene nanoplatelets.
Zhang Q, Wang YC, Bailey CG, Istrate OM, Li Z, Kinloch IA and Budd PM. *Composites Science and Technology* vol. 184., Elsevier.

Abdullah A and Bailey CG. *Engineering Structures* vol. 187.,

Effect of femoral head size, subject weight and activity level on acetabular cement mantle stress following total hip arthroplasty.

Impact of femoroacetabular impingement and dysplasia of the hip on hip joint sphericity.

A fate-alternating transitional regime in contracting liquid filaments.

Progressive collapse analysis of composite steel frames subject to fire following earthquake.

2018

Cement interface and bone stress in total hip arthroplasty: Relationship to head size.

Improving the performance of composite floors subjected to post-earthquake fire.

Failure criterion of an asphalt mixture under three-dimensional stress state.

The thermal analysis of cutting/grinding processes by meshless finite block method.
Quantifying effects of graphene nanoplatelets on slowing down combustion of epoxy composites.

Moving boundary analysis in heat conduction with multilayer composites by finite block method.

Effect of earthquake damage on the behaviour of composite steel frames in fire.

Punching behaviour of column-slab connection strengthened with non-prestressed or prestressed FRP plates.

2017

How solid surface free energy determines coalescence-induced nanodroplet jumping: A molecular dynamics investigation.

Grain size effects on indentation-induced plastic deformation and amorphization process of polycrystalline silicon.

Analysis of tenodesis techniques for treatment of scapholunate instability using the finite element method.

2016

Failure Analysis Following Osteochondroplasty for Hip Impingement in Osteoporotic and Non-Osteoporotic Bones.

Non-destructive evaluation of residual compressive strength of post-heated reinforced concrete columns.
Yaqub M and Bailey CG. Construction and Building Materials vol. 120, 482-493.

2013

Tests investigating the punching shear of a column-slab connection strengthened with non-prestressed or prestressed FRP plates.

Modelling basalt fibre reinforced glass concrete slabs at ambient and elevated temperatures.
Borhan TM and Bailey CG. Materials and Structures vol. 47, (6) 999-1009. Springer Science and Business Media LLC.

Structural behaviour of basalt fibre reinforced glass concrete slabs.
Borhan TM and Bailey CG. Materials and Structures vol. 47, (1-2) 77-87. Springer Science and Business Media LLC.

Strength and stiffness of post-heated columns repaired with ferrocement and fibre reinforced polymer jackets.

2012

Changes in the stress in the femoral head neck junction after osteochondroplasty for hip impingement: A finite element study.
Seismic performance of shear critical post-heated reinforced concrete square columns wrapped with FRP composites.

Global modelling of fire protection performance of an intumescent coating under different furnace fire conditions.

Large-scale fire test of unprotected cellular beam acting in membrane action.

Global modelling of fire protection performance of intumescent coating under different cone calorimeter heating conditions.

Seismic strengthening of shear critical post-heated circular concrete columns wrapped with FRP composite jackets.

2011

Large-Scale Fire Test of Unprotected Cellular Beam Acting in Membrane Action.

Axial capacity of post-heated square columns wrapped with FRP composites.

An experimental study of relative structural fire behaviour and robustness of different types of steel joint in restrained steel frames.

Structural performance of a post-tensioned concrete floor during horizontally travelling fires.

Experimental behaviour of composite slabs during the heating and cooling fire stages.

Cross sectional shape effects on the performance of post-heated reinforced concrete columns wrapped with FRP composites.

Repair of fire damaged circular reinforced concrete columns with FRP composites.

2010

Numerical modelling of structural fire behaviour of restrained steel beam-column assemblies using typical joint types.

2009

Comparison of unbonded and bonded post-tensioned concrete slabs under fire conditions.

Whole-building behaviour of bonded post-tensioned concrete floor plates exposed to fire.

Science and Technology Developments in Structural Fire Engineering.
Bailey C. *Structural Engineering International* vol. 19, (2) 155-164.Informa Uk Limited.
Effects of partial fire protection on temperature developments in steel joints protected by intumescent coating.

A Simple Method to Predict Temperatures in Steel Joints with Partial Intumescent Coating Fire Protection.

Fire tests on bonded post-tensioned concrete slabs.

Modelling of unbonded post-tensioned concrete slabs under fire conditions.

Fire tests on unbonded post-tensioned one-way concrete slabs.
Bailey CG and Ellobody E. *Magazine of Concrete Research* vol. 61, (1) 67-76. Thomas Telford Ltd.

2008

Modelling of bonded post-tensioned concrete slabs in fire.
Ellobody EAM and Bailey CG. *Proceedings of The Institution of Civil Engineers - Structures and Buildings* vol. 161, (6) 311-323. Thomas Telford Ltd.

Experimental bond behaviour of welded mesh reinforcement at elevated temperatures.
Giroldo F and Bailey CG. *Magazine of Concrete Research* vol. 60, (1) 23-31. Thomas Telford Ltd.

Simplified and Advanced Analysis of Membrane Action of Concrete Slabs.
*Aci Structural Journal* vol. 105, (1). American Concrete Institute.

2007

Small-scale concrete slab tests at ambient and elevated temperatures.

Behaviour of concrete floor slabs at ambient and elevated temperatures.

Instability of imperfect composite cylindrical shells under combined loading.
Tafreshi A and Bailey CG. *Composite Structures* vol. 80, (1) 49-64. Elsevier Bv.

Development of a Gaussian glass breakage model within a fire field model.

2006

Quantitative comparison of FDS and parametric fire curves with post-flashover compartment fire test data.

2005

Fracture Resistance of a Cracked Concrete Beam Post-strengthened with FRP Sheets.

2004

Indicative fire tests to investigate the behaviour of cellular beams protected with intumescent coatings.

Experimental behaviour of concrete floor slabs at large displacements.

Structural fire design: core or specialist subject?.
Bailey C. *The Structural Engineer* vol. 82, (9) 32-38.
Comparison of BRE simple design method for composite floor slabs in fire with non-linear FE modelling.

2003

Discussion: Holistic behaviour of concrete buildings in fire.

Efficient arrangement of reinforcement for membrane behaviour of composite floor slabs in fire conditions.

Large scale fire test on a composite slim-floor system.

2002

Holistic behaviour of concrete buildings in fire.
Bailey C. Proceedings of The Institution of Civil Engineers - Structures and Buildings vol. 152, (3) 199-212. Thomas Telford Ltd.

2001

Membrane action of unrestrained lightly reinforced concrete slabs at large displacements.

2000

The tensile membrane action of unrestrained composite slabs simulated under fire conditions.

The influence of the thermal expansion of beams on the structural behaviour of columns in steel-framed structures during a fire.

The structural behaviour of steel frames with composite floorslabs subject to fire.
Bailey C and Moore DB. The Structural Engineer 19-27. The Institution of Structural Engineers.

Effective lengths of concrete-filled steel square hollow sections in fire.
Bailey C. Proceedings of The Institution of Civil Engineers - Structures and Buildings vol. 140, (2) 169-178. Thomas Telford Ltd.

1999

The structural behaviour of steel columns during a compartment fire in a multi-storey braced steel-frame.

The behaviour of asymmetric slim floor steel beams in fire.

The behaviour of full-scale steel-framed buildings subjected to compartment fires.

1998

Computer modelling of the corner compartment fire test on the large-scale Cardington test frame.

Development of computer software to simulate the structural behaviour of steel-framed buildings in fire.
The design of steel framed buildings without applied fire protection.
Bailey C and Newman GM. *The Structural Engineer* 77-81.

1996

Analyses of the effects of cooling and fire spread on steel-framed buildings.

The lateral-torsional buckling of unrestrained steel beams in fire.

Computer simulation of a full-scale structural fire test.
Bailey C, Burgess IW and Plank RJ. *The Structural Engineer* 93-100.
